LABOR WITHOUT EMPLOYMENT

Lumber Camps Are Deserted, Houses Tenantless, Farms Profitless and It is a Condition, Not a Theory, That Confronts the People.

Special to the Scranton Tribune.

Chicago, Nov. 4.—Business may be reviving in the east—especially in the Democratic newspapers—but it is not doing much in that line out west. The Record, of this city, a low tariff paper, recently sent William E. Curtis, its Washington correspondent, on an investigating tour through Oregon, Washington and the other erstwhile boom states of the great northwest. From Portland he writes:

"Oregon feels the effect of the new tariff more than any other state in the union, except it be her younger neighbor, Washington. The removal of the duty upon wool has very nearly ruined hundreds of farmers whose entire wealth was invested in sheep. By placing lumber upon the free list congress has closed nearly every mill in this state, and completely paralyzed the logging industry. By reducing the duty on coal from 75 cents to 40 cents a ton it has been made impossible for the Oregon miners to compete with the British Columbian across the border without a reduction of wages, to which the Miners' union is not willing to submit, and there is no compensation in sight for any of these interests.

"Most of the use of lumber and coal out in this country represents labor, and both in the mining and lumber camps high wages have been paid—from \$2.50 a day for the ordinary laborer to \$3.50 and \$4 for the skilled mechanic—and the rules of the union were rigidly enforced. Over the border in British Columbia Chinamen are almost exclusively employed, and they never get more than \$1 a day, while thousands are paid but 60 and 75 cents. This difference was sufficiently covered by the McKinley law to enable the Oregon lumbermen and coal miners to hold their trade and to ship considerable to Asia, South America and the South sea islands. But now you can buy any amount of Canadian lumber and coal in Portland and every other town on the coast for less money than the domestic product costs.

Wilsonism Refuted. "The best lumber used to go into the export trade; the poorer grades were held for the local market. Now the consumer can buy the best grades of Canadian pine and fir cheaper than the lowest grades of the domestic products used to cost him. According to Professor Wilson's theory, this ought to be gratifying to the consumer, but as a hard, inexorable fact, it isn't. A large proportion of the population of Oregon was engaged in the logging camps and the saw-mills. Since the passage of the tariff bill 90 per cent. of them are out of employment. The mills are running only to furnish lumber and timber of extra and special dimensions to fill some unusual orders. Therefore the consumer of lumber, who is a producer of something else, has no market for his goods. It is a very practical and tangible lesson in political economy; and if Professor Wilson could visit Oregon a great many consumers of lumber, wool and coal would take the liberty to teach it to him. The same is true of coal, even with a 40-cent duty. Cheap Chinese labor enables the Canadian miner to undersell his rival in the United States ever at the mouth of the latter's mine.

"The price of labor has got to come down. Not only in the lumber camps and coal mines, but in the wheat fields and on the sheep and cattle ranches. It is impossible for the labor unions to prevent it, unless the duties upon wool, coal and lumber are restored. Many workmen who have laid by something during their prosperous years are leaving this section for California and other places. Some are going east to their former homes in the hope of finding something to do, for they cannot get work at their old wages out here, and the union will not allow them to accept any less. Hundreds of houses have been abandoned, without any attempt to rent them or to sell their contents, because there is no demand. So they simply let the fire go out in the kitchen stove, tie old newspapers over the furniture, board up the windows and doors and have the neighbors look after things as long as they stay.

"Plenty of houses can be had rent free by honest tenants who will be sure to take good care of them, because the insurance companies cancel their risks upon unoccupied dwellings; and tramps were never so numerous as they are now. It is really distressing to see the empty shops and stores and houses in what were two years ago the most prosperous and promising towns in the country. The boom has collapsed. Town lots are worthless; 10 and 12 per cent. mortgages are offered upon the best property in Tacoma, Seattle and other new cities without tempting any investor; and nearly everybody who owes money has defaulted his interest, not from inclination, but because it is impossible for him to pay.

Democrats Are Scarce. "That is one reason why you can't find any Democrats in this part of the country this season. There are plenty of Populists and Republicans, but the Democratic party is practically obsolete west of the Missouri river, owing to the silver legislation of congress and the tariff bill. And it is equally difficult to find any Democratic newspapers. I saw a copy of a straight-out Democratic paper in these districts in these times, and we have reluctantly been compelled to shut up shop for lack of patronage. Our plant has been sold to a hated rival and a putrid reminiscence of Republicanism across the river; and the faithful old type that have whooped it up so long for fat old Grover, the stuffed prophet and

The attention of the proper authorities should be called to the deplorable condition of High street. Since the Water company have placed the main pipe through that street, a large ridge of earth extends the whole length of the street, and after every rain great puddles of water will collect in the street and, owing to the darkness of that street in the night, makes it a very disagreeable one for travel.

Miss Cora Ellis, of Waymart, was a Carbondale visitor on Saturday.

The proprietor of the confectionary and eating store, corner of Salem avenue and Church street, has discontinued business.

How Mrs. Reese Became a Convert Her Arm Was Useless, and Could Not Be Moved Without Pain—How She Was Cured.

Mrs. John Reese, South Pottstown, Pa., says: "It is now about a year since I was cured of one of the worst attacks of rheumatism I ever had. I had tried all kinds of remedies and had several doctors, but nothing did me any good; so I concluded to try Munyon's Remedies. I never had any faith in homeopathy; I confess now I am a firm believer in it. After taking the Rheumatism remedy a few days I was able to raise my arm, which I had not moved for two weeks, without the most intense torture. Within a short time I was completely cured, and it was permanent, for during the past year I have not had the slightest return of the disease."
