IT CURES DISEASE!

The Medical Profession indorses Paine's Celery Compound.

This is from the writer of the prize thesis on Original Research, awarded by the Midico Chirurgical College in 1892, and published by the American Medical Press company of Philadelphia:

In torpidity of the liver and nervous debility and kidney disorders, Paine's celery compound acts like a charm, restoring the general nervous system and these organs to their normal activity very speedily. It is of inestimable value, and possesses a wider range of action by far than any of its kindred remedies.

Forest City Poor Board.

Editor of The Tribune. Sir: I notice in your most valuable paper of the 5th, Forest City items, an item reflecting on the poor board of Forest City in connection with the case of Berry Robinson and George Carpenter. pany of much merit interpreted the two colored gentlemen who were employed on the construction of the Rockeliff Water company's dam here last summer.

I do not know whether your correspond-ent is in the habit of telling barefaced lies or whether he has been misinformed. Two Arrests Vesterday and More Will It certainly is one or the other. Mr. Bobinson applied for relief. He told Mr. Bates that if he would send a load of coal Kropia, of Richmondale, were yester-day arrested on complaint of County your correspondent will be a little more after his Secretary Forest City Poor Board.

He Favors Hanging.

Editor of The Tribune. Sir: Seeing your editorials of March i n capital punishment, I desire to make ew remarks. The figures you give are in eresting and offer ample food for though on the subject. Your remark, "the trouble with capital punishment is that the figure are all against it," is correct. In 1886 the 1.449 murders should ha vebeen follower 1.49 murders should ha vescen followed up with 1.49 hangings; those of 1887 and the subsequent years also by exactly corresponding numbers. I will even knock off 50 per cent, on the whole lot for extenuating circumstances. If that had been done, the record of 1894 would not have shown the enormous figure of 8,000 murders, not 800, and probably not 80. So long as only one murderer out of thirty, or even out of sixty, pulls the rope the others will take their chances, and the theory of hanging has but a mighty poor trial. By your own figures it is shown that the less hanging the more murder in proportion. Old Moses said 'an eye for an eye, a tooth for a tooth,' and he had a very level head; the words are good today. When 50 per cent, of our murderers are legally hung it will be : great blessing for the general public, and then, Mr. Editor, we will have another conversation on this interesting topic. I expect then to claim you as a convert to James Jackson. New York, Mach 6.
