# GENERAL NEWS

The policy and aim of the present management of the Lehigh Valley, says the Wilkes-Barre Record, is first to get the road bed and equipment in the very pink of condition. Among the most important of these improvements is the double-tracking of the mountain eut-off from Avoca to Fairvisw, a dis-tance of sixteen miles. All of this work is extraordinarily heavy and consequently expensive. Another new de-parture has also been made in the length of the rails which are used for this new track. Heretofore the practice has been that rails should be not more than thirty feet long. In this case, however, the length has been increased to forty-five feet, and it is claimed by those who are in position to know, that track laid with the long rails is better and can be kept in good condition at considerably less expense than track laid with the shorter rails. The company has also gone to another expense for the protection of its patrons and its business in the introduction of the Hall automatic electrical signals which have been placed on its line between Penn Haven Junction and Mauch Chunk. It is claimed that these signals are the best tor the purpose that can be found. They have also protected Rockport tunnel in the same manner. In addition to the improvements noted above, which are all on Wyoming division, they intend to equip all of their tele-graph stations from Jersey City to Buffalo with the best semaphore signal, which are made by the Union Switch & Signal Co., which will be placed in position in a few days, Arrangements are also in progress for increased track facilities at Buffelo and Jersey City. Their equipment of cars is also to be increased by the addition of 2,000 of the latest improved gondolas. There are also a number of other improve-ments contemplated which have not yet been decided upon. Taking it all is all the time is not far distant when the road bed and equipment of this road will be the best in the country.

Some interesting facts as to the Pullman Palace car business was brought out during the recent sittings of the National Labor commission at Chicago. George Pullman said he saw no reason why the company, although it had this year declared a dividend of \$2,800,000, should raise the wages of men in a department which was losing money. The capital stock of the Pullman company at present was \$36,000,000, dividends were paid on this basis, and the company's surplus was more than the \$16,000,000 generally reported. The company had paid dividends from the beginning-for three years S per cent. each quarter, and for awhile 9½ and S per cent. annually. Speaking of reductions of wages at Fullman, Mr. Pallman said: "For entire months we did not have an order for a car. I realized that unless something was done there would be suffering at Pullman, and after a consultation with vice-President Wickes I de-termined to make a bid under the actual cost of construction. We did this, and I remember the first order was for fifty-five cars. I put in a bid for these cars at from \$300 to \$400 below the cost of a car, making up my mind to make this contribution rather than see my men idle. I be-lieve many other car builders in the country felt the same way. As evidence of this, the next lowest bid to mine was only \$24 higher than mine. On another occasion I bid for a lot of 250 cars at a loss of \$15 on each car, preferring to do this rather than see the freight shops closed. I underbid the next competitor only \$1 a car. It cost us about \$50,000 to keep the men at work as long as I did."

increase of the capital stock of the car company has been \$1,000,000 a year. One year it increased \$6,000,000. There are about 4,200 actual stockholders. When the company was established the capital stock was \$1,000,000, and the capital stock was \$1,000,000, and the other \$35,000,000 represents cash actually paid in. The individual profits have bee \$25,000,000. There has never been any stock watered nor any extra dividend paid." "Can you tell the amount of wages paid the men since the formation of the company?" caled Index Worthington. "Yes asked Judge Worthington. "Yes, \$32,847,924. For materials we have paid out in that time \$73,000,000. I cannot now tell the total paid out in wages, but I will do so later. The fell off nearly \$500,000 in the month of August alone last year as compared with the same month in "Do you not think it would have been right, Mr. Pullman, for a company making as much money as the Pullman company has, which last year declared a dividend of \$2,800,000 to have in some measure shared its profits with the employes at Pullman?"
"The manufacturing department of the Pullman is entirely separated from any other department of the company. The manufacturing department was losing money and I see no reason why we should, simply because the company was prosperous, raise the wages in a particular department which was los-ing money."

Even the rolling skate has caught the prevailing fever for pneumatic tires. There has accordingly been concocted and duly protested by letters patent what is called the pneumatic skate, This new means of locomotion is a cross between the roller skate and the bicycle. On a fair road, it is stated, a speed of from ten to twelve miles may be obtained comfortably, and hills may be obtained comfortably, and hills may be mounted and descended with as little exertion as attends the ricing of a cycle. The weight of a pair of these skates is only two and three-quarters pounds, so that they are readily portable when not in use, and the wheels are three and one-half inches in diam :ter, furnished with two-inen tines, giving a total diameter of about seven and one-half inches.

MINOR INDUSTRIAL NOTES:

On Oct. 1 the boycott inaugurated by the trans-continental lines against the Union Pacific will be called off.

The executive commission of the Western Union-Telegra ph company has recom-mended the declaration of the usual quar-terly dividend of 1½ per cent., payable

The passenger men will meet in Chicago on Sept. 27 to form east-bound passenger pools out to St. Louis, Peoria and Chicago, It is said the division of business can readily be arranged.

The Jersey Central is about to place an order for 8,500 thirty-ton gondolas, equipped with the Januley coupler. These will be equal to 17,500 small hopper cars, and will have a capacity of 105,000 tons of

The Wilkes-Barre and Eastern railroad doing a good passenger and freight usiness. This, in addition to the ir coal usiness, which is received from the Le-

high Valley at Jenkins, on mountain cut-off, is keeping their present force of men and engines busy.

The Terre Haute Gazette says a system of coal premiums is to be adopted by the Vandalla. Each engine is allowed so much coal per car per mile hauled, and all fuel saved is credited to the enginemen. On roads where this is practiced as high as \$6 per week is paid in premiums. The scarcity of water on the mountain cut-off of the Lehigh Valley railroad has seriously interfered with the movement of their heavy freight and coal business over the mountain. For several days there have been several engines from other di-visions pressed into service in order to move the accumulation of coal.

The connection between the Lehigh Valley railroad and Wilkes-Barre and East-ern at Jenkius has been completed and ern at Jenkius has been completed and preparations are being made to increase the interchange of business between the two companies at that place. It is rumored, says the Wilkes-Barre Record, that the output of Jermyn breakers, Nos. I and 2, will be diverted to the Valley to be delivered to the Wilkes-Barre and Eastern at Jenkius. When working full the output of these two collieries amounts to 120 cars a day which will make considerably more. a day, which will make considerably more work in the Coxton yard.

Bucklen's Arnica Salve.

The best salve in the world for Cuts Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Matthews Bros.

FINANCIAL AND COMMERCIAL.

Stocks and Bonds. NEW YORK, Sept. 12.-Operations the Stock Exchange continue of a professional character, outside orders being few and far between. At the opening the lo-cal traders were bearishly inclined and ices were depressed anywhere from 1/4 : per cent.

The bears were not disposed to press their advantage as the leading corpora-tions are declaring their usual dividends and railway earnings for the first week of the current mouth are keeping up very vell indeed. The anthracite coalers comed into prominence in the afternoon in rumors of a new iron clad combination and the reports of progress in the Read-ing's rehabilitation scheme.

Ings rehabilitation scheme.

In the late trading the speculation was firm and the market closed % to 2% per cent, higher on the day except for Burlington and Quincy, Rock Island, Distillers, General Electric and Western Union which lost % to 1% per cent. Total sales were only 187,699 snares.

The range of tolay's prices or the active stocks of the New York stock market are given below. The quotations are furnished The Tennune by G. du B. Dimmick, manager

#### SAVED BY A MIRACLE.

RESCUE OF A SAILOR BY A NAIL IN A PIECE OF WRECKAGE.

The Terrible Struggle for Life by a Mate After the Vessel Had Gone to Pleces on the Rocks-Buffing the Mountainous Waves and Fighting the Undertow.

Rather less than twenty years ago there lived in Oregon City a coterie of young men who were distinguished for their ex-cellence in athletic sports, in which they took pleasure and pride. The acknowl-edged leader of this band of athletes was a tall, well formed and splendidly developed youth, the nobility of whose physique had been enhanced by every kind of manly exercise. He was pre-eminent in the arts of swimming and boating, and was never so happy as when in or on the water.

Upon the arrival of the time when it became necessary for him to choose an occupation, true to his first love he elected to follow the sea, and accordingly shipped before the mast on a merchant vessel. In this capacity the next four years of his life were passed, and at the end of the period he became thoroughly convinced that a sailor's life was no sinecure. He stuck to the ship, however, and his natural ability procuring him promotion he rose step by step until he became first officer.

The clipper ship Elizabeth sailed through the Golden Gate, and her register bore the name of W. C. Barclay, first mate. Omitting the events of the voyage, the ship's return and her subsequent loss on the Tennessee rocks, the thread of the narrative may be gathered up on the forward part of the deck after the ship was broken in twain. When in the bow a little group of men surrounded the first officer, who had removed his boots in partial preparation for the unknown developments of the dis-

Almost before he had time to think of the future or to appreciate the perils of the situation a huge wave swept all into the wild waste of waters below and Barclay sank under the billows. Upon reaching the surface again he struck out from the doomed vessel with all the power and skill of his boyhood days.

A PLUCKY FIGHT. Throughout his terrible battle with the waves which followed, the intrepid sailor continued cool and wary, and his first thought was, as he relates his awful experience, to avoid the dangerous network of rigging in the vicinity of the doomed ves-

Accordingly he swam about forty yards to the northward, when he seized a floating plank and headed for the shore, which could be plainly seen about 200 yards away from the struggling seaman fighting for his life with the angry waters. In another moment a solid green wall of water towered over him, crushed him and drove him down into the depths, where the undertow dragged him still further down and held him. By sheer muscular effort he fought his way slowly to the surface, where a floating spar struck him sharply on the With a breath of air his caution re-

turned, and removing his vest he held that garment in one hand as a shield for his face and head. Not many seconds had passed when another giant wave, pitiless in its dark green robe, again drove him to-ward the bottom, and the undercurrent seized him in a tight embrace as before. With another struggle he emerged from beneath the waves, only to be dashed again

After every ascension Mr. Barclay with little difficulty laid hold of pieces of float-ing wood and endeavored to rid himself of his involuntary salt draughts and to regain his breath. These respites were mo-mentary, and ere he could swim more than a few yards a monster billow would send him downward again.

So he labored on, swimming, sinking, gasping, struggling, fighting against what seemed to be his fate. He dare not dive beneath the breakers for fear of striking some floating wreckage. His fight was not alone with his arm, but also with his brain, against the combined forces of sea and storm, and it seemed impossible for him to conquer in the unequal combat. As he neared the shore his danger was increased instead of diminished. His enemies found other allies in the towering rocks, and in the treacherous bowlders beneath the

SAVED BY A NAIL He turned about and approached the rocks feet foremost. He was dashed against them, and one foot was cut and bruised by the sharp stone, and then he was carried back, but not far, when a gigantic breaker drove him down and he was whirled about by a powerful whirlpool. He seemed to be fathoms down. The waters were dark and dreadful. A feeling of hopelessness came over him, and for the first time he felt that his hour had come. A feeling of unutterable horror came over him. He felt powerless to continue the struggle for life and he abandoned himself to his fate. Then occurred a miracle. In some fortuitous manner a floating timber had been

cast into the same waters.

In this timber was a nail, and as the man and timber were whirled about the nail caught the soft flesh in the man's arm, and as the buoyant wood rose to the surface it dragged upward the almost exhausted mate of the Elizabeth. He was fortunate to seize hold of a portion of the wrecked ship wedged between two rocks and struggled to avoid being drawn under the wreckage piled upon the shore. His legs had become benumbed and seemed temporarily paralyzed, but by an almost superhuman effort he managed to drag himself up on

the slippery rocks. It was slow and laborious work, and Mr. Barclay was twenty minutes crawling half as many feet, but he finally reached a spot above the waves where, half dead with cold, exposure and exhaustion, he could rest and regain his strength. The waves and floating timbers had torn his clothing into shreds, and the wind was bitterly cold. He forced himself to resume his painful efforts to move forward. Horrified with his fearful experience, the further he was from the angry waters the nearer they seemed in his excited imagination. At last he gained the top of the bank, and the welcome calls of a covey of quail, disturbed by his approach, assured him of his safety.
"Thank God!" he cried, "I'm saved at

"-San Francisco Call.

A Great Drawback.

Spatts—Do you like pajamas, Goslin? Goslin—Yes, I am vewy fond of them, doncher know; but I cawn't find a chef in this country who can cook them as they ought to be cooked, like they do in deah old England.-Judge.

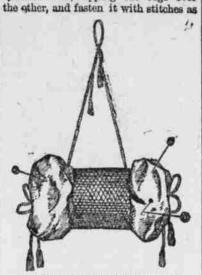

million dollars invested in rare dog flesh. The dogs in the Hillside kennels, at Lancaster, Mass., are valued at \$100,000, and those at the Melrose kennels are worth \$75,000,

The London estate of the Duke of Bedford covers 118% acres, and is spread over the three parishes of St. Pancras, Blooms-bury and Covent Garden. About 20% acres are devoted to pleasure gardens. There are close upon 8,000 residences or shops on his estate—1,630 on building leases, 832 on repairing leases and 400 tene-

The application of the microscope to machine shop practice for the purpose of proving whether surfaces are true is pro-nounced by experts as being the best method for obtaining accuracy thus far A HANGING CUSHION.

It Is Inexpensive, Very Convenient and Not at All Difficult to Make. A cushion to be hung at one side of the dressing case or bureau and design-

ed for bonnet and hat pins is thus described in The Household: Cut a piece of cardboard 7 inches long and 6 inches wide. Cover this with some dark shade of velvet. Bend it in cylinder form, lapping one edge over

neatly as possible. Now fill this cylinder with curled hair and let it come out beyond the ends about two inches in a round mass.

You will need ribbon for covering these ends of some pretty tint that will combine well with the shade of velvet that you use. The ribbon must be 8 inches wide and 10 inches long. Cut two pieces of this length, sew the ends of each together and gather one side of each piece of ribbon and slip it over the curled hair at each end, drawing up the gathering string to fit snugly over the velvet cylinder and sew it with fine stitches. Then gather the other side of the ribbon and draw it up so that the gathers will all meet in the center. A bow of ribbon with ends may be placed here to cover up the stitches or a cord and tassels made from the worsted. Another cord and tassels is used to hang it by, or ribbon should be used for this purpose if it is used at the sides.

The cord is made by taking several strands of worsted, a little more than twice as long as you will require it, and with the aid of another person twist it, each twisting in opposite direction from the other. It should be doubled over when it begins to kink by placing the two ends together and running the hand up and down the cord quickly. The tassels can be made from worsted, wound over a card 3 inches long. When it is large enough, slip from the card and tie with a piece of worsted to form the head and cut the other end to form

#### Washing Table Linen.

If stained, heat the stained spots first. Fruit stains will, many of them, come out if soaked in sweet milk. Other stains come out if the spots are wet with alcohol and washed out in clear, cold water before allowing suds to touch them. Stains of milk or soft eggs must be soaked in clear, cold water for 10 minutes when washed. Use a mild, white soap and make a strong lather, only letting the soap touch the fabric at some obstinate grease spot. Teacloths or others with delicate colors wash brighter if a handful of salt is added to the first suds, which should be barely lukewarm. The second may be hotter. Wash quickly through both. Fold smoothly for the wringer; then pop into your bag and set in cold water for 10 minutes. Rinse first in hot, then in lukewarm water. Have your bluing water cold and free from specks of color. Dip your linen in very thin starch containing a suspicion of bluing, and hang, if possible, in the sun. See that the line is clean. Take pains to hang each piece square, as if dried awry it will be very hard to make it even again.

Whortleberry Pudding.

One and one-half cupfuls of sugar, one-half cupful of butter, a cupful of sweet milk, 2 eggs, 3 cupfuls of flour and 2 teaspoonfuls of baking powder. Mix and stir in lightly a pint of berries

#### A Word About Sleeves.

The dominant sleeve is developing possibilities of expansion which are realy alarming when seven yards of material can be used in one pair. Two immense balloons are not enough, it seems. There must be frills over frills and puffs over puffs to make the deformity more

complete. Even the plain, unassuming mutton leg sleeve has taken to drapery. Ribbon and lace are employed to make fancy sleeves, which are useful to freshen up an old gown for house wear. The large puff at the top can be of lace, and over this are straps of black satin ribbon caught in above the elbow with a twist of ribbon. The puffs at the elbow may be of satin or velvet. A pretty sleeve for summer silks is full to the cuff, and over this is a wide fall of lace. The full epaulets of silk are bound on the edge with velvet, and underneath this is

a wire to make the plaits stand out. Another style which gives the long effect the shoulder has one puff, a double frill at the elbow, and a plain cap arrangement at the top.

A Million Friends. A friend in need is a friend indeed, and A friend in need is a friend indeed, and not less than one million people have found just such a friend in Dr. King's New Discovery for Consumption, Coughs and Colds. If you have never used this Great Cough Medicine, one trial will convince you that it has wonderful curative powers in all diseases of Throat, Chest and Lungs. Each bottle is guaranteed to do all that is claimed or money will be refunded. Trial bottles free at Mathews Bros', drug stora Large bottles 50c, and \$1.00.

In thousands of cases the cure of cough is the preventive of consumption. The surest cough medicine in the world is Dr. Wood's Norway Pine Syrup, Sold by all dealers on a guarantee of satisfaction.

R OOF tinning and soldering all done away with by the use of HARTMAN'S PAT-ENT PAINT, which consists of ingredients well-known to all. It can be applied to tin, galvanized tin, sheet iron roofs, also to brick dwellings, which will prevent absolutely any crumbling, cracking or breaking of the brick. It will outlast tinuing of any kind by many years, and it's cost does not exceed one-fifth that of the cost of tinning. Is sold by the job or pound. Contracts taken by ANTONIO HARTMANN, 527 Birch St.

FRENCH REMEDY produces the above results in 30 days. It acts owerfully and quickly. Cures when all others fai Young men will regain their lost manhood, and old men will recover their youthful vigor by using REVIVO. It quickly and surely restores Nervousness, Lost Vitality, Impotency, Nightly Emissions, Lost Power, Falling Memory, Wasting Discases, and all effects of self-abuse or excess and indirection, which unfits one for study, business or marriage. It not only cures by starting at the seat of disease, but is a great nerve tonic and blood builder, bringing back the pink glow to pale cheeks and restoring the fire of youth. It wards off Insanity and Consumption. Insist on having REVIVO, no other. It can be carried in vest pocket. By mail \$1.00 per package, or six for \$5.00, with a positive written guarantee to cure or refund he money. Circularirec, Address 30 VAL MEDICINE CO., 53 River St., CHICAGO, ILL. ong men will regain their lost manhood, and old For sale by Matthews Bros., Druggists,

What is More Attractive Than a pretty face with a fresh, bright complexion? For it, use Pozzoni's Powder.

# \$250,000 GAUTION: To Our Patrons

Washburn-Crosby Co. wish to assure their many patrons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take NO RISKS, and will allow the new wheat fully three months to mature before

This careful attention to every detail of milling has placed Washburn-Crosby Co.'s flour far above all other brands.
