The election was conducted as nearly as possible according to the Baker ballot law, and all who participated received much practical of this law. The result showed that the Republican avalanche has even reached those who are Juniors in the sight of the law. Out of forty-four votes cast for governor, seven were for Hawley (Pro.), ten for Slingerly (Dem.), and seventeen for Hastings (Rep.). With but one exception every student voted a straight ticket.

Examinations are the order of the week.

DURYEA.

Never in the history of Marcy township was there so much enthusiasm displayed with regard to the borough government as there was at the citizens' mass meeting at First-st. hall on Thursday evening. The people of Duryea begin to realize that they are practically speaking without any government whatever, and that the time has come when something must be done. Several meetings have been held in different parts of the town during the past month in order that every citizen and property owner might have an opportunity to express his opinion on the matter; and it is evident from the interest manifested that the sentiment of the people is in favor of being incorporated into a borough. The following committee was appointed: Chairman, J. J. Sampson, E. E. Dills, William Lung, John Ward, Squire Gilroy, Squire Motiski, Michael Kelly, James Flynn and Captain J. W. Burns. These gentlemen will meet at the office of Squire Gilroy on Thursday evening, Nov. 15, at 8 o'clock, to decide upon what course to pursue and to make all other necessary arrangements pertaining to the proposed new borough.

WOMEN ALWAYS TIRED

Mrs. Henry Ward Beecher Says She Has Known

But Half a Dozen Women Who Were Thoroughly Well.

The Routine of Domestic Tasks Over-drains Their Nervous Force.

"Among all my friends--and the number of my acquaintances has necessarily rather large," says Mrs. Henry Ward Beecher, "I can recall but half a dozen thoroughly well women."

So many, in order to obtain the reputation of being good housewives, work from morning till night, cooking, sweeping and ironing.

"What would the house look like," they ask, "if I were not constantly looking after it?"

It would certainly look a good deal more homelike if the wife and the mother kept her health and high spirits instead of growing old and careworn from the struggle with dust and the neglect of their tired, aching nerves, and pale watery blood that daily becomes more and more badly nourished.

It is not the healthy weariness of muscle and brain, so easily forgotten after a good night's sleep; but it is the weariness that remains till morning, and follows one through the day, that

MRS. E. L. WING.

should cause anxiety and a desire for prompt relief.

When the nerves and the blood have thus become so badly nourished and the strength thus reduced, food--food appropriate for building up the nervous tissue--and rest, are the plain and simple means, in fact, the only means of restoring vigor and health. All the material so urgently needed by the million of exhausted nerve cells and by the thin, depleted blood are found in that remarkable invigorator, that food for the brain and nerves, Paine's celery compound. It fills the nervous and muscular tissues all over the body with the means of rapid growth, the blood gains new red corpuscles and grows ruddy and capable of thoroughly feeding the body. The strength returns, and headache, dyspepsia, neuralgia and nervous debility disappear when the tone of the system has been thus raised and the body abundantly supplied with fresh, life-giving blood.

The very first week in which this perfect nerve food, Paine's celery compound, is conscientiously employed it will do for its tonic effect by the feeling of returning strength, a marked increase in the appetite, freedom from pain and depression.

Paine's celery compound cures radically and permanently rheumatism, heart weakness, diseases of the liver and the kidneys, and encourages the excretory organs to expel whatever impure humors there may be in the blood. This is evident by the healthier, clearer condition of the skin that physicians say invariably follows when they prescribe Paine's celery compound, as they so commonly do when the body needs building up and when recovery is slow after acute diseases.

Here is the experience of Mrs. E. L. Wing, of Putney, Vt., told in her own words:

"I had been afflicted with rheumatism and neuralgia for many years. In a year and a half I have taken eight bottles of Paine's celery compound and have not been so free from these troubles in fifteen years as I am now. I advise all who are afflicted in any way

with rheumatism or neuralgia to use Paine's celery compound.

"For the nerves and tired feelings, I think it is the best dose of ambition that I have ever found. Before I had taken one bottle I felt almost like another person. Other medicines have given me only temporary relief. But the compound has done me more permanent good than the doctors or any other medicine, and I can hardly feel grateful enough for the benefit that I have derived from its use."
