

BASE BALL

Scranton Captured Both Games Played With Syracuse Saturday.

SALT DIGGERS UNABLE TO BAT

Wilkes-Barre Takes Two of the Three Games Played With Yonkers—Buffalo Loses Two to Erie, and Springfield is Victorious Over Providence.

HERE were lively times in the Eastern league games played Saturday.

The following table gives the percentages of the clubs, the number of games won and lost by each, and their standing in the league race up to and including the games played Saturday:

Table with columns: Team, Won, Lost, Per Ct. Includes Providence, Syracuse, Erie, Springfield, Buffalo, Scranton, Wilkes-Barre, Allentown.

WON TWO GAMES.

There was a Fight With the Umpire as an Extra Attraction.

The locals took two games from Syracuse Saturday afternoon, which was a most unlooked-for prospect.

It required ten minutes to decide the first game, which was closely contested throughout. The wrangling of the Syracuse players all during the game was a disgusting feature and culminated in an assault on Umpire Conley by Captain Griffin of Syracuse after the game was over.

Quarles pitched a good game for the locals, but his support was not of the best; Smith at times did very ragged work.

After the game was over Captain Griffin went up to Umpire Conley and charged him with robbing Syracuse of the game.

Major Connel was sitting in the grand stand and saw the assault. He jumped to the ground to get between the men but they were separated before he reached them.

He ordered the arrest of Griffin who was taken to the central police station. Later in the day he was given a hearing before the mayor and on expressing sorrow for what he had done was discharged.

Table with columns: Team, R, H, P, O, A, E. Includes Scranton, Syracuse, Wilkes-Barre, Erie, Springfield, Buffalo, Allentown.

Scranton plays two games at Syracuse today.

Bill Hoover has been released by Manager Cahill.

Hess did great work in the field and at the bat Saturday.

We are again leading Wilkes-Barre. That, at least, is some satisfaction.

THE BARGE OFFICE EYE.

DETECTS PHYSICAL IMPERFECTIONS IN IMMIGRANTS.

It Also Looks Out For People Who Are Insane or Idiotic—Poor Foreigners Are Subjected to a Rigid Examination Before Being Allowed to Land.

Few immigrants whose mental or physical condition prohibits them from landing go through the portals of the barge office without being found out.

Since the federal government assumed charge of the landing of immigrants no cases of contagious disease have been discovered by the barge office physicians.

Health Officer William M. Smith generally manages to find out any quarantine, where or his assistant boards every incoming vessel from a foreign port, whether or not there is contagion on her.

After all the barge's well passengers have been landed the ill ones are taken off and put into the barge office contagion ward.

Foreign municipalities overburdened with paupers have a habit of shifting the responsibility for their support on Uncle Sam.

Only a few of those who are detained for more thorough examination are in possession of the foot of the gangplank, where the home seekers come in swift procession, are finally excluded.

Decrepit men or women, whose labored gait generally gives them away, are always detained until they or their relatives give assurance in the substantial form of a \$500 bond that they will not become a charge on the government.

An immigrant with a glass eye is invariably held—not to pay duty on his eye, but to allow the doctors to make a careful examination of his real eye.

There are two narrow passage ways on either side of this inclosure, and through these the immigrants march in single file into the land of opportunity, or to the pen for the prohibited lumb and to the west.

There are two narrow passage ways on either side of this inclosure, and through these the immigrants march in single file into the land of opportunity, or to the pen for the prohibited lumb and to the west.

It is not difficult to detect imbeciles or idiots, but the sharpest observation is necessary to discover dangerous persons, who show no palpable physical symptoms of their malady, and who answer all questions coherently.

Immigrants afflicted with dropsy of the head, called by the doctors hydrocephalus, the sign of which is an abnormally large head, are declared as a rule, a half-witted.

He was an Italian carver and turner of rare skill. Specimens of his handiwork that he brought with him in his tool chest were marvelous in their harmonious and intricate design.

A neighbor's family received news the other day of the arrival of a new cousin to be added to the group of two little cousins in a distant town.

Having the needed merit to more than make good all the adverse claims for them, the following four remedies have reached a phenomenal sale.

HE EATS CARBON HE WANTS TO KEEP WARM

FOOD IS A MATTER OF CLIMATE.

The Equimo chews blubber because he wants carbon—wants to keep warm.

He has no use for starch—a non-heating food.

In our climate sixty-six per cent. of our food is starch. Starch is not easily digested.

Olyphant.

Miss Lauretta Walker, of Mayfield, is the guest of Miss Grace Lynch, of Delaware street.

Miss Aggie Lennon and Katie Donnelly have returned from their vacation at Elk lake.

An entertainment and social will be held at the Presbyterian church Tuesday evening under the auspices of Misses Berkheiser and Mason's Sunday school classes.

Miss Laura McFale, who has been visiting her parents on Danmore street, has returned to Philadelphia.

Mr. and Mrs. John Eadsen spent Sunday with the latter's parents in Danmore.

Miss Nellie McAndrew has returned home after a few days' visit at Avoca.

THE SUGAR TRUST'S SNAP.

Indianapolis Journal.

The American people are the greatest consumers of sugar in the world except the English.

Estimating the population at 60,000,000, we consume, at the above rate, about seven and a half millions of pounds of sugar annually.

A difference of 1 cent a pound in the market amounts to nearly \$41,000,000. The people will have to buy an enormous amount of extra sugar at reduced rates to compensate for what they will lose in the increased prices of sugar under the new law.

Four Big Successes.

Having the needed merit to more than make good all the adverse claims for them, the following four remedies have reached a phenomenal sale.

Best made. Play any desired number of times. Guaranteed to give satisfaction.

CURE FOR CHOLERA—Use Dr. Thomas' Electric Oil according to directions.
