GENERAL NEWS

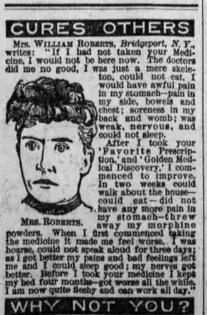

This view of the anthracite situation is taken by the Philadelphia Inquirer: "It is just one week ago that the announcement was made of the anthracite coal presidents' meeting, and their determination to stand by the May circular. Yet it is now admitted that circular. Yet it is now admitted that some of the companies have violated this agreement. Coal has been shipped to New England points since that agreement was made that has been bought at \$3.10 for egg and \$3.25 for atove, whereas the May circular prices are \$3.35 and \$3.60 respectively. More over, it is understood that more than one company is thus cutting And yet no other result was possible in view of the conditions of the trade. There are 8,000,000 tons of unsold coal above ground in the hands of producers, stocks all through the country in consumers' hands are heavy and the current demand is exceptionally light; yet the sales agents agreed to move 3,000, 000 tons in October. With this quanool tone in October. With this qualnity of coal coming upon an overstocked
market, it was only a question of who
could cut first. In fact, the presidents'
determination had hardly been telegraphed over the country before some
of the companies were selling coal at
the old figures. This last attempt to
nave the trade from demoralization has
ended in utter failure, and the season
is now so far advanced that no measure is now so far advanced that no measure that could possibly be adopted would be of any value. The companies have thrown away 20 cents a ton on almost 40,000,000 tons of product, and all be-40,000,000 tons of product, and all because a race for tonnage was indulged in. It was only yesterday that the figures for the Septemper wages drawing came out, showing the average price of Schuylkill coal at Schuylkill Haven in that month was \$2.27, as against \$2.64 in September last year, and, while this drop of 37 cents is rather greater than was reported in previous months this year, it is fair to say that the loss has been 20 cents say that the loss has been 20 cents when all the sizes are included. And yet, in spite of this enormous drop in prices and a decreasing demand from consumers, the companies persist in piling up coal where it is not needed and where it will be a source of demoralization in the coming year. For the only question now is, can next spring's trade be saved? If the business is to be at all remunerative next year, steps must soon be taken to restrict the output, and restrict it most rigidly. This year's business is beyond

The Philadelphia It quirer thinks that the apathy with which the Reading reorganization plan is regarded is due more to the decline in the coal that the apathy with which the Reading reorganization plan is regarded is due more to the decline in the coal trade than to any other factor. Although the fact has been concealed under a cloud of percentages and traffic arrangements, the truth is, all the coal roads have suffered a severe blow through the reduction in the rates for transportation. This reduction has been about 20 cents a ton, and no road is now getting more than \$1.50 per ton for hanling its coal to New York harbor, as against \$1.70 and \$1.75 a year ago. It is true the Reading shows by a tariff sheet that its rate is still \$1.70, but as the coal and iron company is almost the only shipper, and as its deficit is always assumed by the railroad company, the case would not be altered a particle if its tariff were made \$2. The Reading gets but \$1.50 a ton for carrying their coal. Now this reduction, coming after other radiations in the coal is placed in the firebox, then covered up with waste, and crude oil that costs but a triffe per gallon poured upon it, the heat being intensified by putting on a blower ron by a stationery engine. By this process an engine can be fired up in forty-five minutes or less, while it requires one hour or more to fire it up with wood and costs a much larger sum of money than the crude oil.

THE essential lung-healing principal of ing their coal. Now this reduction coming after other reductions in late years, is a matter of prime import-Ten years ago, when the Reading did 21.71 per cent, of the anthracite business, the rate was \$2 from Port Carbon, and an additional lateral toll was imposed that averaged about 30 cents a ton, making rates from the mines \$2,30. But about 1885 a through rate from the mines of \$2 was made, and this was cut down to \$1.70 a few years ago. Now it is fur-ther reduced to \$1.50. Of course, this loss would be made good if the com-pany had increased the volume of its coal trade, but this it has failed to do. coal trade, but this it has failed to do.
It carried in 1893 but 2 500,000 more
tons than in 1884, and at 80 cents a ton
less money. Nor was it possible to
reduce expenses much, because of the
larger volume of business. The low
price for the company's shares is due
primarily to this insbility of the management to get as much out of the coal trade as they once did. The merchandise and passenger business of the road is entirely satisfactory in every way, but it does not admit of doubt that the coal trade is in very bad shape. It is, of course, impossible to get rates back again to the old figures, and, this be-ing the case, the only alternative is to make the output as large as possible and crowd out of the market bituminous fuel as far as can be done. While the present conditions are in force the stock will continue to shrink in importance, and it is a recognition of this fact that keeps the shares down and causes such a cool reception to the reorganization plan." It is a pity about the poor railroads. No doubt they ought to get all the profit out of coal mining, and be pensioned, besides.

Magaret S. Dennison, executrix, and Abram Nesbitt, executor of the estate of Maria Hughes and others, have filed a suit in assumpsit against coal opera-John C. Haddock for \$101,265. It is alleged by the plaintiffs that the de-fendant leased a tract of eleven and one half acres of coal land from the Hughes estate at an annual rental of \$14,000, and that a statement of the amount of coal mined has never been made. The plaintiffs, however, claim that 245,600 tons have been mined from the property. The suit is one of the largest brought before the Luzerne courts in some time and the result of the litigation, says the Record, will be closely followed. L. H. Bennett, D. O. Coughlin and W. S. McLean are the attorneys for the plaintiffs.

A dispatch from Tamaqua says:

'The gold field of Reynolds, near here, reported some time ago, is once more attracting attention and people in this vicinity are anxiously awaiting future developments in the Miller gold mine. The leading scientist of the state have always held that the quartz rock of the Western states was not to be found near our coal deposits and consequently are slow to believe that such is the case. Specimens of this ore have been sent to leading mineralogists and geologists and the rock is pronounced the genuine gold-bearing quartz. Mr. Miller is awaiting returns as to the quantity or per cent, of gold found in a ton of ore, Mr. Miller has had numerous offers for lessing his mine, which erous offers for leasing his mine, which he has declined. He has refused one offer of \$500,000."

MINOR INDUSTRIAL NOTES: James E. Childs has been reappointed general manager of the New York, Ontario and Western.

John H. Williams, of Lee, has accepted the position of inside foreman for the Raub Coal company.

The Southern railway has a mileage of 4.791 miles and its bonded debt is just \$100,000,000 under the reorganization.

It is stated that M. B. Cutter, formerly with the Chesapeake and Ohio Southwest-ern, is to be the successor of G. G. Gram-mar, who goes to the Lake Shore.

Thomas H. Hall has resigned his posi-tion as outside forman at A. S. Van Wickie's Minersville works to accept a position as general agent for the Emmens & Evane Manufacturing company of Phil-

At the meeting of the directors of the Pennsylvania lines in Philadelphia last week the subject of making Saturday a half holiday all the year round, as during the summer months, was discussed, but will not be settled until the next meeting. One of the latest innovations in railroad The Lehigh Valley has had some large gondolas just turned out at the Buffalo shops fitted up with air horse brakes, and is no running them off the Wyoming di-

An attempt is being made to secure con-certed action by the leading western roads looking to the wiping out of the ticket scalping offices. Heretofore it has been impossible to secure united action, and it is feared the present attempt will meet the fate of preceding ones.

On both the St. Louis and the Indianapolis divisions of the Big Four the new fast trains are hauled by the Garstang engines, which have shown themselves capable of hauling four to five cars per train at a speed of sixty to seventy miles an hour without much seeming extra effort.

By a vote of the general passenger agents at their meeting in Quebec all questions of dispute which come up between reads are to be settled by arbitration, the arbitrators to be appointed by the president of the association. It is hoped this method of settling disputes will aid in preventing rate

THE essential lung-healing principal of the pine tree has finally been successfully separated and refined into a perfect cough medicine, Dr. Wood's Norway Pine Syrup. Sold by all dealers on a guarantee of sat-

FINANCIAL AND COMMERCIAL

Stocks and Bonds New York, Oct. 3.—Today's dealings at the Stock exchange aggregated 251,447 shares, of which 138,900 were American Sugar. This is the best analysis of today's stock speculation that can be offered. It was Sugar from start to finish, the other stock speculation that can be offered. It was Sugar from start to fluish, the other prominent issues having been neglected to a subsidiary positition. London was accredited with selling about 30,000 shares of various stocks, of which Louisville and Nashville figured for 5,000 shares. This stock was unfavorably influenced by a forecast of the annual report, but when the statement was published the stock recovered about a point to 54% after selling down 1½ to 54. Rock Island and St. Paul were lower early in the day on the poor exhibits for September sugar, however, was the great feature, the stock falling to 82%, the lowest point yet touched. After this there was a sharp rally and the stock advanced to 86%, fully 30,000 shares of shorts having been covered on the way up. This was followed by a break to 834@8834. Chicago gas advanced to 71%, broke to 69%, owing to the clashing of realizing orders and later recovered to 70%@70. General Electric was weak earlier in the day, but closed unchanged at 37%. The general list left off barely steady. Net losses were 1/2 to 1 per cent.

The range of vesterday sprices for the active stocks of the New York stock market are given below. The quotations are furnished THE TRIBUNE by G. du B. Dimmick, manager of William Line. Allen & Co., stock brokers, 412 Sprice street, Scranton:

GAUTION: To Our Patrons

Washburn-Crosby Co. wish to assure their many patrons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take NO RISKS, and will allow the new wheat fully three months to mature before

This careful attention to every detail of milling has laced Washburn-Crosby Co.'s flour far above all ther brands.
