Marriage of Miss Clara Thomas to Alfred Roberts.
TOOK PLACE AT THE BRIDE'S HOME
 Hyde Park Will Have a Prominent Part in the Wedding of Alfred Roberts and Miss Clara Thomas. The wedding ceremony will be held at the bride's home, 140 Franklin avenue, on Tuesday, Sept. 11, at 10 o'clock. The bride is the daughter of Mr. and Mrs. W. E. Roberts, and the groom is the son of Mr. and Mrs. J. H. Thomas. The ceremony will be performed by Rev. D. C. Hughes, pastor of the Baptist church, who performed the ceremony at the bride's home. The bride was attired in a costume of lawn silk laces trimmed in pearl, and carried roses. They were unattended. After the ceremony had been concluded, a wedding breakfast was served. The young couple left on the 9:55 Delaware, Lackawanna and Western train for New York and Philadelphia for a week's visit. On their return they will go to housekeeping on this side. The young couple are both earnest members of the Jackson Street Baptist church and have a host of friends, who wish them success. Among those present were: Daniel Thomas, Mr. and Mrs. James Roberts, Mr. and Mrs. William Roberts, Mr. and Mrs. Frank Beck, Mr. and Mrs. John Roberts, Mr. and Mrs. David Evans, Mr. and Mrs. Samuel Morgan and family, Misses Mary Morgan, May Roberts, Margaret Thomas, and Thomas Morgan. Among their array of handsome presents were a parlor lamp, rocking chair, silver berry dish and a silver tea set.

THAT FATAL CHARGE.
 Coroner's Jury Trying to Find Out Who Placed It in Thomas Ryan's Chamber.
 Coroner Kelly and jury held an inquest at the court house last night upon the death of Thomas Ryan, who was burnt by an explosion at the Pine Brook shaft on Saturday last at 3:30 p. m. and died the next morning. The inquest was demanded by Miss Inspector Hewitt, who was satisfied with the results of the examination of the case and the statements made bearing upon the accident. Twenty-six or more witnesses were examined and conflicting statements made. It appears that Ryan who was married a few years ago, had been working at the Pine Brook shaft two and three years and considerable evidence was given to show that he was an experienced miner and capable of handling powder. On Saturday afternoon Ryan was working on the night shift and was blasting rock to get more headroom on the shaft. He was preparing for the work found a hole in the roadway. He then took a tool called a "needle" to ascertain the depth of the hole when an explosion instantly occurred resulting ultimately in his death. There was no doubt whatever that the hole contained giant or alpac powder and that the candle was also fixed, otherwise an explosion could scarcely occur. No clue could be gleaned from the evidence as to who had drilled the hole and charged it with the powder. Owing to the short time that Ryan had been down it was decided to adjourn the inquest until Sept. 20, for the purpose of securing the evidence of Morris Thiel, the laborer who was hurt in the explosion and is expected by that date to be able to give evidence. Ryan leaves a widow and five children.

LOVE LAUGHS AT LOCKSMITHS
 Parents of Miss Hayes Looked with Disfavor on the Suit, but the Smiten Couple Considered Their Love Paramount to a Parent's Dictum. Sudden Death of John Rosen—Invention for Cleaning Beer Pipes.
 Miss Katie Hayes, daughter of Daniel Hayes, of 211 Stone avenue, was married within the past three weeks to Fritz Weiss, a young German baker, in the employ of Mrs. Lorenz Zsildor, of Franklin avenue. It is a case of elopement. The girl is 20 years of age and Weiss is a few years her junior. They met occasionally and became deeply attached. The first visit Weiss made to see Miss Hayes at her parent's home, there was a very inhospitable greeting bestowed upon him; but that did not cool his ardor. Three weeks ago the girl went to New York to learn the trade of hat trimming and the unsuspecting parents imagined that the separation would teach their daughter to forget her lover. The old adage that it is harder to separate two loving hearts than to smite a mountain of stone was fully justified in this case. Weiss followed her to New York and the result of the meeting was explained in a letter she sent to her parents telling of their marriage and asking the regulation forgiveness. Weiss returned to this city and his wife remained in New York. She expected parental forgiveness, but it is doubtful whether it will be given. The parents are incensed and pained at the unfilial act of their daughter.

WANTED FOR HIGHWAY ROBBERY.
 A Bad Young Man Taken Into Custody By the Police.
 Owen Moran, whom the police say is a bad young man, and who is wanted for highway robbery, was arrested at Gibraltar's saloon early yesterday morning on a charge of housebreaking. He had some dispute with the proprietor of the saloon and took revenge by throwing stones through the windows. Officers Hetselroth and Lowry were told of the occurrence and succeeded in capturing Moran.
 Ever Upward, Ever Onward.
 In fifteen short months Dr. E. Grever, the Philadelphia specialist, has taken a deeper hold on the confidence of the people of Scranton than any physician at present in the city. The reason for this is not hard to seek. The doctor is all that he claims to be, and couples with his remarkable medical and surgical attainments all the energy and push of the successful business man. The results of this are seen in his large and handsome new offices in the old Postoffice building, corner Penn avenue and Spruce street, where between office, reception rooms, laboratory, etc., he occupies a floorage amounting to over 1,000 square feet. The appointments in the new establishment are complete in every detail, and will fully meet the requirements of a practice which had far outgrown the limited space in the old office.

A NOTABLE WEDDING.
 Marriage of Miss Anna May Downing to Walter W. Mitchell.
 The marriage of Walter W. Mitchell, a prominent young business man of Utica, N. Y., and Miss Anna May Downing, was celebrated at 329 Millin avenue, the residence of the bride's grandfather, Nathaniel Hallstead, last evening at 9 p. m.
 The ceremony was performed by Rev. Warren G. Partridge and took place in the drawing room, the wedding party standing under a canopy of mountain pine and before an exquisite background of magnificent palms. As the bride party entered through the eastern door Professor Southworth played the wedding march. The bride was dressed in white moire silk and lace and wore diamonds, which included a superb pin, the present of the bridegroom, and was attended by two "ribbon children," Miss Margery Howe, of Utica, and Miss Mildred Campbell, as well as by two little "cousins," Masters Walter and Frankie Hallstead. John S. Thomas, of Utica, acted as best man and Thomas Moore acted as usher.
 After the wedding ceremony the wedding feast was served in the dining room, which was decorated with pink and white florals exclusively. Over 200 guests were entertained.
 The wedding presents were innumerable and of a most costly description. The happy pair are enjoying a honeymoon in the New England states prior to taking up their residence at Utica. Among the out-of-town wedding guests were Mr. and Mrs. L. H. Howe, Miss Ada Mitchell, John Thomas, Utica; Mr. and Mrs. I. J. Webster, Miss Dora Hallstead, Missa Riverburg, Mr. and Mrs. Peter Riverburg, E. E. THE MUSICAL CONTEST.
 Many West Siders Will Compete at the Bristlewood.
 Hyde Park will be well represented at the Bristlewood, which occurs at Laurel Hill park today and tomorrow. All of our good singers will participate in the contests. The Mendelssohn's are very anxious to capture the chief prize of \$500 on the "Hunting Song," and from their rehearsal they undoubtedly will.
 "Minstrel of the Arena" will be contested for with a view. The Druids and Hyde Park Choral society are making earnest efforts and both sing admirably well.
 Last evening the choir under the leadership of Leslie Thomas rehearsed the "Hunting Song," the chief competitor, at the home of Mrs. Boston on North Lincoln avenue. After the rehearsal solos were sung by several members, and the large number of auditors were highly elated over their success.

THOSE FRABLE CHARGES.
 It is believed that the investigation will go by default.
 "How about the Frable charges?" is frequently asked by those who take an interest in councilman affairs. The investigation committee appointed by council to look into the matter has not as yet held a meeting. City Clerk Favells says that Mr. Frable has twice been requested to set a time when it would be convenient for him to come before the committee and make known his charges, but so far has failed to make a date.
 As Mr. Frable is not anxious to press the charges he made against councilman it is not likely that any investigation will occur. The committee, however, must meet and frame a report to be presented to council.

AN INGENIOUS INVENTION.
 Fred Weichel and William Sunday Possessors of a Labor Saving Device.
 Fred Weichel, the Cedar avenue hotelkeeper, and William Sunday, a South Side machinist, through the re-use of placing their heads together have invented one of the simplest and most practical of apparatuses. It is a small machine for scouring beer pipes, and the experiments already that it has been put to demonstrate that it is a success.
 It is built after the pattern of an upright boiler, is eighteen inches high and thirty inches in circumference. In Philadelphia, where it was manufactured, it cost \$40. The model for the patent was sent to Washington and a patent granted. A gasoline blower underneath produces heat and it can raise fifty pounds of steam in twelve minutes. It is capable of resisting a pressure of 150 pounds. After the steam is raised a rubber hose is attached to the beer pipes and that force is conveyed through them with the effect that in less than three minutes the pipes are thoroughly cleaned out, and then a stream of cold water is after ward forced through the pipes to cool them. It weighs fifty-five pounds, holds a gallon and a half of water, and the safety valve is set at 150 pounds.
 The ingenious inventors have had many offers to purchase their right to the patent, but are not inclined to consider any of them.

It is a small machine for scouring beer pipes, and the experiments already that it has been put to demonstrate that it is a success.
 It is built after the pattern of an upright boiler, is eighteen inches high and thirty inches in circumference. In Philadelphia, where it was manufactured, it cost \$40. The model for the patent was sent to Washington and a patent granted. A gasoline blower underneath produces heat and it can raise fifty pounds of steam in twelve minutes. It is capable of resisting a pressure of 150 pounds. After the steam is raised a rubber hose is attached to the beer pipes and that force is conveyed through them with the effect that in less than three minutes the pipes are thoroughly cleaned out, and then a stream of cold water is after ward forced through the pipes to cool them. It weighs fifty-five pounds, holds a gallon and a half of water, and the safety valve is set at 150 pounds.
 The ingenious inventors have had many offers to purchase their right to the patent, but are not inclined to consider any of them.
