The . Hollow . Ruby.

BY JULIAN HAWTHORNE.

(These short serial stories are copyrighted by Bacheller, Johnson & Bacheller, and are printed in The Tribune by special arrangement, simultaneous with their appearance in the leading daily journals of the large cities).

CHAPTER V.

The battle (considering the romantic environment) did not amount to much. Meryon began it with two impulses, both foolish. The first was to put him self between Terah and danger-which, since they were both already surrounded by the enemy, was impossible except he formed himself into a hollow square, which is well known to be impracticable. His next idea was to swallow the hollow ruby, which would have resulted, had he accomplished it, in his being cut asunder like a bean pod, for the sake of what was inside. put his hand to his pocket and felt the ruby there, but it had clipped through hole and lodged in the linning. While he was frantically fishing for it, he heard Terah cry out; the memory of his dream flashed over him-but where were the black mountains and the embroidered eagle? He felt a burning, numbing sensation in his right shoulder and would have fallen over backward but that he was sent the other way by a bang on the back of the head;

after which he knew nothing. Death is said to be a painless operation; when Meryon came to himself he was assured of continued existence by the exerutiating discomfort which he

He Staggered Over It.

the cave in the big rock, as he rightly surmised-with a gag in his mouth, a bullet wound in his shoulder, a gash in the back of his head and a splitting headache. A raging thirst be set him, hiding from him the fact that he was also fainting with hunger. The first thing he did was to feel in his pocket. The ruby (as he expected)

In his groping, however, his hand came in contact with his contacn which he had filled at the spring just before Terah's arrival. After a flerce struggle he succeeded in getting his gag off and took a drink—the best drink he ever had, before or after. Why had have been married by own and has its own boiling point, this time to the entire detachment, freezing point, critical temperature. the rock? There were several perplex- You can punch my head, you know, ent from those of any other element. ing features about this affair. Mean- but I'm giving you cold facts. Of One of its properties is its invincible while he was not going to submit without a struggle to being buried alive. He It's the way she's made, and would be else. It will have nothing to do with got to his feet and dragged himself just right in a Nautch-girl-but as to the doorway of the cave, revealed by Mrs. Fred Mervey of Murray Hill and gleams of light coming through chinks, and found it stopped by a mass of rock. With all his remaining might he gave this rock a kick; to his astonishment it fell outward, being only a slab resting against the aperture; he staggered over it, out into dazzling daylight, and into the arms of a man in European dress, who exclaimed in some surprise "Hullo, Fred Meryon! I might have known it would be you," in the voice of his old friend, Horace Chase, the surgeon, Mervon sald: "Great Scott Horace?' and fainted-not being an or-

The meeting had come about thus The English had a "post" in the capital of our prince's ally, and hearing that a row was brewing between the two other principalities, sent a detachment out to stop it. Chase went with it to cut off arms and legs in case anyone was injured. After transactions which do not concern us, they got on the trall of a marauding party and captured them with their booty, among which was a young person dressed like a boy, but a girl underneath. She said she was a princess, and told a queer tale, in consequence of which they kept on until they came to the tall, conical

yon, as we have seen. Among the prisoners was a fat old person whom the princess denounced as her father's chief cunuch, a fugitive from justice, and the shooter of her ing happily ever since. lover. This creature, upon interrogation, denied not only what was charged they found changes against him, but, most shrilly of all, It appeared, in the first place, that something which was not, namely, that the princess, the mother of Terah, havhe had taken the hollow ruby. Fur- ing been taken very lil of a dropsy and ther inquiry developed that he had got at the point of death, summoned the togeter his band of cutthroats osten- prince to a private interview at which sibly to waylay Meryon and capture she informed him that Terah was not the princess, who was to be held his daughter, but that as compensation for ransom; but he himself had secret Ebal, who had been brought up as a knowledge of the ruby, and designed slave, was in truth his lawful son and to get that for himself. Accordingly he heir. This remarkable likeness to had shot Meryon, gagged him lest he each other was due to their both favorrecover and swallow the stone, and de- ing their mother. The lady further posited the body in the rock, meaning explained that her infidelity and decepto sneak back unobserved and hunt for tion had been carried on in retaliation the jewel at his leisure. Fate had then for a disappointment the prince had

narrated. What was the hollow ruby? the Englishmen wanted to know. Terah told just as the executioner whom the them; though it was news to her that prince had lost not an instant in send-

Meryon had had it in his keeping. Where, then, was the ellow ruby now? Hatipat was not only searched outwardly, but fed for a day or two on a diet of castor oil and soapsuds, to no purpose. Meryon's clothes-he being after another, and Hatipha and Meryon still unconscious in the delirium of fever-were examined; and they even sent back and searched the cell in the rock. The ruby was not to be found. At this juncture Meryon came to himself, learned from his friend Chase what had been going on, and spake. It should be premised that the English had brought their prisoners to a city of

the hostile country; and that Terah had become an object of general admira "That old swine Hatipha has it, de pend on it," said Meryon.

"We can cut him open. There's noth Ing else left to do to him," said the always low-voiced and undemonstrative Chase in a dreamy, professional tone, "But I fancy you swallowed It yourself."

"With that gag in my jaws? But I see your game. You want to incise my epigastrium and get the glory of an eration. All right. Only, mind you, ever I get well again, I'll give you uch a licking as-"Don't excite yourself; I won't risk

, then, for my operations always succed! This wound of yours is enough "Why not try the experiment of removing the bullets?" growled Meryon,

"Dear boy, it just went in at one loor and out at the other. Here's the aperture of exit at the back." "I can feel it all the same. Why doesn't my princess come and nurse

"Your princess?"5" Chase repressed a mile, "She's busy."

"Waht the devil do you mean?" "Look here, my boy," said Chase, gently, "don't agitate yourself—but what is she, anyway? You were always a fool about girls-it's your tem-

perament, you know; but you can hardly be quite such an imbecile as to nean anything serious with her?" "Dr. Chase, I consider your remarks damned insulting! I want no more of

wife, will regret, do you understand?" The surgeon was imperturbable, You should have had her boxed up in the harem and expressed through to your New York residence, and married her as she stepped out; and afterwards keep her in the meat-safe, or some to be frank with you, she has been carrving on here in a manner that may be taste for variety long repressed and finally indulged, but which, were she my fiancee, would make a murderer cow, to liquefy and solidify. These you great red-headed calf, if she'd been Beacon street, ch? Come, man, swal-

"Are you giving me this straight?" inquired Meryon, after a short and |zle. All the heat given to the new subpregnant silence

low your medicine"

"Straight and cold; and a good bit di-

There was another silence long and meditative. "Poor little thing!" at last nuttered the artist. "It's my fault. To marry her would make it worse. We don't understand these eastern omen-their warm blood or their cold lood, either. But now she has found it what freedom is, it would be cruel to take her back to be shut up again. Still, what else . .

'We'll take her back and see if some thing nice can't be done for her," said Thase; "meanwhile I'll see she gets into no mischief here; and do you keep quiet and get that shoulder healed." A week later they set out and procoded by easy stages, carrying Meryon on a palanquin. Terah and Hatipha were of the party, much against the

will of both. But whereas Hatlpha's only objection was that he would be flayed and impaled at the end of the trip, the poor little princess had to tear out of her heart some thirty or forty rock, and were about to investigate it vigorous young fliritations. It may be when it opened and out popped Merstated here that during the first night's encampment this young lady disappeared, and with her a handsome young camel-driver and a camel; and there is reason to think that she has been liv-

Upon arriving at the prince's palace,

stepped in and laid him by the heels as given her, some fifteen years before, in the matter of a box of sweetmeats. She died, with a smile of satisfaction,

Theodore Thomas

ing for, arrived with his bowstringtoo late!

But his highness was indignant, and somebody must be impaled. He sent for Terah. It was then discovered for the first time that she had eloped with Meryon, and left the slave boy Ebalnow the true prince—in her place. The latter was brought to his father, expecting instant death; but as his highness needed an heir and had no other. he was forced to spare him. He sent, however, for the father of Terah, who ever he might be.

The messenger learned that he used to be a gardener in the service of the harem, and that he had died a natural and easy death only a week before.

Here truly was a maddening state of things; four impalements missed one

They Prostrated Themselves at the Feet of Ebal.

also out of reach. Some one must be slaughtered, and at once; but whom? No one who had offended the prince could be got at, and nobody who could be got at would offend him. His highup for eight and forty hours, now at-

THE BASIS OF MATTER.

Discovery of a New Element Opens Up Large Possibilities. From the New York Sun.

The existence of another element in 'em! I shall mary the princess and the atmosphere, announced last sum-take her to New York, and whoever mer but received with a good deal of doesn't pay her proper respect as my incredulity, has now been fully demonstrated. The new element has been named argon by its discoverers, Lord Rayleigh and Professor Ramsey, There some doubt whether this is still strange, inert gas, which defies some of the best known laws of physics, consists of one or two primary elements. squally cool and secure retreat. For, The discoverers have finally succeeded in separating it from the atmosphere on a large scale and have sent a pornatural to an oriental princess with a tion to Professor Crookes, the eminent spectroscopist, and a portion to Dr. Olszewski, of the University of Craand suicide of me in five minutes. Why, great authorities have found that the new substance gives a spectrum of its. able she would have been married by own and has its own boiling point, from the drummer-boy to the captain, and critical pressure, that are all differcourse I don't blame her-who would? rejuctance to combine with anything oxygen, chlorine, phosphorus, sodium, Mrs. Fred Meryon, of Murray Hill and platinum, or various other substances, Even the electric arc does not make it take companionship with anything.

One important quality is a great puzstance produces only the motion of translation. In another respect argon presents difficulties. The great Russian chemist, Mendelejeff, has discovered an empirical law which associates the properties of elements with their atomic weights. Now the new element has a density of 29 or 40, which does not fit this law. Argon gives two spectra the red and the blue, and it is this which raises a doubt whether the investigators are dealing with one or two substances. If the latter should prove true, then there is a new vista opened up, and it is suggested perhaps one of these substances will prove to be Professor Crookes' ideal protyle, the ultimate basis of matter from which all others are only combinations.

LINCOLN ON GETTYSBURG.

Omniscient Matthew Arnold Had

Never Heard of It. A correspondent writes to the New York Sun as follows: I remember talking with Matthew Arnold, when he was in this country, about Abraham Lincoln -you will remember that he said of Lincoln that he had no "distinction" and I called his attention to the Gettysburg speech. I shall never forget the imperturbable Saturday Review stars with which he usked: "Ah, what is the Gettysburg speech?

He had never heard of it. I believe when he went back he asked Professor Bryce what it was about, and when it was hunted up in an American school book and shown to him, he read it hastily and put it away with a commiserat-

Suppose you ask M. Bourget, who is looking into the American heart by the way of the American bodice, and on space rates, if he has read the Gettysburg speech. I happen to know of my own knowledge that Robert Louis Stevenson had not heard of it when he was exploring our continent, and Sir Lepel Griffin and Rudyard Kipling had an idea that it was a newspaper fake. The current number of the Saturday Review lies open before me, and this is

what my eye falls on: "The common American delusion that there has been a number of great American poets, that there is, indeed, such a thing as American literature,

disports itself with unusual pomposi-It is impossible for these literary prigs of a special cult to understand that there may be stimulant conditions af national life that wake into tumul-tuous activity all the higher and better functions of the soul, prior to the chartered formulation of them into an art, and that it is in these periods of awakening and not in the after repose of an elaborate aestheticism, the most precious heartbeats of the race have made themselves heard and felt, sometimes in half articulate tones, but oftener in organ blasts which have set the key of liberty and fixed the vocabulary of hope and victory.

Noble English Militiamen. An officer of the British militia recently expressed himself as personally aggrieved because an English journal inadvertently, or otherwise, "put some of his fellow-mi-litiamen down as snobs." He avers that it is not a bad record for the militia when it includes four princes, twelve duker eight marquises, twenty-one earls teen viscounts, thirty-three lor six baronets, besides innu lieutenant, high sheriffs, l

Suggestions That May Save You Many a Doctor's Bill.

WISDOM FOR THE HOUSEHOLD

These Hints Don't Cost Much, Are Not Copyrighted, and if They Don't Do You Any Good, They'll Not Do You Any Harm,

We cannot back up our claim by statistics, for to tell the truth we do not know that trustworthy statistics on the subject have ever been collected; yet we venture to assert that the spitting habit is on the increase among Americans, in general, and among the residents of Scranton and its environs in particular. At all events, any tobac-conist will tell you that his sales of the nicotinian weed for chewing purposes are growing at a faster rate than the growth in population; and it seems a fair deduction that this means more profuse spitting and a larger prevalnce of filth, disease germs and funerals. There is an aesthetical side to the subject which could be dilated upon for three good columns. But the spectacle of rational bipeds of the human variety making slime fountains of the same mouths through which an inserutable Providence intended them to receive food is so little calculated to turn one's thoughts upon the True, the Beautiful and the Good that we shall restrict our present comments entirely to the physiological side of the subject. . . .

Perhaps it is a species of threshing over old straw, yet we shall be deliberately guilty of that offense by saying that the place for one's salivary secreness' wrath, which had been warmed tions is in the mouth, the throat and the stomach, rather than on curbstones, tained the temperature of super-heated car floors or in cuspidors. The saliva is steam, and the boiler exploded. In needed in the stomach's business, It is other words, this great and worthy not necessary to good sidewalks or to potentate expired of an apoplexy in the proper transportation. The saliva is midst of his trembling courtiers, who meant as a kind of mixer for the food. instantly, with hosannas of joy, pros- If it isn't there, to do its necessary trated themselves at the feet of the work, digestion will be interrupted astonished Ebal and proclaimed him and the spitter will correspondingly suffer. A large percentage of the diseases that originate in insufficient digestion can be traced back directly to the anxiety of the average American to acquire skill in killing flies at ten feet. The man who wants to enjoy good health, as well as to retain a reasonable hold upon the respect of his neighbors and friends, can do nothing better promotive of these desires than to get permanently rid of the innate masculine proneness toward promiscuous expectoration.

> Treating of cancer, Professor Hugh Percy Dunn remarks in The New Review, upon the view entertained by derlying this belief being that the ailment commences de novo in each person whom it attacks, and also that its consecutive appearance in the members of a single family is due to hereditary transmission. Professor Dunn thinks it doubtful, however, whether, in view of our recent knowledge, this general opinion can be maintained-almost every year facts accumulating which in-evitably point to its being a disease of parasitic origin, and probably at no distant date a cancer microbe will be discovered; if this should actually prove to be the case, it would clearly be necessary to reconsider the question as to the infectiveness of the ailment. In former days no definite knowledge existed in regard to the infectivity of tuberculosis-certainly, no evidence such as could be practically made use of in support of any suggestion of the kind was available, so that, naturally, no precautions were taken in this direc tion to prevent the dissemination of the malady; since, however, the discovery by Koch of the tubercle bacillus, all preconceived notions upon this point have been revolutionized. The completion, by Professor Coles, of Kingston, of a new Electric Eye of superior visual power, expected soon, will un-questionably shed much valuable light on this subject by bringing a magnifying power expressed by from 300,000 to 500,000 diameters to bear upon minute portions of cancerous growth.

HEALTH FOR THE MILLION:

One of the most fruitfut causes of wrinkles is straining the eyes. Sudden transitions from darkness to light or viversa make the eyes shrink and production of the production of the control of the working the eyes and wearing cross-barred and dotted veils help on the wrinkle-producing work.

For hives in children, rub the irritated skin or the pustules with castor oil, ap plied with the tip of the finger. Baby will pass from fretting to slumber white the process is going on, the relief will be so great and quick. For inflamed eyes, bumped heads and sprained ankles, use

abundantly water as hot as can be borne "Never," says the Philadelphia Record, "pour scent on your garments. Liquid perfumes have just two uses. One is to often and sweeten the water in which one washes and the other is to rub aching muscles. The invigorating effect of the alcohol and the seething effect of the odor are excellent medicinally. But it used to perfume clothing the effect is bad. for the flower odor soon evaporates, and there clings to the wool or linen only the fragrance of alcohol combined with 'stuf-

fy' house and street-car odors,' From the Philadelphia Record's answer to ailing correspondents, which are pre-pared in each case by an eminent physician, we extract the following directions often of general applicability: "A good cure for cold feet is to bathe the feet, night and morning, in cold water and rub dry with a coarse towel....Milk is a fine food and blood-maker. Drink two quarts of it every day in addition to your regular meals...A good remedy for crysipelas is tincture of the chloride of orin in 29-drop doses (in half a glass of water—take through a glass tube) three times a day after meals.... A young girl can keep wrin-kles awey by going to bed early. She needs ten hours of sleep every night... Try rubbing the nasal cavities with cos-moline, camphor ice or cold cream before joing out into the cold, to prevent the angoing out into the coin, to prevent the an-noying dripping... One should walk two miles at least—four or five if not fatigued by it—every day in the year. Dress suit-ably for all weather and walk every day in the year. If you do this it will not be necessary for you to go to a gymnasium.... Take five drops of dilute hydrochloric acid in half a glass of water before each meal, for the relief of headache, sick stomach and lack of appetite. To strengthen your nerves and 'give you an interest in life,' take the tincture of nux vomica in 15-drop loses (in a little water) after each meal...Backache, headache, inability to sleep-all are caused by constipation. No one

can escape having these symptoms if he continue to 'go four or five days' without a bowel movement. Fix an hour to go to the closet and keep to the hour; the neglect to have a regular time to evacuate the bowels is the commonest cause of constipation. Drugs give temporary relief only.Consumption can be arrested in its course frequently by removing to a dry. warm climate. The life which best maintains the systemic nutrition is the best treament for this disease. Cod liver oil benefits the consumptive because it builds up the nutrition of the body. Sometimes eating candy or some other sweet stuff will lessen the desire to cough."
