The Thirteenth Column.

By BARRY PAIN.

(These short serial stories are copy-ighted by Bacheller, Johnson & Bacheler, and are printed in The Tribune by special arrangement, simultaneous with their appearance in the leading daily journals of the large cities).

I knew Charles Backerton Salemaker fairly intimately. He was a young man, mild-eyed, fair-haired, good-tempered, and-before he went on the staff of Home Happiness-conscientious. He was fond of describing himself as a good all-round journalist. I was one of the people who saw him last before his unfortunate and mysterious disappearance; and, as far as anyone can

know why he disappeared, I know it. I think the trouble really began when Home Happiness, an excellent magazine, supplied a long-felt want. The very first number supplied it fully after that first number hardly anybod seemed to want any more. The street of London were filled with crowds of people who were doing without the last issue of Home Happiness, and not minding it. Wherever the English language-or any other language-was spoken, there were earnest men and women who had never heard of the magazine, and did not even want to hear of it. And yet the editor was a man of talent. When hardly anybody bought his second number, he sent round a paragraph to the other papers to the effect that their esteemed conemporary, Home Happiness, was rap idly securing the first place among weekly journals of the domestic class. It is true that the other papers never inserted that paragraph, not consider ing it to be altogether funny enough but still the thing showed enterprise Then again, when the third numbe did not sell quite so well as the second he advertised Home Happiness at all of the railroad stations as "A success un precedented in the history of journalism?" Some people called this also en-terprise, and some called it something shorter. And finally the editor did a very clever thing when he secured, as moderate salary, the services Charles Backerton Salemaker. Salemaker loved work; he worked willingly, and he was-at one time, at any rate-a conscientious man.

The paper started its first number with great profusion. In return for his money, crease of salary.

When the art critic went it was Salemaker who was appointed to write that delightful column, "Through the Picture Galleries," "And this," he said to me, "gives me great pleasure, for I have never had it practically recognized

Salemaker Loved Work.

that I know something about art." could understand that, and told him so. I do not think he was quite so pleased when he was given a third column to do every week, because the third column was called "Notes for the Nur-"However," he said, "one can always read up a subject." He bought two second-hand medical works on the treatment of children and quoted them alternately. The two medical works were diametrically opposed to each other on several important points, and in consequence there was a little trouble. He also invented a new game for infants, to be played with wax matches, and the editor got a furious post-card saying that if the author of 'Notes for the Nursery" had the feelings of a mother, she would never have advocated a game which must lead to phosphorous poisoning and incediarism in the end. Salemaker said that he would be more careful in future, and the editor-to show that he still had confidence in him-gave him two more columns to write every week.

I met him in the street a fortnight afterwards, and he was not looking quite as enthusiastic as usual. "Well," I said, "how's the paper, and have you

got the feelings of a mother yet?" "The paper is beginning to turn the corner," he said. "It'll do very well in time. Of course, there is none of the silly extravagance that there was at first. The staff has been very much re-

"Then who does the work?" "Well, I write eight columns for every number myself now, and the editor does most of the rest. Of course It's no hardship to me; a good all-round journalist does not want to be tied

down to one subject. Besides, the paper is practically turning the corner I advised him not to overwork himself, and he hurried away to the office:

I thought he seemed paler and thinner than he used to be. That night, after dinner, I was alone in my chambers, when suddenly Sale-

maker arrived. "It's a terrible business!" he exclaimed, as he came in at the door. He dld not look himself. He seemed indignant and distraught. He was wearing his hat very much on the back of his head. I gently removed his hat, made him sit down, gave him something to smoke, and asked him what was the matter.

It's a perfectly terrible business. I've just come from the office. I wanted to consult you," he said, rather inco-

"I see," I said. "The success unprecedented in the history of journalism is going to stop-going to put up its poor, unhappy shutters,"
"Nothing of the kind. The paper is

low, as a matter of fact, definitely turning the corner."
"Do you know," I asked, "that you've already told me that twice today?" are sighed.

"Have I?" he said drearly, "Very likely. I've got into the habit of saying it whenever I hear the paper mentioned. Let me tell you what's happened. We've got a column in the paper called 'The Height of Fashion,' a column for women, you understand."

"Well, it used to be written by a lady f the most popular features of the paper. Now the editor, on the plea of economy, has turned her off, or, rather, she doesn't care. She says she shall go and be a new woman, and write an im- a living in." proper novel. You can see she's cut up

"Well," I said, "I'm sure your sympathy with her does you credit, and if the editor discontinues the most popular feature, it may reated the progress of the paper, but after all-

he said, irritably, 'that isn't it at all. 'The Height of Fashion' is to ome out every week as usual, but the candalous-the absurd-I may say the

"It's a Terrible Business."

unspeakable thing about R is that I've not to write it." He laughed bitterly "I, Charles Backerton Salemaker-mo qui vous parle-have got o write fashion article for women. Think of it

"Why don't you projest?"

"Protest? What else do you think I've been doing at the office except protesting? Heaven knows I don't mind work. I give them plenty for their I write the politics, the art salary, Salemaker was asked to write and the nursery notes, and other things only one column a week, a column entitled "Politics for Papa." I know that told you that I did eight columns a titled "Politics for Papa." I know that he was uneasy about this, thinking and saying that he was afraid he was not really doing enough for the money he received. However, he did the column well. Any liberal or any conservative who read it would have found nothing with which it was possible to disagree. with which it was possible to disagree, ples once, but Home Happiness has Salemaker said it was written from an about done for them. You see, pubindependent standpoint. Subsequently lishers won't send us books for review expenses were cut down; journalists fell off the staff of that paper like ter managers won't send us tickets. leaves before the blast, and their work What's the consequence? I review books I've never read, and criticle plays I've never seen; I always notice them favorably, and so I've never been found out. Last night I wrote ar obliuary of a man who isn't dead, and some 'Genuine Experiences of a Detective, which I never was. But that was honesty itself compared with what the editor wants now. Besides," added, more quietly and reflectively "It will be a very difficult thing to write that article without being bowled

> I said that the subject was probably much easier than was generally supposed. I had known some girls who appeared to be singularly, impressively tupld, and yet they thoroughly under-

"Ah, yes," he said; "it is not so much a question of brains as a question of instinct. All women have the instinct You think the subject easy? I'll guarintee you don't even understand the elements of it, the mere question of structure, letting alone ornamentation Here's a thing which may happen any day, and I've seen it myself. The top half of a woman's dress has two rows of buttons and button boles; one row is genuine, practical and works; the other row is pure 'fake,' just put on out of exuberance. Can you tell me which is division of the profits. which? No, you can't, and I can't, but a girl of twelve could without looking Then there are dresses which can never be put on at all-at least, one would say so if there wasn't a woman inside them. How did the woman get there The only possible explanation is that pendent. she was melted down, poured in through the collar and allowed to set. I say that it is the only possible explanation, but I am perfectly well aware that it is not the right one, And you can't tell lanta, Augusta and other points farther me the right one, I don't know and north. can't find out the bare elements of the

subject. "Then why didn't you tell the editor

"I did," said Salemaker, pacing ex citedly up and down the room. "He's a married man, and has got two sisters into the bargain to my certain knowledge. He lives in the atmosphere of it. He would only have to leave the women shorthand. That would give him something to go upon. As for me, I have work," not got one living female relation. However, he wouldn't hear of doing it went off as if he had learned something.

himself. He said he had enough to do already. He told me that a good allhimself. He said he had enough to do ound journalist could write any article on anything." [To Be Continued.]

WHERE TO MAKE MONEY. The Great Advantages of the East Coast of Fiorida.

"I am tired of working hard for a living," said a western Ohlo farmer the other day to a reporter of one of the leading newspapers of Cincinnati. "I can manage to keep ahead of the world, but it is a constant fight; the crops are uncertain, the summer days are hot, the winters long and cold and the doctors' bills heavy-so I'm going to pull up stakes and try my luck in Florida.

The reporter remonstrated with him: "It's a beautiful country down there," ournalist, a Miss Catling. It was one he said, "but it strikes me that it was made for only rich folks to live in. I was down there four winters ago for few days and was delighted with asked her to write gratuitously. She says she wont' work for nothing, and didn't strike me that Florida was any sort of a place for a poor man to make "That's all because you don't know

about it," replied the farmer; "I've been informing myself about Florida for the past six months; I have written there for reliable information and got it. See here, tand the Ohio farmer pulled a lot of pamphlets, maps and letters from his pocket), the Florida east coast is the country for me," he added, "and these effers, etc., prove it."

They spoke of the Jacksonville, St. Augustine and Indian River railway, stretching out over 350 miles of fertile country, dotted here and there with cities and towns, all having a solid business and beautiful winter tourist hotels. This railroad runs from Jacksonville to St. Augustine, thence to Palatka, thence southeastward to Ormond, and after that it skirts the coast southward to Lake Worth, often paraleling the ocean for many miles in sucession and penetrating the center of the famous Indian river country.

The lands through which this railond is built are wonderfully fertile. Except in the region just south of St. Augustine-where practically the whole peninsula between the Atlantic and the St. Johns river is capable of the highest cultivation-the arable land extends back from the ocean only a few milesfrom four to ten or fifteen; but the variety of its products and the profit with which they may be raised and marketed are attracting people there rom many quarters of the globe,

In and around Moultrie-not far south of St. Augustine-a colony of western New York people has thousands of acres in grapes, the White Niagara predominating. The fruit is eady for shipment in June and early July, and the yield is frequently from three to five tons per acre. At the outset the grapes bring from 30 to 40 cents per pound in the northern and western wholesale markets, and for the season the price will average about 15 centsyield of from \$200 to \$1,500 per acre.

Rice culture, too, is very profitable on the low lands lying on either side of the Jacksonville ,St. Augustine and Indian River railway, in St. Johns and Volusta counties.

There is hardly a mile of the country from Jacksonville to Lake Worth in which oranges cannot be grown profitably, and in the southermost region the lemon flourishes, yields abundantly and brings high prices anywhere. The Indlan river oranges are acknowledged to be the best in the world, and hundreds of men are getting rich in the cultivation of groves in that portion of the state.

From Titusville south is the home of the pincapple, a fruit which is easy of who have been long accustomed to it. cultivation and which yields a crop eighteen months after its planting. Ankona, Jensen and Eden have some of the most extensive and the finest pineapple plantations in the world. According to the reports of tourists who have traveled all over the island of Cuba, the best plantations of "pines" there are not to be compared with those of the east coast of Florida. The profits are great, and it is now an even race between the orange growers and the pineapple planters there to prove

which can get rich the faster. "Trucking" is another profitable industry prosecuted in this favored section, the fast freight trains of vestibuled cars run by the Jacksonville, St. Augustine and Indian River railway carrying tens of thousands of tons northward every winter and spring. The freight charges are low, considering the excellent service, and it is generally understood that all the people along the line of H. M. Flagler's railway are considered his "partners;" that is, they work together, the planters and growers and truckers making the crops and the railroad company transporting them to market-all on a fair

Bananas, limea, guavas, sugar cane persimmons, pomegranates, watermelons, sugar apples, and a great variety of other tropical fruits are also successfully cultivated on the East coast and are making the husbandmen inde-

The waters of the East Coast teem with fish and oysters, and the railroad is rapidly building up a market for them in Jacksonville, Savannah, At-

As the people prosper the towns are rapidly built up and improved, and in even many of the smaller ones banks have been established for carrying on the business. Melbourne and Palm Beach both have fine institutions of this

"The East Coast is the country for repeated the Ohlo farmer, as he folded up his papers and carefully rein a room together, and nature would placed them in his pocket. "I can get do the rest. They would begin to talk rich in six or seven years down there, clothes, and he could have his clerk while up here I shall be ready to die at the keyhole to take it all down in by the time I have scraped together enough to keep me comfortably without

Suggestions That May Save You Many a Doctor's Bill.

WISDOM FOR THE HOUSEHOLD

These Hints Don't Cost Much, Are Not Copyrighted, and if They Don't Do You Any Good, They'll Not Do You Any Harm.

It is claimed that the new method of sterilizing milk for the use of young children is a perfect preventive of his circulating disease. The milk is placed in a clean bottle, which is put inside any convenient metal vessel, and into which cold water is poured until it reaches the level of the milk in the bottle, the mouth of the latter to be closed with a plug of clean white cotton, and, if the bott'e containing the mlik be raised about half an inch from the bottom of the outer vessel by some simple means, this facilitates the circulation of the hot water round the bottle. The outer vessel is then placed on a stove and slowly heated until the temperature of the water reaches 155 degrees F. The vessel is now taken from the fire and covered over closely with a piece of woollen cloth, to remain covered for half an hour, at the expiration of which time the bottle is taken out and put in a cool place. The milk is fit for use at any time within twenty-four hours: the cotton, however, is not removed, as it prevents the entrance of dust or germs of any kind,

should act when threatened with pneumonia is as follows: "When a severe or sudden chill has been contracted the main thing is to act quickly, and many a serious illness can be averted and aluable life saved by a little intelligence coupled with promptitude. If possible, send for a doctor immediately, and meanwhile take ten grains of quinine and five drops of spirits of camphor in a little water or on a lump of sugar. These doses are for an adult. Then soak the feet in hot water and jump into bed. Simple as these remedies are they have nipped in the bud many prospective cases of pneumonia. While soaking the feet the body should be warmly wrapped in a blanket, which should be kept on until some time after the person has entered the bed in order that free perspiration be continued and not checked. A good thing to prevent colds' is to wear wool next to the skin. When this is not possible, on account of the irritation sometimes caused, a mixture of wool and silk will generally be found satisfactory. I would not recommend cotton in any form for underwear, as it is frequently the cause of a langerous cold by becoming wet and keeping the temperature of the skin below the normal. Care should be taken that the feet do not get wet, or, if so, that proper measures are taken to dry them and a change of hose made."

Dr. Ludwig Jankau, the eminent physician of Munich, does not belong to the Anti-Tobacco society. He mainof the sick and convalescent, under certain conditions. He recommends it for patients after most surgical operations, should they desire the weed, and urges that in organic disease of the heart the use of mild tobacco should not be discouraged in respect to patients He considers that in the early stages of phthisis smoking is of positive benefit owing to is unquestioned bactericidal power. As a disinfectant generally the Munich doctor has the highest esteem for tobacco; and as regards subjects of nervous diseases he enjoins that discretion should be exercised in the moderation of the use of the fragrant leaf rather than in the absolute forbidding of it. Altogether, he makes out a strong case for tobacco.

A foreign medical journal is authority for the statement that a tablespoonful of glycerine in hot milk or cream will at once relieve the most violent attack of coughing. This is a simple, easilyobtained and harmless remedy, and if it keeps good its promise will prove to be of great value. Equally simple and quite as effective is the use of glycerine spray through an atomizer. This is applied directly to the inflamed or irritated surfaces, and gives almost instant relief. In attacks of influenza. colds in the head, sore throat and like troubles, glycerine mixed with three times its bulk of water, boiled and cooled, is an invaluable remedy.

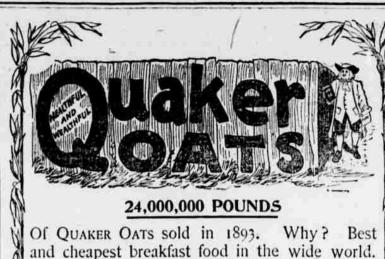

HEALTH FOR THE MILLION:

Cultivate the habit of yawning to strengthen the throat and voice.

To purify the blood, take a tablespoonful of pepto-mangan'in half glass of cold milk after each meal for five or six weeks. To promote the growth when thin of hair, eyebrows or eyelashes, rub vaseline on the scalp so as to feed the roots. In the morning use an eyebrow brush deli-cately, and a stiff hairbrush vigorously, to remove all the scruff or dead skin, and to stimulate the action of the oil glands. For indigestion take a half teaspoonful of the phosphate of sodium in half a teaupful of hot water half an hour before each meal, and after every meal take ten drops of the tineture of nux vomica in a wineglass full of water. Take both medi-cines for at least four weeks. This will in searly every instance afford perceptible

A writer in La Medicine Modern asserts that sedentary occupations predispose tuberculosis more than any others. Italian and English statistics show, he says, that there are 49 deaths per 1,000 from this disease among students, seminaries and young clergymen, while farmers, boatmen and mountaineers enjoy almost complete immunity from It.

Philadelphia Record Prescriptions: The daily use of a few drops of tincture of myrrh in the water used for the teeth will not harm them, and it will perfume the breath....There is nothing one can use to remove down from one's face. Try washing the face with buttermilk once every day—this will frequently "whiten" and freshen the complexion...Try a few drops of amnionia in the bath water to remove the greasy appearance from the skin.... Try the phosphate of sodium in teaspoonful doses, in a small teacupful of boiling water after each meal for the yellowness of complexion, and for the relief of the too frequent urination....To relieve short-ness of breath take ten drops of the tincture of nux vomicae after each meal and upon going to bed at night....For bloating of the face and swelling of the feet and hands, take ten drops of the tincture of digitalis in a little cold water after each meal for one week; stop a week; then take for another week; discontinue another week; take a week, and so on for several months..., For blackheads and pimples, squeeze the black and yellow points out of every pimple; this can be done with a watch key. Then wash the face with hot watch key. Then wash the face with hot water and sulphur soap, at least once daily. Keep the whole body very clean This can be accomplished by a full bath, a sponge or plunge bath, as may be more convenient, every day. Never permit the bowels to become constipated. Take long walks daily, no matter what the weather may be. Take Fowler's solution of argenie for six weeks before expecting any solution that the state of the cost of tinning. improvement, and continue taking it for five months. The dose must be small but two drops in half a glass of water af-

HOUSEHOLD HINTS.

Pillow slips should be ironed lengthwise instead of crosswise if one wishes to ron wrinkles out instead of in. Clothes when brought in should be fold-

ed and separated at once; if allowed to lie together many wrinkes accumulate. Dish towels and common towels can be roned just as well in half the time if

folded together once as if ironed singly. It is said that lumps of gum camphor scattered inside of a piano will keep the moths from attacking the wooden lining of the hammers. To make a really delicate dish out of

that coarse vegetable, cabbage, it should be sliced and simmered slowly in milk Dr. Cyrus Edson's idea of how one enough to cover it, over a slow fire, for two hours. Add a lump of butter and a little nutmeg or mace, as preferred, and serve hot. White plaster casts may be cleaned by

making a thick paste of cold starch, with which the figure should be covered, using a brush for the purpose. When the starch dries, knock it off in light takes and brush with a clean, soft brush or wipe with a clean, soft brush or wipe with a clean cloth.

Pineapple and Edam cheese should be cut so that the top will fit on again, and thus exclude the air and keep the cheese in good condition. A large piece of any other kind of cheese is preserved by wrapping it well in a large square of cheesecloth, dipped and then wrung out of clder vinegar.

Whenever it is possible hair brushe should be cleaned with powder, well rubbed in, and allowed to stay some time and then rubbed out on a cloth. It is the greatest mistake to allow the ivory or silver to be submerged in water; it spoils the color of the ivory. When bristles must be washed, put lumps of soda in luke warm water and keep dipping them in till clean, and then into cold water and allow them to dry with the bristles turned down

When it is desirable to beat the whiteof eggs to a stiff froth do not use new tin, as it is said to prevent their getting light. An earthen dish will give much more satisfactory results. Begin slowly gradually increasing the speed as the eggs become light; this rule holds good whether a fork, knife or patent egg-beater is used. If the eggs have a tendency to become snowy, that is, if they separate into flakes and will not stick to the bowl, add a drop or two of lemon juice and you can soon beat them into a proper firmness, when tains that tobacco is not only permissi-ble, but actually of value in the case they must be used at once, or they will be
