Pittsboro, Jan. 18.—"The White Squadron" was witnessed by a much interested and enthusiastic crowd of spectators last evening. INDUSTRIAL TOPICS.

Philadelphia Stockholder: "Shipments of anthracite coal last season were slightly above the average, and, if continued during the remainder of the month, will exceed the agreed output by over 500,000 tons. The total for the week was 719,550 tons, an increase compared with the corresponding week last year of 29,000 tons, due entirely to an increase from the Wyoming region, the Lackawanna and Schuylkill regions both reporting decreases. The week's shipments added to those previously reported bring the total for the year up to 1,140,224 tons, an average, including Sundays, of 35,609 tons per day. If, as expected, the output continues at the rate of the month, January's shipments will reach a total of, say, 2,000,000 tons, against an agreed output of about 2,200,000 tons. The market is in no condition to absorb so much coal, and efforts should at once be made to reduce the output, lest the price be driven back into its recent state of demoralization."
