

Industrial and Commercial.

MINE, MILL AND RAILROAD.

The Lehigh Navigation company has reduced its dividend to 2 per cent. for the half-year, or \$1 per share, giving as an excuse therefor that the demoralization now existing in the anthracite trade had induced a conservative desire to husband resources. It was thought that the reduction in the Lehigh Navigation company's rate of dividend had a great deal to do with the recent decline in Jersey Central. The reduced rate was not expected, and it did cause some small sales of the stock at a reduction. It is a reduction of one-half per cent. from the dividend of last May and a decrease of 1 per cent. from the dividend of one year ago. The present reduction is due to the depression of the coal trade. The dividend declared makes the rate of the year 4 1/2 per cent., compared with 5 per cent. in 1893, 5 1/2 per cent. in 1892 and 5 per cent. each in 1891, 1890 and 1889. The dividends previously declared have been as follows: 1881, 2 per cent.; 1882, 4 per cent.; 1883, 5 1/2 per cent.; 1884, 4 1/2 per cent.; 1885, 5 1/2 per cent.; 1886, 4 1/2 per cent.; 1887, 4 per cent.; 1888, 4 1/2 per cent.

Assistant Postmaster General Nelson has been investigating the subject of special mail service with reference to long electric lines, and has expressed the opinion such roads can be profitably utilized for carrying mail in between local points. This business has always been considered the prerogative of steam railroads, yet number of trolley roads are already engaged in carrying mails, and in some cases, special electric mail cars have been used in which the work of distributing and cancelling is carried on in the same way as in the cars on steam roads. Another direction in which electric car lines threaten to cut into the income of steam roads which they parallel, says the Post-Express, is in carrying freight and doing a regular express business along their lines. This has been undertaken by quite a number of roads and has already met with considerable success. Some of the companies have gone into the business extensively enough to require special cars for this service and such cars will probably be required in most cases where freight and merchandise of all kinds are handled. Wherever this has been tried it has been well patronized, especially on suburban lines and outlying places which have been built up by the trolley roads. The delivery of bundles of freight in such districts tends to popularize the trolley with suburban patrons and draws correspondingly from the traffic of steam roads. Such an express or freight service is also in general far more convenient than that of the steam car. It is very obvious that in some respects electric railways have advantages which make them preferable to steam roads with the public for local travel. The chief of these is perhaps the fact of their taking on and letting off passengers at any point on the route instead of confining them to the use of two terminal stations as in the case of steam lines. From the experience already gained by the steam railroad companies in the loss of local traffic, it is apparent that electric roads are sure to ultimately provide for this travel where it is reasonably heavy, and the question remains then now whether to provide electric traction for this purpose or to allow their income from this source to be diverted into the pockets of other companies.

MINOR INDUSTRIAL NOTES:

The Carnegie mill at Homestead resumed Monday on double turn. The Ohio Southern earned in October \$8,522, an increase in gross earnings over October, last year, of \$22,091. In the ten months ending Oct. 31 the Pennsylvania lines have handled 12,993,450 tons of coal and coke, a decrease of 2,193,459 tons as compared with the same period of 1893. Says the Indianapolis Journal: "Through car" service between the Nickel Plate and the Delaware, Lackawanna and Western has been abandoned. It had not been profitable, and the contract was opposed by the other Vanderbilt lines."

STOCKS AND BONDS.

By the United Press. New York, Nov. 7.—The stock market opened with a boom in prices. Sugar led the list, selling at 89 1/2 and 90 against 87 1/2 Monday. The defeat of the Populists in the west was used as a bull argument and led to purchases. It was also generally admitted that the change in congress means commercial peace for some time to come, and this together with the comparative weakness of sterling exchange had much to do with

EVERYTHING SEEMS WRONG

to the dyspeptic. The world is upside down; the times are out of joint, he's ready to turn his back upon his best friend.

Now, the thing that oftenest is wrong with dyspeptics, is their choice of a remedy. There are drugs and medicines on the one hand—the Carlsbad Sprudel on the other. They can't both be right; there's too much difference in their methods and in their results.

Carlsbad—the waters at the Sprudel Spring at Carlsbad have been curing dyspeptics for hundreds of years. Curing them. No remedy in the world has been so thoroughly tried and proved, in all digestive disorders, stomach troubles, lack of appetite, or perverted nutrition. Add a little of the genuine Carlsbad Sprudel Salt to the first tumbler of the water, if you desire to increase its purgative action. Do not be imposed upon by unscrupulous dealers who will sell you a mixture of Seidlitz Powder or Glauber Salt as "Improved Carlsbad Salt" or "Artificial Carlsbad Salt," "German Salt," or other names. Insist upon the genuine article, which must have the signature of "Eisner & Mendelson Co., Sole Agents, New York," on every bottle.

AN INDIANA TERROR DEAD

He Was a Rattlesnake and a Veritable Giant.

OVER TWENTY-TWO FEET LONG

Although an Immense Specimen, Was Notorious for His Cowardice, and This Fact Probably Preserved His Life for Many Long Years.

A dispatch from Synderston, Ind., to the Commercial Advertiser, gives the following account of the death of a serpent of such size: It is announced by John Noland, one of the best known farmers in the county, that the famous snake, the Madison county terror, that is known over eastern Indiana, is dead, or at least there is evidence to substantiate such an assertion. It will be remembered that several weeks ago a Lafayette township farmer who was cutting his hay, ran into his snakeship with his mower, and the result was that six feet of tail parted company with the terror. Several farmers were summoned and the rest of the field cut, but despite all precautions, his snakeship made good his escape.

CHICAGO BOARD OF TRADE PRICES.

Table with columns for WHEAT, OATS, CORN, LARD, and PORK, listing prices for various months and grades.
