

IN THE WORLD OF SOCIETY

Winter Doings Among Prominent Leaders of the Season's Gayety.

PARTIES, WEDDINGS AND TEAS

The Gamut of the Week's Events Sound in Short Paragraphs--Guests and Entertainers--Personal Mention Reduced to a Compact Compass.

The Bachelors' ball has always been considered one of the chief social events of the year, and a large element is now anticipating the Bachelors' ball of New Year's eve in the Frothingham theater, when the old year will be danced out and the new year danced in.

IN LOCAL THEATERS.

When William Collier presented "Hoss and Hoss," he was always sure of crowded houses. But Mr. Collier is to be seen in legitimate comedy, and his friends were constantly insisting that he was capable of something higher and better.

At Davies' theater next week Joseph D. Clifton and Miss June Agnost, supported by a fine company, will present Mr. Clifton's charming comedy drama, "Ranch King."

The most striking characteristic in Joseph Arthur's remarkably successful play of "Blue Jeans," which will be seen at the Academy of Music Monday night, are its wealth of picturesque pastoral scenes.

On Monday and Tuesday evenings at the Frothingham a notable production will be "A Trip to Turkey," by John W. Kelly, music composed by Isidore Luckstone, and ballet arranged by H. Fletcher Rivers.

On Monday and Tuesday evenings at the Frothingham a notable production will be "A Trip to Turkey," by John W. Kelly, music composed by Isidore Luckstone, and ballet arranged by H. Fletcher Rivers.

At the Academy of Music on Tuesday next Richard Mansfield and his excellent stock company will appear in his famous characterization of Beau Brummell.

On Wednesday evening at the Academy of Music the favorite actor, James O'Neill, will be seen in a production of "Virginius," his latest success.

It has been definitely settled between Manager Burgunder and Arthur Rehan that Augustin Daly's company will appear next Friday evening at the Academy of Music.

Y. W. C. A. NOTES.

Sunday at 3.45 p. m. an interesting service for young women will be held at the rooms, 305 Washington avenue.

On Tuesday evening, Dec. 11, from 8 to 9 o'clock, a thanksgiving will be given by the invitation committee.

Misses Morris and Jenkins, the Spruce street milliners, have been secured as teachers of the Thursday evening millinery class, which now has twenty members.

The Pains of Rheumatism, According to the best authorities, originate in a morbid condition of the blood. Lactic acid, caused by the decomposition of the gelatinous and albuminous tissues, circulates with the blood and attacks the fibrous tissues, particularly in the joints, and thus causes the local manifestations of the disease.

Music Boxes Exclusively. Best made. Play any desired number of tunes. Gausch & Sons, manufacturers, 1020 Chestnut street, Philadelphia.

SCRANTON DID NOT SCORE

Fig Skin Pushers from the University Too Much for Us.

GELBERT'S GREAT PLAYING

He Did Some Brilliant Work for the Varsity Team--Only Five of the Regulars Came--Details of the Contest.

Five members of the regular University of Pennsylvania Foot Ball team and six substitutes defeated with ease Scranton's eleven at the ball park yesterday afternoon.

The grounds were very muddy, which interfered with running and brilliant playing and also prevented accidents. The injuries sustained by the players were slight.

Scranton was given the choice of goals and selected the one at the southern end of the field.

Worth made the third touchdown for Pennsylvania after eighteen minutes play. Alken kicked the goal making the score 16 to 9.

In the second half Decker kicked the ball, Alken sent it back into Scranton territory and Charles Gelbert got it at the twenty-five yard line and despite the efforts of the Scranton tackles made a touchdown.

After that Scranton made a more determined fight and the work of Decker, Conery, Thayer, Walsh and Dan Gelbert prevented the Pennsylvania boys from getting another touchdown until the end of the second half was close at hand.

The Scranton's played a good game but were, of course, greatly outclassed in team work and interference. Bull, Alken, O. Wagonhurst, Woodruff, Worth, Williams and Charles Gelbert did splendid work for Pennsylvania.

Never before in the history of Scranton has such marvelous cures been made as is now being done by Dr. Anderson's eminent physicians at the Westminster hotel--who have been healing the sick and crippled at Music Hall.

These physicians have many strange experiences at their offices--which are nearly always thronged with anxious seekers after health.

It was the world-famed discovery of Prof. Phelps of an infallible cure for those fearful ills that result from an impaired nervous system and impure blood which has endeared the great doctor to the world, and made his life an era in the practice of medicine.

DUNMORE DOINGS.

J. P. Moore, of Jefferson, is in town. J. E. Swift is in New York city buying holiday goods.

Frank Debow is quite ill at his home on Grove street.

The Gypsy Grove coal washer started operations yesterday.

John Walsh has moved into his new home on Brook street.

The usual Sunday services will be held in the Presbyterian and Miss Blanch Bloes are in New York city.

Frank Bickens is confined to his home on Chestnut street by illness.

Leave news items for the Scranton Tribune at Harvey Jones' milk depot.

Mr. Henry Allen, a gentleman of over 70 years, who had been deaf for a long time, has had his hearing restored so that he can now hear the ticking of his watch.

THE GREATEST MODERN PHYSICIAN.

To Whom Thousands of Men and Women and Children Everywhere Owe Their Life and Happiness Today.

His Reputation Has Made Dartmouth College Famous in Every Town and Village in the Country--Professor Edward E. Phelps, M. D. LL. D., Who First Gave to His Profession Paine's Celery Compound, the Wonderful Remedy That Makes People Well

PROF. EDWARD E. PHELPS, M. D., LL. D.

"Excepting his handful of magnificent statesmen and his military heroes," says the most recent writer upon America, the people owe more to Dartmouth's physician-teacher than to any one man.

In every walk of life, among the highest officeholders at Washington, in the homes of the best people of the large cities, among the everyday folks of the country, families in comfortable circumstances, families that "live from hand to mouth" and could not, if they wished, afford the services of any but an ordinary physician--everywhere I have met people to whom Paine's celery compound has been a blessing."

The story of the life-work of this giant among men has been often told and is familiar to most readers. The likeness above is probably the best portrait of him yet printed.

It was the world-famed discovery of Prof. Phelps of an infallible cure for those fearful ills that result from an impaired nervous system and impure blood which has endeared the great doctor to the world, and made his life an era in the practice of medicine.

Prof. Phelps was born in Connecticut and graduated from the military school at Norwich, Vt. He studied medicine with Prof. Nathan Smith, of New Haven, Conn., and graduated in medicine at Yale.

His unusual talent soon brought him

reputation and prominence among his professional brethren. First he was elected to the professorship of anatomy and surgery in the Vermont university.

Next he was appointed lecturer on materia medica and medical botany in Dartmouth college. The next year he was chosen professor of the chair then vacated by Prof. Robby, and occupied the chair, the most important one in the country, at the time when he first formulated his most remarkable prescription.

In view of the overwhelming testimony to the value of Paine's celery compound that has recently appeared from men of national reputation, the picture of Prof. Phelps is particularly interesting.

New York's state treasurer, Hon. Addison B. Colvin.

Ex-Minister to Austria, John M. Francis.

Miss Jeuness Miller.

President Cook of the national teachers' association.

Hon. David P. Toomey, the publisher of Donahoe's magazine.

Gen. John A. Halderman of New York city.

Hon. John G. Carlisle's private secretary.

The popular and talented actress, Marie Tempest; the poet author, Albert H. Hardy; the mayor of Montreal, brave Ida Lewis and a host more of prominent

men and women are among the thousands of grateful people who have recently sent to the proprietors of this wonderful remedy their expressions of its unequalled value--men and women who can well afford, and do command the highest medical advice in the country.

And then also from "the plain people" there come thousands of honest, straight-forward, heart-felt letters, telling how Paine's celery compound has made them well.

Their testimony simply goes to show what New England's vigorous essayist has so aptly said, that Paine's celery compound is not an apocryphal medicine; it is not a sarsaparilla; it is not a mere tonic; it is not an ordinary nerve--it is as far beyond them all as the diamond is superior to cheap glass.

It makes people well. It is the one true specific recognized and prescribed today by eminent practitioners for diseases arising from a debilitated nervous system.

Prof. Phelps gave to his profession a positive cure for sleeplessness, wasting strength, dyspepsia, biliousness, liver complaint, neuralgia, rheumatism, all nervous diseases and kidney troubles. For all such complaints Paine's celery compound has succeeded again and again where everything else has failed.

It is as harmless as it is good, and it was the universal advice of the medical

profession that the compound be placed where the general public could secure it, and thousands of people have every year proven the wisdom of this good advice.

Only a truly great and effective remedy could continue, as Paine's celery compound has done, to hold its high place in the estimation of the ablest physicians and of the thousands of busy men and women whose only means of judging is from the actual results in their own homes or among their friends.

Now, remedy was ever so highly recommended, because none ever accomplished so much.

Today Paine's celery compound stands without an equal for feeding exhausted nerves and building up the strength of the body. It cures radically and permanently. The nervous prostration and general debility from which thousands of women suffer so long that it finally gets to be a second nature with them--all this suffering and despondency can be very soon removed by properly feeding the nerves and replacing the unhealthy blood by a fresher, more highly vitalized fluid.

A healthy increase in appetite and a corresponding gain in weight and good spirits follow the use of Paine's celery compound.

Paine's celery compound is the most remarkable medical achievement of this last half of the nineteenth century.

OUR NATIVE HERBS

The Great Blood Purifier and Liver Regulator.

200 DAYS' TREATMENT, \$1.00

COMPOSED OF

HERBS, BARKS, ROOTS

And will positively cure all diseases arising from IMPURE BLOOD, SUCH AS

Rheumatism, Kidney Disorder, Liver Complaint, Sick and Nervous Headache, Neuralgia, Dyspepsia, Fever and Ague, Scrofula, Female Complaints, Erysipelas, Nervous Affections, Catarrh, and all Syphilitic Diseases.
