MR. CLEVELAND'S MESSAGE when the 20-foot channel between the great takes shall have been completed, it will carry easily 6,000 tons. The vessel will have no spars at

Arrangements for the Issue of 30-Year Bonds Announced.

TO STRENGTHEN THE RESERVE

The Bonds Will Bear Interest at the Rate of Four Per Cent. Per Annum. Details for Floating the Bonds Perfected.

By the United Press.

Washington, Feb. 8.-Mr. Springer, (Dem., Ill.), stated on the floor of the house, at noon today, that the president would today send to congress a message stating his purpose to sell additional bonds to replenish the gold reserve, and outlining his future finan-

The President's Message. The president sent the following mesmage to congress at noon today:

To the Congress of the United States: Since my recent communication to the congress calling attention to our financial condition, and suggesting legislation which I deemed essential to our national welfare and credit, the anxiety and apprehension then existing in business circles have con-

As a precaution, therefore, against the failure of timely legislative aid through congressional action, cautious preparations have been pending to employ to the best possible advantage, in default of better means, such executive authority as may without additional legislation, be ex-ercised for the purpose of reinforcing and maintaining in our treasury an adequate and safe gold reserve.

Executive Action Taken.
In the judgment of those especially charged with this responsibility the situation is so critical and the legislation is so unpromising with the omission thus far on the part of the congress to beneficially enlarge the powers of the secretary of the treasury in the premises as to enjoin im-mediate executive action with the facilities now at hand.

Therefore, in pursuance of section 3,700 of the revised statutes, the details of an arrangement have this day been con-cluded with parties abundantly able to fulfill their undertaking whereby bonds of the United States authorized under the act of July 14, 1875, payable in coin thirty years after their date with interest at the rate of 4 percent, per annum to the amount of a little less than \$52,900,000 be issued for purchase of gold coin amounting to a sum slightly in excess of \$55,000,000, to be delivered to the treasury of the United States, which sum, added to the gold now in our reserve will so restore such reserve as to make our amount \$100,000,000. Such a to make our amount \$10,000.000. Such a premium will be allowed the government upon the bonds as to fix the rate of interest upon the amount of gold realized at \$\frac{3}{2}\$ per cent, per annum. At least one-half of the gold to be obtained is to be supplied from abroad, which is a very important and favorable feature of the transaction. The privilege is especially reserved to the government to substitute at par within ten days from this date in lieu of within ten days from this date in lieu of the 4 per ctn. bonds, other bonds in terms payable in gold and bearing only 3 per cent, interest if the issue of the same should in the meantime be authorized by the congress. The arrangement thus com-leted, which after careful inquiry anpleted, which after careful inquiry ap-pears in present circumstances and con-sidering all the objects desired, to be the best attainable, develops such a difference in the estimation of investors between bonds made payable in gold and those spe-cifically made payable in gold in favor of the latter as is represented by threethe latter as is represented by three-fourth of a cent in annual interest. The exceement just concluded the annual sav-ing in interest to the government if 3 per-cent, gold bonds should be substituted for 4 per cent, coin bonds under the privilege reserved would be \$659.159, amounting in thirty carrs of the maturity of the thirty years, or at the maturity of the coin bonds, to \$16,174,770.

Believes Gold Reserve will Stand Intact. Of course there never should be a doubt in any quarter as to the redemption in gold of the bonds of the government which are made payable in coin. Therefore, the discrimination in the judgment of in-vestors between our bond obligations paynble in gold is very significant. It is hardly necessary to suggest that whatever may be our views on the subject, the sentiments or preferences of those with whom we must negotiate in disposing of our bonds for gold, are not subject to our die-

I have only to add that in my opinion the thransactions herein detailed for the information of the congress promise better results than the effort previously made in the direction of effectively adding to our gold reserve through the sale of bonds, and I believe it will tend, as far as such action can in present circumstances, to meet the determination expressed in the law repealing the silver purchasing clause of the act of July 14, 1890, and that in the language of such repealing act the arrangement will aid our efforts to "insure the maintenance of the parity of in value of the coins of the two metals and the equal power of every dollar at all times in the markts in the payment of debts, GROVER CLEVELAND,

Executive Mansion, Feb. 8, 1895. LARGEST LAKE CRAFT.

A Monster Boat Is Ordered by Eastern Capitalists.

By the United Press

Chicago, Feb. 8.-The contract for the largest tow barge ever constructed on the lakes, if not in the world, has been taken by the Chicago Shipbuilding company. The boat will be built for eastern capitalists, whose names as yet have not been divulged. It will be 552 feet keel, 365 feet over all, 44 feet beam, and 26 feet depth of hold. On the present draft of fourteen and one-half feet of water in the locks at Sault Ste.

Maria the new boat will carry 4,500

tons. On the eighteen feet of water.

Beethoven, Bismarck, Wellington, Kings and Queens innumerable, nearly all the minds that have changed the course of affairs in the world for centuries have been to Carlsbad for bodily aid. Not everybody can go even in these times of fast travel, but everybody can have the benefits of Carlsbad at a small cost at home in the Carlsbad Sprudel Water, or the Carlsbad the Sprudel Spring.

The genuine Carlsbad Sprudel is a natural remedy which is always effective in all disorders of the stomach, liver and kidneys; for habitual constipation, gonty and rhemnatic affections it is without equal. Be sure to obtain the genuine article, which has the seal of the city of Carlsbad, and the signature, "Eisner & Mendelson Co., Sole Agents, New York," on every bottle. | something as satisfactory."

all for use of canvas, and will be towed exclusively. It will be of the best steel construction throughout. The largest schooner or tow barge now affoat on the lakes carries less than 2,000 tons, so that the boat for which the contract was closed will be double the capacity of existing schooners or barges.

SCHOOL OF HYNOTISM.

Missouri "Psychical School" Brought to Police Notice. By the United Press.

St. Joseph, Mo., Feb. 8,-The psychical society of this city, organized for the purpose of teaching hypnotism, has been brought to the notice of the police by the complaint of Mrs. Ella Churchill, whose son has been one of the most promising students of the institution. Mrs. Churchill alleges that her son, after having been hypnotized a number of times at the meetings of the society, is losing his mind as a result.

INDUSTRIAL TOPICS.

Bickle & Co., operators of the Bellmore colliery near Mt. Carmel, have announced a reduction of wages to conform with the new basis at the Coal and Iron company's mines.

Another coal operators' combine has been formed among the small Hocking Valley operators. The new corporation has a capital stock of \$100,000, and will be known as the Ohio Central Fuel company.

Wilkes-Barre Record: Reese Brooks of Scranton, is getting to be one of the biggest barons in the trade. He takes big chances because he has lots of nerve, and enjoys a thorough understanding of the coal measures.

James H. Mahon, who has acted as coal inspector at the separators at Plymouth, has been removed to Miner's Mills to take charge of the culm breakers there. His brother will fill the vancancy.

Congressman Wolverton, of Sunbury, has bought the property of the Nathaniel Taylor Coal company, at Mt. Carmel, for \$700,000; 2,700 acres of coal land, breaker, etc. A tract of 2,040 acres was also bought by him for \$95,-

Beginning Wednesday the collieries of the Reading Coal and Iron company in the Lykens Valley district will work a full week three-fourth time instead of three days at three-fourth time. The news was given to the miners last evening.

From the twelfth annual report of the New York commission of labor statisties it appears that recent improvements in labor saving machinery, especially in the printing trade, have caused a decrease in the number of employes from 20 per cent. to 66 2-3 per cent.; in other branches of industry the decrease will average 18 per cent., and in some instances it runs as high as 60

The question, "Has a reduction of the existence of your organization?" is bill has passed or is likely to pass conanswered by 671 labor organizations in gress, and in the two months just forty-three organizations report that 000 in gold, of which \$40,400,000 went they prevented wage reductions, nine- into circulation, and \$26,300,000, besides ty-five say that they were unable to pre- the product of the mines, went abroad vent decreases in the rates of pay and thirty-three state that there has been no demand for a reduction.

Wilkes-Barre Record: The Scranton parties who have leased the Newport mines from the Lackawanna and Wilkes-Barre, at Newport, lately operated by Charles Parrish and others, have commenced sinking the shaft 200 feet deeper so as to strike two more will not be touched. Several months will be required to make the projected improvements, when employment will be given to 500 men and boys. The new company has applied for a charter. The property comprises 650 acres of coal and, a breaker, and 56 tenement houses. The shaft is now 200 feet deep and reaches two veins five and six feet thick respectively.

Hazleton Plain-Speaker: As the demand for small sized coal is far in excess of the output, Coxe Bros. & Co. are seriously considering the advisability of erecting several coal washeries in order to reclaim thousands of tons of chestnut, buckwheat, pea and rice coal, which now lies imbedded in the old culm banks in the vicinity of their various collieries. It is probable that two or more of the washeries will be erected within a few months. Experienced mine workers maintain that the big culm bank that has been standing on the Buck mountain tract during the past thirty years is the prize of the region, as no slate picker refuse was ever dumped upon it and they predict that it will yield from 50 to 60 per cent, of pea, chestnut, buckwheat and rice coal. One plan that is being considered in connection with this washery is the advisability of pumping the water which will come out of the new tunnel into a big tank and then erecting the necessary screens for separating the coal from the culm and sizing it properly and use mine water from the tank for washing purposes. The pumping machinery is about ready to be started up and this old slope will soon be relieved of the water with which it has been filled for the past thirty years. It is also stated on good authority that washeries will be erected at Sandy Run, Eckley and

Pond Creek.

The sub-committee of the representatives of the leading companies in the anthracite coal trade with a view of putting it on a reasonable business basis, reported to the full committee in New York on Tuesday. The report was so full of figures that it was unanimously agreed to take a week off and look into it fully. The preliminary work of the committee has been immense. but as everybody knows what the matter is it looks as if some time had been wasted. "From the producing point of view," remarks the Philadelphia Press, "a valuable mineral is being removed from the ground and given away. To stop this is a problem of some difficulty. because the producers cannot agree on details which will temporarily seem to lessen their importance in the trade." The Philadelphia Inquirer says the re port of the sub-committee is "based upon the mine inspectors' reports for 1893, which were published by the state last fall, and shows exactly the output and capacity of the different collieries in that year. As a basis for the past nothing could be better than this; but as a basis for the future its value Sprudel Salt, which is evaporated from may be doubted. Since that report was may be doubted. Since that report was made Jersey Central interests have completed two new breakers, one of them, the Maxwell, said to be the finest in the anthracite region. The Lackawanna has put down one new colliery and has two more under way. The and has two more under way. equilibrium of 1893 has been disturbed already and by the end of the year the situation will be quite out of adjustment. Still as a record of the past the

committee's report is the ablest pre-sentation of the facts that has yet

been presented and it is only to be

hoped the companies will adopt it or

TRILBY IN A CHURCH WAR

Rev. Racburn Objects to It in the Sunday School.

THE VESTRY TELLS HIM TO GO

After Calling Superintendent Watson Liar from the Palpit, the Reading Prencher Denounces Du Maurier's Novel-A Church Closed.

By the United Press.

Reading, Pa., Feb. 8 .- As a result of his sensational denunciation of Sunday School Superintendent George Watson from the pulpit of the First Universalist church last Sunday, Rev. G. W. Raeburn has been removed from the pastorate.

That seductive creature, "Trilby," was in a large measure responsible for the quarrel that ended so disastrously to the clergyman.

Several weeks ago, after the congregation had been divided into two factions, the one adhering to Pastor Rae-burn and the other to Mr. Watson, the vestry called upon the former for his resignation, which was offered and ac-cepted. Last Sunday, after his sermon, Pastor Raeburn drew from beneath the pulpit Bible a paper, which he read to the startled congregation.

Superintendent Watson had procured new books for the Sunday school library, and among them was Du Maur-

er's famous novel. "Trilby." This enraged Rev. Raeburn, and he lenounced Superintendent Watson in the following terms:

"I have found him to be a liar. I charge that the Sunday school is now in the control of a ring, and that the teachers' library, which is accessible to the young people of the Sunday school contains novels which are of a licentious character, notably the novel en-titled "Trilby," the adventures of a washerwoman, whom the author allows to pose for an artist, not for the beauty of her face or form, but of the lowest and vilest stamp; who sells herself body and soul, and at last dies with the halo of a saint about her."

Rev. Raeburn said the missionary money had been stolen not only once, but frequently. Superintendent Watson is a member of the vestry, which decided to depose the pastor and close the

DECREASE IN FAILURES.

Dun's Weekly Review of Trade Presents a More Favorable Condition of Affairs In the Business World.

By the United Press. New York, Feb. 8.-R. G. Dun & Co.'s weekly report tomorrow will say: A whole week the confident expectation of the sale of bonds has kept back exports of gold. Withdrawals from the treasury amounted to about \$2,000,000, but were wages been prevented by the fact of mainly for domestic purposes. No bond New York state. Five hundred and past the treasury actually lost \$67,000. How to arrest this outgo in either direction is a problem which another issue

of bonds may possibly solve. It is hoped that the negotiations with foreign bankers may secure some improvement, though it is clear that rates of securities here will have the same effect as if the bonds were placed in this country, and they may not be accepted by the new transactions. In other revein. Further down is still another spects the domestic money market is vein—the red ash, which for this time decidedly encouraging, with a fairly hopeful increase in transactions of commercial paper, though receipts of money from the interior continues surprisingly large for the season. The condition of industrials, if not materially better, at least presents some points of encouragement. No advance in the prices of manufactured products indicates a better demand. On the contrary, iron and steel products have slightly declined for the week and for the month, and in comparison with prices of October, 1890, are but 54.1 per

cent. against 14.8 per cent. Jan. 1. The remarkably large decrease in manufacturing failures deserves the more attention because prices of manufactured products have so greatly de clined during the year, and the output has been greatly reduced. Failures for the past week have been 281 in the United States, against 385 last year and 58 in Canada against 60 last year.

THE WAR OF PRICES.

Three Big Flour Mill Companies of the Northwest Lowering Schodules. By the United Press.

Chicago, Feb. 8.—The three great flour mill companies of the northwest are embroiled in a war of prices that promises to bring the commodity down to a figure that, from the standpoint of the miller, will be ruinous.

The Pillsbury-Washburn Flour Mill company, limited, announces a cut of 15 cents a barrel to meet reductions by its competitors, the Washburn-Crosby com pany and the Northwestern Consolidated Milling company.

The Washburn-Crosby people claim the Pillsbury-Washburn concern is endeavoring to force them into a combination to maintain prices at a uniform figure considerably higher than those now quoted. They assert they will not yield to the English syndicate that controls these mills and a cut of \$3 is expected before the week is out.

Reductions made in jobbing prices in the last two weeks amount to 30 cents a barrel. The trade is further demoralized by a reduction of 5 cents a hundred in freight rates from Minneapolis to the seaboard made this week.

Cash and Whiskey Liberally Used.

By the United Press. Indiana, Pa., Feb. 8.—Forty-eight witnesses in the interest of Judge White of-fered testimony in the Blair-White judi-cial contest this morning. The evidence did not vary from that of yesterday show ing that money and whisky had been libs erally used in the interest of Blair.

STOCKS AND BONDS.

New York, Feb. 8.-Pending the mount of the new government loan the stock market was stupid and neg-lected. When the official announcement finally came business improved, but the activity was at the expense of values. It is not too much to say that the street was disappointed, both as to the amount of the issue and the high rate of interest that the government will have to pay. It should be stated, however, that this is the opinion prevailing among stock brokers. On the other hand, bankers are inclined to look on the matter more favorably and claim that the deal just concluded by the government with the banking syndicate practically means that the administration has a call on the bankers for all the gold it requires to keep up the reserve to the hundred million mark. Still the active traders ignored NIGHT GOWNS, SKIRTS, for all the gold it requires to keep up this and were disposed to sell in the late dealings. The loss in prices ranged from ¼ to 2 per cent. London was a seller of its specialties and the prominent local bear operators put out fresh short lines in the Grangers. The storm it is expected, will play havoe with the earnings this week. Total sales, 123,000 shares. Net changes show losses of 1/4

to 1% for the day.

The range of today's prices for the active stocks of the New York stock market are given below. The quotations are furnished The Tribune by G. du B. Dimmick, manager for William Linn, Allen & Co. stock brokers, 412 Spruce street. stock brokers, 412 Spruce street,

TO OUR PATRONS:

Washburn-Crosby Co. wish to assure their many pat-rons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take no risks, and will allow the new wheat fully three months to mature before grinding. months to mature before grinding.

This careful attention to every detail of milling has

placed Washburn-Crosby Co.'s flour far above other
