THE REMAINS OF MRS. SURATT.

The above we clip from the Washington correspondence mef yesterday's Philadelphia Ledger. At long last the cruel privilege has been accorded to a poor, ipnocent, murdered woman's relatives to have her remains, so that they may receive a decent burial! The blood of the country for seeds, vines, plants, &c., the Mrs. Suratt rests upon more than one result of an erroneous impression that the Mrs. Suratt rests upon more than one Radical high in influence and position. Their success in preventing even a reprieve of her Mfe for a day or two by President Johnson, will be brought up in judgment against them. We would not be Edwin M. Stanton of Joseph Holt, the real murderers of Mrs. Suratt, for torments of a never ending hell! "Loyalty" and pseudo patriotism will not save you then, you violators of the Constitution and murderers of the peace and happiness of more than one innocent family upon earth! There is a just God, and He will mete out justice to you!

Corruption in High Places .- A Washington letter writer illustrates his ideas on this

"While writing this sentence I look across the street and see in front of a Senator's class. On the coachman's seat sit two of God's creatures, called men; one a bright mulatto, the other a white man, and both in livery. They sit in solemn silence, under their gay robe of white furs and white gloves. Directly the door of the house opens, and two ladies carrying a poor man's fortune on their backs, descend the steps. The footman swings down and opens the door, with an easy grace the master cannot imitate. The door closes with a bang, the footman mounts and the coach rolls away. Well, it seems but yesterday that the owner of all this came here

The way purchasers of supplies, in some of the Departments of Washington, take care of number one, is said to somewhat in this wise: A clerk's flour barrel and sugar bucket being empty, an order for hair brushes and combs. to the amount of thirty-six dollars, for the use of the department, is sent to a grocer, who kindly steps out of his legitimate business to oblige a good customer. Having lived long enough in Washington to understand how to read such an order, he sends nine dollars' worth of brushes to the designated department, and twenty-seven dollars' worth of groceries to the residence of the clerk, who thereupon certifies that the order has been duly exscuted, and the bill is paid, to the satisfaction of all parties.

THE WORKING PEOPLE. -It is reported that the New York plasterers are on the eve of a strike. They claim a dollar an hour, and that eight hours shall be a day's work. 'A' comparison between the wages of men and women has just been made at the Ashland Cotton Company's Mills, at Norwich, Conn. Two of its weavers, husband and wife, each tending six looms, received \$1223 last year, and the husband's share only exceeded by \$9 that of

The employing printers in New York are out in a card, with reference to the statement published yesterday by the striking journeymen, to the effect that 70 offices were now paying the Union scale. The employers say there are 806 printing offices in the city, and the fact that so small a proportion of them have succumbed, is an acknowledgement, in substance, that the strike is a failure.

The establishment in New York which has tors reports that it is making favorable progress. Other offices say that they have more applications from the country than they can well respond to. The journeymen, however," discredit these reports, and allege that they are in most cases only gotten up for effect.

GREECE.—The French newspapers have recently published the following interesting statistics in reference to Greece: The total extent of Greece is 947 square miles. The first census of the population took place in 1834, and then it numbered 650,000 inhabitants. In 1865, on the annexation of the Ionian Islands, with 228,699 inhabitants, the total was 1,325,479. The population of Greece proper, exclusive of the Ionian Islands, is divided into the following proportions: Four per cent. have independent positions, 18 per cent. nave independent positions, 18 per cent. follow industrial pursuits, 49 per cent. are laborers or herds, 8 per cent. are merchants, 18 por cent. study fine arts and science, 5 per cent. are servants. The Ionian Islands roturn 51,842 laborors, 8865 manufacturers, and 7282 merchants. The principal cities are thens, with about 45,000 inhabitants; Syra,

The President has issued an order directing that the remains of Mrs. Suratt be delivered to the family, for decent burial. It appears that a petition asking that this be done, signed by about forty members of Congress, was filed in the War Department about two years ago, but cannot now be found.

In 1860, Green had 140 institutions of superior public instruction, and 1007 elementary schools, numbering in all 62,848 scholars. In the same, year, the Government contributed \$237,250 towards educational purposes. In the same period there existed 75 printing of the country, and 77 journals and 13 fices in the country, and 77 journals and 13 periodical reviews were published:
