

ELBERSON WENT INTO POLITICS

The Grocery Business Suffered While the Candidate Hustled for Votes. AND THE BOYS THREW HIM DOWN

The Mournful Tale of the Fate of a Philanthropic Citizen Who Sought to Purify Politics in His District and Found, Too Late, That Ward Workers Are Deceivers, All.

No man in that part of town was more thoroughly respected by his neighbors than Chris Elberson.

He was a good example of the modestly successful business man. His cottage was a cleanly and well kept establishment.

Mr. Maxwell went to look for Chris and found him in Metzger's saloon, pounding the bar with his hat and declaring that the cause of good government would get there, and don't you forget it.

At the convention next day McClintock, the people's choice, was renominated by the house committee on naval affairs.

Mr. Maxwell went to look for Chris and found him in Metzger's saloon, pounding the bar with his hat and declaring that the cause of good government would get there, and don't you forget it.

Chris stood in the doorway and saw it all. A man next to him grinned and said, "They threw me down."

"Can I trust you, Felix?" asked Chris, leading the way back to the desk, so the clerk couldn't overhear anything.

"I don't want it, but a lot of my friends are after me to take it. Some of them must go in and smash that McClintock gang."

Mr. Straub saw it was of no use to argue and so he said he would do all he could.

Scotland Yard has the photographs of some 115,000 criminals taken during the last 30 years. Of these 70,000 are recent.

Taking Treasure from the Sea. A scientist of Christiania proposes to immortalize himself by proving the feasibility of reclaiming the gold and silver in seawater by electrolytic action.

Makes Some Difference. Boston—I didn't meet Jack Goodheart at the restaurant today.

HOWGATE MADE THE WEATHER

His Fickleness, Therefore, Should Not Surprise Any Person.

A MAN OF MAGNIFICENT SCHEMES

The Romantic Story of His Descent from the Head of the Signal Service to a Prison Cell—For Twelve Years a Fugitive—Caught After a Long Chase.

From the head of the signal service to a prison cell; from the first circles of Washington society, with an unsullied name and a brilliant army record, to the felon's dock; traveling in every part of the country with all the "Washington celebrities" but the him for 12 years; six years in business in New York city and actually serving on a jury while a fugitive from justice!

Henry W. Howgate was born in England, and his first enrollment in public service was as a volunteer in 1863 in the Twenty-second Michigan Infantry.

Mr. Maxwell went to look for Chris and found him in Metzger's saloon, pounding the bar with his hat and declaring that the cause of good government would get there, and don't you forget it.

Chris stood in the doorway and saw it all. A man next to him grinned and said, "They threw me down."

"Can I trust you, Felix?" asked Chris, leading the way back to the desk, so the clerk couldn't overhear anything.

"I don't want it, but a lot of my friends are after me to take it. Some of them must go in and smash that McClintock gang."

A WONDERFUL CAT.

She Rode 73 Miles on an Axle Making 780 Revolutions a Minute.

Cats have shown wonderful powers of coming unscathed out of perilous positions if half the stories which have been told are true, and the latest cat story, which comes from England via the New York World, proves no exception to the rule.

The railroad men were puzzled to know how the cat could have retained her hold upon a piece of iron revolving hundreds of times every minute, and the more they discussed it the greater was their astonish-

ment. Finally a Manchester engineer determined to figure out just what that cat's endurance amounted to. He consulted the time table to find the speed of the train and got the dimensions of the car wheels from the railway's officials.

Supposing the wheels to be 3 feet 6 inches in diameter and the distance from the terminals at St. Pancras to Kettering to be 73 miles, he found that the pussy cat must have performed 34,500 revolutions in 1 hour and 27 minutes, which is a job that only a very big, powerful and exceptionally determined ton pound cat could hope to tackle with any hope of success.

Then the engineer had recourse to a diagram of the cat slung to the axle to aid him in his further calculations. Pusey's center of gravity, he figured, would fall about 12 inches from the center of the axle, and at a speed of 90 miles an hour it would reel off the mere battelle of 48 revolutions a minute, the velocity of her center of gravity meanwhile being 90 feet per second.

Everybody wondered where Captain Howgate was when the money was stolen. The answer was soon forthcoming; he was stealing it from the government.

He had become chief of the signal service, and discharging officer of the bureau, lived in tip-top style with his wife and an unmarried daughter, maintained a mistress in luxury, was socially prominent and owned Washington real estate worth at \$125,000. All at once "irregularities"

One morning recently Jack Lansdown of Dyer county, Tenn., picked up a hatchet and started out to the wood pile to cut some kindling. As he stepped from the kitchen door he was surprised to see a large hemlock porcupine climbing a tree about ten feet from the door.

Many stories have been told about this, but the admitted facts are these: In charge of Deputy Marshal Dewing he was permitted to go to his own house to take a bath and secure a change of linen.

Two years and more had passed away when Captain A. M. Drummond of the United States secret service got information which led him to suspect that Captain Howgate was in New York.

PREPARED HIS OWN SEPULCHER

The Nocturnal Amusement of a Recluse Who Was Disappointed in Love.

A MISANTHROPE'S OCCUPATION

Allanson de Witt, Who Lives Near Battle Ground, is an Ardent Proponent of the Suicide Theory—He Has Completed His Own Grave and Has Ordered a Monument Containing a Suitable Inscription in Inspired Verse—The Days of His Youth Was Crossed in Love.

Any night the last week as the moon rose through the tops of the tall and lonely woods about that historic spot known as Battle Ground, the unhappy specter of an aged and bearded figure, spading so-

emly away at the turf beneath the pines, might have been witnessed by the adventurous visitor, writes a Logansport correspondent of the Chicago Times.

For several years Allanson de Witt has lived near Battle Ground in a rude log cabin, unloving and unloved, and has spent his hours of leisure at his desk and books.

When completed, the monument dealer has orders to erect the stone at the head of the newly excavated grave, and what the next chapter in this unnatural tale may be time alone can tell.

He sought to cover up Forgery and Other Crimes by Arson.

The recent indictment and arrest at Memphis of E. M. Weems, a local society leader, prominent in church work and all around good fellow, created a tremendous sensation in that conservative city.

No one had a better social position than Weems. He was cultured, clever, his wife was beautiful, he was fond of society, and his domestic relations were happy.

Views understand the true nature of the stage and of ballet dancing, and so cause them to lose the gross prejudice under which they now labor.

A communion table is, one would imagine, the very last place to carry out a raffle on.

Horse Races in King Solomon's Time. King Solomon was a sportsman, but not a Nimrod.

Bank holidays were first established by statute passed in the year 1871. The holidays were first only intended to relieve banks, but were subsequently extended to customs, inland revenue offices, etc.

THE SCRANTON TRIBUNE—SATURDAY MORNING, OCTOBER 6, 1894.

Long Hair and Genius. Long hair was in vogue among musicians and artists long after it ceased to be worn by the rest of mankind.

The Intense Coldness of Space. We rarely realize, I think, how easily the earth parts with its heat and how cold space is through which the earth sweeps in its orbit.

HE CHAMPIONS THE BALLET. A preacher as a champion of the corps de ballet, of the dancers and the dancing certainly presents an interesting subject for reflection.

DELAWARE AND HUDSON RAILROAD. Commencing Monday, July 23, 1894, the Delaware and Hudson Railroad will operate as follows:

NEW YORK AND ONTARIO WESTERN RAILWAY. Trains will leave Scranton for New York and intermediate points at 2.30, 4.45, 7.00, 9.15 and 11.30 p. m.

DELAWARE AND HUDSON RAILROAD. Commencing Monday, July 23, 1894, the Delaware and Hudson Railroad will operate as follows:
