\$5 REWARD!

So many complaints of irregular delivery have reached us, which we have traced to stolen papers, that we now offer \$5 reward for information that will lead to the conviction of any person caught stealing The Tribune from the doorsteps of regular subscribers.

CITY NOTES.

Each branch of councils will meet to-night.

School teachers and janitors will be paid today.

Thomas Ferry, alias Thomas Harvey, was discharged from the county jail yesterday.

In the case of Charles P. Hallock against Stroud & Chamberlain, court yesterday refused to grant a new trial.

The Ladies' Aid society of Elm Park church will serve supper this evening from 5 to 8 o'clock, to which all are cordially invited.

The sale of seats will open this morning at the Academy of Music box office for the engagement of Mr. and Mrs. Kendall in "The Second Mrs. Tanqueray."

The sale of tickets for the Yale Glee club concert to be given next Wednesday night in the Frothingham, will open at Powell's at 8 o'clock this morning.

Ex-Register of Wills H. T. Koehler has entered into partnership with Charles W. Schank, the shoe dealer, whose place of business is located at 419 Spruce street.

Among the other urgent things purchased for Mr. and Mrs. George B. Carter's new studio at 124 Adams avenue, is a fine mahogany baby grand Weber piano.

Mrs. M. Eleanor Coleman asked the court yesterday to grant her a divorce from Robert Coleman, to whom she was married at Mauch Chunk on July 23, 1890. Desolation is the ground on which the divorce is asked. Mrs. Barbara Davis asked for a divorce from James E. Davis, alleging cruel and barbarous treatment. They were married May 19, 1886.

Mrs. N. Y. Leet has kindly proffered her residence to the managers of the Home next Saturday afternoon from 2 o'clock to 6 o'clock. Articles suitable for Easter gifts will be on sale and light refreshments will be served for 25 cents. Mrs. Leet, assisted by the ladies of the board, will welcome all who come. The Home needs funds. Let the attendance be large.

The board of health, through Secretary Briggs, has requested Mayor Connell to appoint Richard Thomas food inspector for another year. It is probable that the request will be complied with. The board has also requested the mayor to issue a proclamation urging residents to remove vegetable matter from their premises and to guard against other unsanitary things incident to spring.

President Grier, of common council, with the assistance of Clerk Hutton, was busily engaged yesterday in preparing a list of committees and chairmanships for the fiscal year of 1895. The appointments will be announced at tonight's meeting. The most important chairmanships will not be held by Democrats and the Neill-Hickey-Sweeney-Roagan-Battle contingent will be out in the very wet rain.

The Catholic Total Abstinence of the Second district will meet next Sunday in St. Paul's armory to discuss important papers on the temperance question. A full delegation has been elected from each society. This convention promises to be an interesting one, as it is the one preceding the general convention in May. Changes in the constitution will be considered, and if adopted, will receive the endorsement at the general convention of the delegation from this district.

The annual gymnastic exhibition of the Young Men's Christian association will occur tonight at the Academy of Music. It is creating a great deal of talk among the members, as it will be the largest ever given, and the proceeds will go toward putting in a swimming tank and furnishing the gymnasium. The exhibition will open with a grand tableau by 200 men, boys and ladies. The drill by the masses will be most novel and there will be interesting, fancy club swinging and juggling.

member our telephone number is 2212 in East plumbing work. W. G. Doud, 140 Oakford court, Scranton, Pa.

Buy the Weber and get the best. At Queney Bros.

Annual Gymnastic Exhibition of the Y. M. C. A., April 11.

WILL BE ANOTHER TRIAL

Jury in Dickinson Case Could Not Come to an Agreement.

DISMISSED BY JUDGE ACHESON

On Account of the Death of Injured Greene's Wife the Judge Concluded Not to Compel Jurors to Stay Together Until They Agreed.

Anna Elizabeth Dickinson's notable \$50,000 trespass suit against Dr. Gideon Underwood, Dr. John B. Hellman, George R. Thompson, J. Harry Bryden and Allan Eggleston, all of West Pittston borough, will be tried by the jury again. The jury could not agree upon a verdict and were discharged at 8 o'clock yesterday morning by Judge Acheson.

The case was watched from the beginning with the most widespread interest and attracted attention from all over the United States. Miss Dickinson was certainly the most brilliant woman that ever figured in either the high or common courts of this country, and the fact of her incarceration in an insane asylum at the instance of her sister, Stephen Dickinson, gave a romantic shading to the case. The defendants were brought into the suit through the assistance they lent in having the plaintiff removed to the asylum.

The trial was begun in this city on Monday, March 25, before Hon. Marcus W. Acheson, of Pittsburgh, judge of the United States circuit court. The case had not ended that week and when it was resumed on Monday morning, April 1, a telegram was received by one of the jurors, John J. Greene, a merchant of McCrays, Forest county, to the effect that his wife was dying, and with the consent of attorneys on both sides, the case was adjourned for one week. It was resumed again Monday of this week, and went to the jury Tuesday afternoon at 3 o'clock.

Why They Were Discharged.

The defendants were ably defended by Attorneys Major Everett Warren, of this city, George S. Peris, W. I. Hibbs and J. N. Anderson, of West Pittston, and Judge A. H. Dwyer, of the law firm of Dwyer, Bell & Crane, of Brooklyn, N. Y., an attorney of wide and varied experience of forty years, and Attorney W. J. McLean, a prominent member of the Luzerne bar, represented Miss Dickinson in her suit. John Power O'Connor, of the Truth, was selected to take stenographic notes of the testimony. A. H. Dwyer, of the law firm of Dwyer, Bell & Crane, of Brooklyn, N. Y., an attorney of wide and varied experience of forty years, and Attorney W. J. McLean, a prominent member of the Luzerne bar, represented Miss Dickinson in her suit. John Power O'Connor, of the Truth, was selected to take stenographic notes of the testimony. A. H. Dwyer, of the law firm of Dwyer, Bell & Crane, of Brooklyn, N. Y., an attorney of wide and varied experience of forty years, and Attorney W. J. McLean, a prominent member of the Luzerne bar, represented Miss Dickinson in her suit.

The jury selected to hear the evidence and render a verdict was: John Q. A. Boyd, painter, West Middleton, Washington county; J. W. Carhill, farmer, Jackson, Susquehanna county; John D. Frane, hotelkeeper, West Middleton, Washington; John J. Greene, McCrays, Forest; Erastus Hoffman, gentleman, Sunbury, Northumberland; W. H. Madden, farmer, Orbisonia, Huntingdon; M. J. McMahon, grocer, Hagerstown, Allegany; Henry Kraft, miller, Neff's Mills, Huntingdon; James L. Ruffner, salesman, Uniontown, Fayette; H. A. Swan, justice of the peace, Coalport, Clearfield; Miles Smith, banker, Reimsburg, Clarion county.

Mr. Hoffman was Foreman.

The aforesaid gentlemen retired to deliberate at 3 o'clock yesterday afternoon and were guided by Thomas H. Kelley, ex-jury commissioner, who was a bailiff of the court during the trial. After reaching the jury room they appointed Erastus Hoffman foreman, and then took a ballot, which resulted in eight for a verdict for Miss Dickinson and four for the defendants. The four who voted in the negative were: John J. Greene, Henry Kraft, Francis Donahoe and Foreman Erastus Hoffman.

Mr. McMahon undertook the task of attempting to persuade the four recalcitrant jurors who wanted to favor the defendants that Miss Dickinson deserved a large reward, but his efforts in eloquence was lost upon them. Bailiff Kelley was sent for a consignment of Pittsburgh stories and from that on until midnight the time was spent in story telling, debates upon the income tax, and smoking. Juror Greene, whose wife had died, sent a note to Judge Acheson during the night that the jury could not agree and at 8 o'clock yesterday morning they were marched before the judge and discharged from further consideration of the case.

Court informed the jurors that the death of Mr. Greene's wife had taken into account and for that reason they would be allowed to go to their homes; but if that circumstance had not entered into the case, Judge Acheson informed them that he would have kept them together until they should agree. Marshall W. A. Walker arrived at 5 o'clock yesterday morning and drew warrants for the pay of the Jurymen. Mr. Greene left at 9:45 for home.

Attorneys in the Case.

The eight jurors who favored a verdict for Miss Dickinson called at the Wyoming House and wished to see her before their departure. She was ill and they had to be disappointed, but Judge Bailey, each by the hand and thanked them for Miss Dickinson. They wrote their names upon a sheet of paper with the title friend appended after each name and sent it to her room. Judge Bailey informed a Tribune reporter that one of the Jurymen said he would vote to give Miss Dickinson \$100,000.

In the afternoon Miss Dickinson was interviewed by a Tribune representative in her room at the Wyoming. She was not downcast at the status of the case and felt confident that the next time the turn of affairs will be in her favor. She declared that she never was a coward in the past and did not intend to turn one now. The case will be retried in September. She has two other suits pending when this one is finally disposed of: one against Dr. Gideon Underwood, individually, and one against Dr. James Oglesby, of Danville.

Miss Dickinson intends to lecture in this city within a week on Joan of Arc. Referring to the remarks she made about Major Warren, she said that the information was volunteered to her by John H. Harris. Mr. Harris, she said, thrust himself upon her, made himself obnoxious and asked the privilege of sending bouquets to her room. Mr. Harris had asked Miss Dickinson if she could not teach him to be eloquent, saying that he wished to become a more proficient orator.

She intends, she said, in her lecture in this city to pay her respects to some well-known people. The women of Scranton, she believes, are in sympathy with her.

COMMON PLEAS COURT.

Two Important Trespass Suits Are on Trial.

In the main court room before Judge Archibald the trespass suit of Mrs. Ann

Munley, of the West Side, against the city of Scranton, was called for trial yesterday morning. Attorneys Joseph O'Brien and I. H. Burns are conducting the plaintiff's side of the case and City Solicitor James H. Torrey and Attorney E. N. Willard appear for the city.

Mrs. Munley seeks to recover damages for the death of her husband, who was killed by falling into the arseway of the lot at No. 17 Lackawanna avenue on the night of Nov. 24, 1889. At the time of the accident the Munleys resided at Archibald and Mr. Munley was on his way to the Delaware and Hudson station to get aboard a train going to his home.

At that time a new building was being erected at the place where the accident occurred and a temporary sidewalk had been laid in front of the property. This sidewalk, it is alleged, was improperly constructed and guarded and in consequence Mr. Munley fell off and was killed.

Case Was Tried Before.

This case has been passed upon by a jury before. The suit was first tried against John Hull, the owner of the property, but it was decided that he was not responsible, as the city was charged with the supervision of sidewalks. Several months ago the action against the city was heard and a verdict for Mrs. Munley returned. This was afterwards set aside by Judge Archibald and a new trial granted.

When the plaintiff rested yesterday, City Solicitor Torrey applied for a nonsuit on the ground that no negligence on the part of the city had been shown. Judge Archibald refused the motion and decided to have all the evidence heard. Ex-Police Officer Anthony Welsh was called for the defense and swore that Munley was intoxicated on the night of the accident.

The case of James Flynn against C. S. Jacobs was heard before Judge Gunster, and a verdict of \$25.77 returned in favor of the plaintiff.

Another Trespass Suit.

Before Judge Simonson, in court room No. 2, the trespass suit of Mrs. Margaret Hughes against the Delaware and Hudson Canal company was tried. Major Everett Warren and ex-Judge H. A. Knapp appeared for the plaintiff and ex-Judge W. H. Jessup and Attorney William Jessup for the defendant company.

The plaintiff was the wife of William Hughes, who was killed in September, 1890, at the Carbon street crossing of the Delaware and Hudson Canal company. In this city. She was the first witness called, and testified that on Sept. 31, 1890, her husband, in company with David Y. Jones, left home with his horse and buggy at about 6 o'clock in the evening to go to Providence. She first learned of the accident about 11 o'clock that evening when she was informed that her husband was at the Lackawanna hospital. He died thirteen days after the accident.

David Y. Jones, who was with Mr. Hughes at the time of the accident, testified that when he and Mr. Hughes drove down Carbon street they stopped about forty feet from the crossing to allow a coal train to pass which was going north. After the coal train had passed they drove slowly to the crossing. Owing to the buildings on the north side of Carbon street it is impossible for one to see a train coming south towards Scranton until the track is reached.

Stopped a Second Time.

When they arrived near the track they stopped a second time, but they did not hear or see any train coming and so they made an attempt to cross the track and were run into by a train coming toward Scranton. Mr. Jones said there was no watchman at the crossing. Witnesses for plaintiff were still being heard when court adjourned.

Action on a Mechanic's Lien.

Before Judge Gunster the action of Spruks Brothers against Charles Murch to recover \$250.00 on a mechanic's lien was heard. The claim is for material furnished to a house erected by the defendant. All of the testimony for the plaintiffs was in when court adjourned. The defense will be heard this morning.

CLOSE OF THE TERM.

Commencement Exercises at Y. M. C. A. Hall Monday Night.

As a special attraction for the Young Men's Christian association evening school on Monday evening, April 15, Secretary Mahy has secured the well-known Mary Male quartette, of Brooklyn, who will sing several selections during the exercises.

The programme as arranged will include addresses by the president and local workers; presentation of certificates; refunding of deposit fees to students who have won certificates; inspection of educational exhibit; singing by the Mary Male quartette, and refreshments, partaken of to the accompaniment of orchestral music.

This will give the students who have spent long winter evenings in hard work—often following a long day of harder work—a rare evening of enjoyment and a pleasant memory for the coming summer months.

On the evening following the commencement exercises the Mary Male quartette will give an opportunity to the general public to hear them by rendering an excellent concert programme in Association hall.

PROBLEM HAS BEEN SOLVED

Is Now Possible to Manufacture Glass Water Pipes.

SO INVENTOR BONTA SAYS

Model of His Invention Attracts Many Prominent Business Men—May Revolutionize the Use of Building Materials—Invention Described.

The model of an invention which may within a comparatively short time completely revolutionize the use of certain building and other materials, rests in an insignificant looking hardware box in an office on the second floor of the building at Franklin and Lackawanna avenue. The model is just as insignificant looking as the wooden box, nevertheless many prominent Scranton business men and high-salaried mechanics called to take a squint at the thing yesterday.

It is claimed by the inventor, J. W. Bonta, that he has solved the problem of making tubular or hollow glass pipe of any thickness or length and which can surely be used for the same purposes as water pipe and possibly for building purposes. At all events if the claim is substantiated that the pipe can be manufactured and can be used as a water carrier it will reduce mine expenses alone millions of dollars per year; in fact, the money saving will be limitless. This explains why the invention was examined so closely yesterday.

An uninformed person might imagine it a very easy thing to make glass pipe by pouring a quantity of molten glass into a mold and withdrawing the inner mold or core after the glass had cooled or "set." That is just what cannot be done. Such a process is impossible from the fact that when molten glass cools it shrinks more than any other known substance. So a mechanic will readily see that glass cannot be moulded the same as iron. The glass would contract in cooling until it clutched the inner mold as in a vise and would break into bits. This explanation is necessary, in order to understand why inventors have labored to produce some kind of inner mold which will yield to the pressure upon it. Mr. Bonta seems to have hit upon the idea and a patent of his invention is now pending in Washington.

Idea of the Invention.

The idea of the invention is very simple. The mechanical part is a little more difficult to understand, yet, too, is simple. Briefly it consists of a round core in four sections running lengthwise and laid in a horizontal flask, or outer mold. The slight spaces between the sections of the core are each occupied by a piece of metal of the same length as the section.

The molten glass is poured into the flask and over the sectional core. The glass begins to shrink or contract and it is during this critical period that it might close about the core with such force as to break into bits. By Mr. Bonta's invention the core can be made to auto contract and the breakage is prevented.

As soon as the melted glass begins to cool, a workman turns a lever which withdraws the long keys occupying the space between the sections of the core. By turning the lever still further the sections of the core sink slowly toward the center, being controlled, of course, by the lever. The glass has then thoroughly cooled, the core is withdrawn and there you are—a piece of glass pipe several feet long has passed through the principle process of manufacture. The rest is easy. The pipe is shoved into an annealing oven, the heat of which swells the pores together and makes the pipe air and water tight.

It will be understood that while the glass is hot a thread is cut on each end of the pipe, by a process similar to that of cutting a thread on an iron bolt. The lengths of pipe are joined together by glass "collars" made by the same process as the pipe.

But there yet remains another important thing. Will the pipes leak when they are joined together by the collars? No, they will not; but they might leak only for a cement made out of pulverized glass and chemicals, which hardens like flint and which cannot be softened or rotted by any known chemical except acid made out of ether.

They Will Not Corrode.

The Tribune has one special motive in describing the invention so minutely. Why may not glass pipes be used to take the place of iron pipes in the mines and which have to be renewed every six months or year because of the corrosive action of sulphur water? If the cost of pipes made of glass were greater than the cost of iron pipes, or if the glass pipes had less strength

than those of iron there would be no object in considering Mr. Bonta's idea. But the facts are exactly contrary to such a supposition. The manufacture of the glass pipes will not involve a large cost; in fact the price of the finished article will be at least 50 per cent. less than the price of an iron pipe of equal length. Then, too, although glass is more brittle than iron, it will sustain more pressure.

Mr. Jarvis, of the Berlin Bridge company, one of the foremost engineers of this country, in speaking of Mr. Bonta's invention said: "There have been only two great changes in building methods since the world began; wood was used in place of stone, and now we are using iron instead of wood. The next important step will be from iron to glass. Glass is cheaper and stronger. The matter hinges only upon the possibility of manufacture." To a Tribune reporter yesterday Mr. Bonta read over Mr. Jarvis' words and then told something of how glass is manufactured, or rather its composition. Briefly, glass is composed of pulverized conglomerate rock, lime and soda ash, and is melted almost nothing, and only small quantities of time and soda ash are used.

The foregoing facts are as related by Mr. Bonta to a Tribune reporter yesterday while a number of gentlemen were examining the model of the invention.

BOARD OF EXAMINERS.

They Were Reappointed by Judge Archibald Yesterday.

Judge Archibald made an order yesterday reappointing Vaughan Richards, of Dickinson City, and James E. Morrison, of Carbonade, practical miners, and A. Patton, of Olyphant, superintendent, a board to assist the mine inspector of the First district to examine applicants for certificates as mine foremen and assistant mine foremen.

In the second district, Benjamin Griffiths, of Hyde Park, and Philip Mulderig, of Minooka, miners, and James Young, of Dunmore, superintendent, were reappointed.
