Col H. Allen and all the officers of the Regiment will be present. All officers of sald companies are requested to see that their members will be in attendance. The Drum Corps of said Regiment will be in attendance, to enliven the hearts of the remaining members of the Regiment.

POLICE AFFAIRS.—Capt. McNall re ports but 13 lodgers, who found shelter at the Station House last night. He says everything is very quiet, but that the enemy have "retreated in good order." The Captain's quiet but cheerful face wore an unusually sad expression this morning. He fears that our new moon may wax and wane, and other moons do the same, and yet police circles will remain dull. His trusty Lieutenant, big Dick (beg your pardon, for being so familiar, Mr. Field,) has not had a hearty laugh for nigh unto three days, and we begin to fear for those huge sides of his. The Police Headquarters would be cheer less enough without the broad face and beaming countenance of Dick. His presence is always sure to drive away an attack of the blue devils, or any other kind of devils, that occasionally seize hold of a fellow of a convivial turn of mind. Dick is a trump. But still with all such charming attributes, Dick's magnetic influence is powerless at times to draw our enthusiastic and spiritually-inclined citizens toward the corner of 5th and Franklin. And for two nights past the Station House has presented a sorry ap-pearance indeed. Mr. Leininger could well exclaim:

"I feel like one who treads alone Some banquot hall deserted, Whose lights are fled, whose garlands dead, And all but me departed!" So much for Police Affairs to-day Nous verrons, as the lamented Father

Ritchie used to observe. PENNSYLVANIA LEGISLATURE.

BUCHU Long LEAP, CUBEBS, JUNIFER BERBIES.

Mode of Preparation.—Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displaced ment by liquor obtained from Juniper Berries, containing very little sugar, a small proportion of spirit, and more palatable than any now in use. The active properties are by this mode extracted.

Buchu, as prepared by Druggists generally, is of a dark color. It is a plant that omits its fragrance; the action of a flame destroys this (its active principle), leaving a dark and glutinous decoction. Mine is the color of ingredients. The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopea, nor is it a Syrup—and therefore can be used in cases where fever or inflammation exists. In this you have the knowledge of the ingredients and the mode of preparation. dients and the mode of preparation.

Extract of a letter from Ruv. Richard S. EDES, of Bollon, Mass.:

"For years I was a sufferer from Holls, so that my life became wearisome through their frequent quent and porsistent recurrence; finally a carbunole formed in the small of my back. During its progress large pieces of decomposed flesh were every day or two cut away, and the prostration and general disturbance of the system were great. Before I had recovered from this attack two smaller carbuncles broke out higher up, and I was again threatened with a recurrence of the sufferings to which I had so long heeh subjected. It was at this time I commenced taking the PERUVIAN SYRUP. I continued taking the PERUVIAN SYRUP. I continued taking it until I had used five bottles; since then I have have had nothing of the kind, for years I was one of the greatest sufferers. Other medicines gave me partial and temporary relief, but this remarkable remedy, with a kind of intuitive sense, went directly to the root of the evil, and did its work with a thoroughness worthy of its established character."
