That veteran project, the building of the Williamsport and Binghamton railroad, via Wyalusing, is again being revived by the newspapers up north, but has no terror for people down this way.

The road has been built on paper too many times to awaken interest any more. When built at all it is quite as likely to come by the way of Tunkhannock as any other route, and even that is as uncertain as the Delaware peach crop.

The Susquehanna river is blocked with ice nearly the entire distance from Wilkes-Barre to Binghamton. After the breaking of several weeks ago no further danger from that source was feared, but the continued cold weather seized the cakes of ice that came floating down and has united them together, making a heavier and much more dangerous mass than plain, smooth ice, because of its enormous bulk.

These are the heaviest items, and when the improvements to public buildings and grounds, the cost of court trials and the hundred and one other things are taken into consideration it is no wonder the amount is as large as it is. Cured of Catarrh

Feels Like A New Woman Since Taking Hood's Indigestion and Sick Headaches Also Relieved.

"C. I. Hood & Co., Lowell, Mass.: 'I have been taking Hood's Sarsaparilla since last December for indigestion, catarrh and sick headache, and it has made me feel like a new woman. When I commenced taking it I did not have any appetite and for years I had to be very careful of my diet. Now I can eat any kind of food without any distress afterwards. I had a severe case of catarrh, and this with my indigestion brought on frequent attacks of sick headache. They bothered me very much. But since taking several bottles of Hood's Sarsaparilla all is changed.

It has cured me of catarrh and my other troubles. I hope every one similarly afflicted will try Hood's Sarsaparilla and be convinced of its merit." MISS ELLA JOHNSON, 1215 Alder Street, Philadelphia, Penn.

IS IT THE END?

A Time of Great Mortality.

Especially Noticeable in Children.--Will Man Cease to Exist?--Can the "Omega" be Averted?

Why is it, with our improved sanitary appliances, our care to obtain fresh air, pure food, and plenty of exercise, the observance, in fact, of every hygienic law, that in spite of every care each succeeding generation seems to become weaker and shorter lived? Is it that we are now suffering for indiscretions of our ancestors, or is that terrible, unknown end of man at hand?

Whatever the cause, the existing condition of things is too apparent. Especially is this noticeable with the babies. Instead of the mother's life-giving milk, they are compelled to begin a struggle for existence with the bottle. The result in many cases is disastrous. The little one, failing to obtain necessary nourishment, grows weaker daily, until death ends the struggle. The end in these cases is

Simply Starvation. With this termination so often the case, the best physicians of the day have resorted to the use of Bovinine, that great and original raw food product, as a means to save the babies.

In this connection Dr. A. B. Robinson, 61 Dudley St., Boston, after commending Bovinine most highly for various complications where the waste of disease must be checked, and new blood, flesh, and strength created to effect a cure, says concerning this life-creating preparation, "With feeble, bottle-fed babies, a small amount added to the milk has in my practice saved many children."

Bovinine is not a medicine, but a life-maintaining, flesh, bone, and blood-making preparation that contains the greatest amount of nourishment in the least possible bulk.

Give it to the little ones while there is still hope. Your physician, if you ask him, will recommend it, and you will bless the results obtained forever.
