POLITICAL SITUATION

Prospects for a Non; Partisan Election Horse Owner Will Bring Suit Against the Bridge Company-Fire on Main Street.

Special to the Scranton Tribune. Pittston, Pa., Feb. 5.-Our comian election promises to be one of hottest and most interesting ever held in our town. The delegates of each party have placed on their respective tickets men who are held in high esteem by their friends and associates, and who are worthy of the support of voters of this city. This campaign should be of a non-partisan type, each citizen as-certaining who is the best qualified man to fill each important office of trust. It is essential to the growth of our new city that we use much discretion in casting each vote for men who will look after the welfare of our new municipality and who have already proved their worth by the effort and tireless persistency in which they overcame all the difficulties which pre-bented themselves in our change of government from a borough, with its disadvantages, to a city, with advan-tages which only the older and wiser heads could discern. For the office of mayor, the candidate of the Citizen's party is Thomas Maloney, who has already proved his proficiency as chief magistrate of the borough and who is a man of marked ability, possessing all the qualifications necessary to the mayoralty of our young city. The Re-publican candidate is Dr. Charles J. Barrett. But the office of mayor is not the only office to be filled with worthy men. The office of controller is also an important office, and care should be taken in electing a man to that office who is well qualified and worthy of such an important position. Benjamin J. Harding, who is a candidate for the office of controller, is a gentleman who has fathered the reform movement and has all the requisite qualifications of a straightforward and efficient public servant. With Maloney as mayor-and his election is doubted by few-and Harding controller, assisted by a competent corps of men in our councils and

STOCKS AND BONDS.

New York, Feb. 5.—The delay in announcing the completion of the negotiations for the sale of a block of new bonds by the government operated against the stock market again today. There was no pronounced pressure to sell, however, and the decline which took place during the early hours of 14 to 214 per cent. was due to the desire on the part of the trades to accept profits as well as to reduce their lines so as to be in shape to take advantage of new developments at Washington. There was also a tendency to restrict operations until the house disposed of the saine, excepting so much thereof as he conveyed in his lifetime to Sanuel D. Overproduction is affecting prices of coal at tidewater. The circular price for stove coal is \$5.75 gross, or \$3.60 net. The net

price is usually made to middlemen and large dealers. Of late a net price has been quoted to all classes who buy in quantity and whose credit is fair. Recently the

surplus stocks caused the price to sell off until coal touched \$3.5 for stove. Pro-

According to figures compiled by the Railway Age, gross earnings of American roads for 1894, as compared with those of

1893, decreased by \$125,000,000. This amount

is partly estimated. It is based on the complete reports of 150 roads, which showed a decrease of \$100,338,694. The ex-

act earings of these 150 roads were \$773, 282,282, compared with 0873,639,976 for 1893

The largest decrease was on the entire

Pennsylvania system, the amount being nealy \$13,000,000. A peculiar feature of the

report is that every Mexican road shows

week in accordance with the resolution passed at the annual meeting to economize

as much as possible about the mines. It is said that there will be one superintend-ent for the entire system and a number

if division superintendents and bosses will be dropped. There will also be a number of changes on the railroad. Passes of many physicians and lawyers are to be

taken up and Alonzo P. Blakeslee will have an increase of power, and some me-chanics and foremen are to be discharged.

TO OUR PATRONS:

Washburn-Crosby Co. wish to assure their many patrons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop os fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take no risks, and will allow the new wheat fully three months to mature before grinding.

This careful attention to every detail of milling has

placed Washburn-Crosby Co.'s flour far above other
