MOCK POLITICAL CONVENTION

It Will Be Held by Membars of the Hyde Park Literary and Debating Society. Programme to Be Observed at Washburn Street Church.

The attendance at the meeting of the Hyde Park Literary and Debating society last evening was not a large one. but neverytheless the evening spent in interesting debate. David J. Davies presided. After the business meeting, W. A. Price read an essay on "Wales and Its People," which showed much careful thought and study

The debate, "Resolved, That there is need of a third party in American poliwas postponed. At the last meeting the society sent a challenge to the Young People's Literary society of First Welsh Baptist church to debate for the Browning cup, which the latter now holds, but as their members did not get together on Friday evening, the challenge was not answered. By the unanimous vote of the members was decided to hold a public mock political convention on March 6. Daniel Thomas, Evan G. Jones and John Thomas were proposed as members. The remainder of the evening was devoted to the question box, and many interesting topics were discussed.

DUNMORE ROBBERY RECALLED

Hollister Was at Liberty While His Case Was Pending in the Supreme Court and Steps Have Now Been Taken to Secure His Recommitment.

A legal question was raised in court yesterday which involves the liberty of one recently released from the penitentiary and recalls the daring robbery of the Spencers' pay office, in Dunmore in the spring of 1892. Herschell H. Hol lister, through the "peaching" of a companion named Snow, was convicted of the robbery and now, after serving a term in the penitentiary, is liable to be returned to further confinement for the

original crime. On May 1, 1892, Hollister was found guilty and an application for a new trial was refused. On May 9 he was sentenced by Judge Archbald to pay a fine of \$500 and undergo three years' confinement in the penitentiary. Early in the following month the case was taken to the supreme court and he was placed under \$2,500 ball pending a de-

Hollister, meanwhile, had been one year and three months at liberty, but in accordance with the supreme court's decision was imprisoned and on Jan. 9 last, was discharged.

District Attorney Jones yesterday asked court for a rule to show cause why a capias should not be issued to re-commit Hollister to the penitentiary for one year, three months and twenty Archbald granted the rule and made it returnable to argument court.

### SCIENCE NOTES.

From the Philadelphia Record. It is well known that lime water has beneficial effect on the growth of chil-dren, and in countries where the drinking water is impregnated with salts of lime the men are apt to be tall. An English medical authority states that, for a per fect sanitary diet, alkaline water is needed for every person who eats heavily of meat and this means nearly every one, except

To the exclusive use of white bread attributed the prevailing decay of the teeth. As flourine is necessary to good teeth, and as this is a characteristic component of the wheat discarded in making white flour, a noted scientist sees no hope in the way of good teeth for future generations except by a return to the general consumption of bread made from whole-wheat flour.

At one of the experimental agricultural colleges in Germany the remarkable yield of forty-two tons of potatoes per acre has een obtained by treating the seed tubers with sulphate of ammonta. The potatoes were steeped for twenty-four hours in a solution of six pounds of saltpetre, six pounds of sulphate of ammonia and twenty-five gallons of water, and afterwards allowed to stand and drain for a day, in order that their buds might swell before planting them.

Continental municipalities are far in advance of American cities in the matter of public sanitary works, and especially in the disposal of sewage. Paris is now carrying out a scheme to abandon the present policy of polluting the Seine with sewage, and divert the material to extensive farms that have been established on the out-skirts of the city. The success of the Ber-lin sewage farms has done much to show the value of this scientific method of handling the waste products of large com-munities. All the houses of Berlin, with the exception of a few in the thiniysettled outskirts, are connected with the new drainage works, which are carrying annually from 70,000,000 to \$0,000,000 cubic yards of sewage to be scientifically irri-gated over the surface of municipal farms having an aggregated extent of more than 20,000 acres, or upwards of thirty
