#### IMPROVING SLOWLY.

State of Trade According to Dun's Weekly Review Is Still Encouraging. Increase in Railroad Earnings.

New York, April 12.-R. G. Dun & Co.'s weekly review of trade tomorrow will say:

Progress toward better business con-Good Friday services were conducted tinues, but it is slow and meets may in many of the West Side churches. At obstacles. In speculative aspects, and the German Presbyterian church, on in wholesale demand for goods the week Chestnut street, the paster, Rev. F. A. shows improvements. Money markets Paule, conducted services at 10.30, 1.30 are undisturbed and a little more acand 7.30 o'clock. The services were tive. But among the chief obstacles is largely attended. Rev. J. B. Whelan the anxiety of operatives to secure better wages, even while many manufac-Patrick's church last evening. His turing works are running without sermon was impressive and contained profit, and others at the risk of loss. tance having thrown out about 12,000 workers this week. Retail trade has the approach of Easter brings more business. Crop prospects will greatly affect the course of trade for some months, and the government report has sumers, the worst feature is the rapid advance in meats.

For the first time in a long period Britain also, owing to different causes, a slight advanced occurred in March. On both sides of the ocean the lowest level ever known may naturally be folowd by some risk.

Railroad earnings for the first week per cent. over last year. Stocks show Ye the Lord," announcements and eve- London is tame and narrow. Money is easier, and supplies are again from the interior, while foreign exchange has been at the exporting point. More commercial paper is now offering, principally in dry goods, though the amount is

Fallures for the week were 207 in the United States, against 218 last year, and 27 in Canada, against 34 last year.

#### VICTIM OF THE MAFIA.

Orfino, Hounded by the Cut-thronts, Commits Suicide. Scotdale, Pa., April 12.-Sidero Arfino, an Italian laborer, committed suicide yesterday by throwing himself in front of a freight train. When he lived in New Orleans several years ago he incurred the enmity of the Mafia, and in fight stabbed a member of the society of assassins. Then he wandered north but they followed him everywhere, and he returned to his old home in Italy, where his wife and family lived. He has resurced his duties in Davies' drag had been there but a short time before his enemies discovered him and he sailed for this country again. His landing in New York was noted by the Mafia there and he sought safety in the coal region of western Pennsyl-

> About a month ago he obtained emploment upon the construction of a sewer here. He told the story of his persecution to some of his fellow-workmen, who were Americans and said he would never run away from the Mafia again. They were incredulous and questioned some Italians upon the subject. Their doing so was fatal to Orfino. In a few days he received a Mafia letter warning him to leave the coke region, or suffer instant death He preferred to take his own life.

### OIL HOUSE BURNED.

One of the Standard Plants at Wilkes Barre Destroyed.

Wilkes-Barre, Pa., April 12,-A flire broke out in the oil house of the Atlantic Refining company here at noon today. Two of the large tanks containing several thousand gallons of oil exploded during the conflagration, and some of the firemen had a narrow es-

At 7 o'clock tonight the fire was still burning, but is being held in check by the firemen and it is considered that all danger is past. Late this afternoon the walls of the massive buildings fel with a terrible crash, but, fortunately, no one was injured. The smoke from the burning oil came thick and black, and the city and surrounding towns were for a time enveloped in dark-

The plant is a part of the Standard Oil company, that never car es an insurance anywhere.

#### GEORGE BRETZ DEAD.

The Inventor of the Largest Camera Ex-

pires at Pottsville Pottsville, Pa., April 12.—George M. Bretz, photographer, artist, inventor and lecturer, died at his home here at 3 o'clock this morning, after an illness of about two months. He was 53 years old. He was for years a science pho-

tographer. He was the inventor of a camera that took the largest negative ever photographed in the world, and his views of Niagara Falls and cities like Scranton and Wilkes-Barre, were very fine. He was a prominent Mason and a member of the Grand Army of the Republic

A number of empty boxes at Brown's stable on Ninth street were discovered to be on fire at 1.30 this morning. An alarm was sounded from box 31, but the fire was extinguished before the arrival of the fire

## WANT PROTECTION

Blacksmiths of the City Porm an Organization.

OBJECTS THAT ARE IN VIEW

To Have Horseshoeing Done on Mo-Scientific Principles, Have a Uniform Scale of Price and Force Delinquents to Settle Up.

Blacksmiths of Scranton have for ome time been considering the advisability of uniting and becoming a branch of the Master Horseshoers' National association of the United States, and representatives of nearly every shop in the city assembled last night at Raub's hall. James F. McAnulty, a prominent veterinary surgeon of Philadelphia, is chairman of the committee on literature, science and anatomy of the National association, and he was present last night, and after W. A. St. John had been selected temporary chairman, Dr. McAnulty was introduced and addressed the blacksmiths assembled. He had several copies of the by-laws of the National association with him, and he quoted from the articles of constitution in explaining the object of the organiza-

The present Master Horseshoers' Na tional association originated in Cleveland, O., in July, 1892, and at a convention held in that city there were seven cities represented. Now there are 52 ocals, representing 52 cities, that have national charters, and five state assoclations in Michigan, New York, Illinois, Minnesota and Missouri. A committee on literature, science and anatomy has charge of the educational features of the association, and through the efforts of these committees there anatomy of the foot and leg of the horse, and dissecting of the same is of veterinary science

Must Pass Examination.

Apprentices are required to pass an examination on the anatomy of the foot and leg of the horse, and to have four years' practical experience at horseshoeing, before being granted certificates to practice the art of farriery or be employed in shops that are jointed in the National association.

Besides raising the standard of apprentices, the object is to unite the improved on the whole since March, as | master blacksmiths and horseshoers of the city for their mutual benefit and advantage, by fixing a uniform schedule of prices for work in the shops. Each member upon initiation is required to ittle influence to discourage. For con- take a solemn oath to live up to the constitution and by-laws, which provide that the recipocal interests of one another shall be the uppermost object rices of commodities average a shade of the members. Instead of cutting higher than a year ago, and in Great prices in order to draw trade the shops will proceed hand in hand together and charge a uniform price for work done. Another feature will be that dishon

est persons will not be enabled to pile up debts at the various shops. When Railroad earnings for the first week a man neglects to pay for his horse-of April show an increase less than 1 shoeing within a reasonable length of time, his name is enrolled among the scarcely any change for the week. The list of "deadheads," and no other black-business, even with a little buying by smith will do work for that man until he settles his account.

Uniform Schedule of Prices. is proposed to levy a uniform schedule of rates for horseshoeing that will not be exorbitant, but at the same time will be considered a good price and will enable all to make a fair profit. The blacksmith who does not join the association will find himself compelled to do so through force of circumsciances, as the wholesale hardware dealers have agreed to refuse to sell to any who refuse to join.

The initiation fee was fixed at \$5 for the time being, and the following permanent organization was affected President, W. A. St. John; first vice president, Fred Weyandt; second vice president, Thomas McLean; recording and financial secretary, R. T. Gould treasurer, M. Jordan; sergeant-at-arms Simon Dorfmann; board of trustees, for one year, Edward Altemose, Joseph Mauer and Fred Snell. The next meeting will be held Friday evening.

#### JAPAN WILL TAKE SILVER.

This Is Thought to Be One of the cessions.

Washington, April 12 .- If the inese indemnity is to be paid in of silver, as appears to be the conce of official opinion in Washington, is one of the concessions made to Cl ma, which were referred in the official advices received today.

Although silver is practically the of which is 99.7 cents compared with the United States gold dollar.

#### BROCKLYN OIL BOOM.

All of the Prospectors Have Lost Nerve Except Monte Christo Nash.

Montrose, April 12.-Judging from the appearance of the Montrose and Brooklyn members of the New York and Pennsylvania Oil company, as they tmerged from the Tarbell house yesterday evening, every one had "that tired

The Tribune correspondent was un

### A STARTLING FACT.

Sixteen Per Cent, of Life Insurance Ap plicants Rejected on Account Diseased Kidneys.

Dr. Lambert, the general medical director of the Equitable Life Insurance com-pany, New York, is reported to have said: We reject 16 per cent, of the applications for insurance, and I have saved the entire expense of this medical department by the rejection of applicants who had diseased kidneys, and who died within two years after I rejected them."

This appaling statement should have the attention of our citizens. There is no rea-son today why people should allow kidney disease to get such a hold on them. Nature sends her warning in the slight pain back, poor circulation of the blood, sediment in the urine. When any of thes symptoms appear, Dr. David Kennedy Favorite Remedy should be taken in small doses at once, and thus drive the poison out of the blood and restore the kidneys to healthy action. To our knowledge this is the only medicine that surely cures this almost universal complaint.

We note the recovery of Mr. Oscar Lambert, of Jerico, Mo., whose case has been talked of in the papers the world over. Quoting from his letter to the Press, Mr. Lambert says: "I neglected the first symp-toms until I found myself in bed with a toms until I found myself in bed with a complicated disease of the kidneys. No mortal ever suffered more and lived. My physician failed to help me. I then used Dr. David Kennedy's Favorite Remedy. It relieved my kidneys almost immediate-ly, and in a few weeks I was clear of all relieved entirely cured.

pain, and entirely cured."
Favorite Remedy has had more free advertising in the columns of the daily papers than anything we know of, from the fact that it does as is promised—Cures dis-

held behind closed doors. After a session of two hours several stockholders were approached, but all were as mealymouthed as could be expected from the

result of the prospecting.
Superintendent Nash said: "I have nothing to say whatever." "Do you still believe there is oil

there?" was asked. "I most certainly do," said he, as with hands thrust deep into his trousers pockets he mustered up courage, and tried to "whistle an air did he."

It was learned that \$8,000 had been sunk by Montrose capitalists and one of them remarked that it had been put in a hole and the hole pulled up. It is rumored that there is consider-

able dissatisfaction among the stockholders at the action of the superintendent in plugging the well and taking out all the tubing. It is claimed, however, that the tubing was blasted by a charge of dynamite while Mr .Nash was absent at dinner and without his knowledge. It was necessary to do this in order to remove it.

The Republican, which will appear on Saturday, gives a description of the matter, which, on the whole, is decidedly perforated.

#### THERE IS NO MONOPOLY.

The National Provisioner Asserts That it Would Be Impossible for Capitalists to Corner Beef.

New York, April 12.-The following editorial will appear in the National Provisioner, the organ of the meat and provision trades, tomorrow:

No more absurd theory has been advanced for some time than the recent attempts which have been made to make the consuming public of this country believe that the shortage in cattle, now so apparent everywhere, is due to any other than natural causes. With a wisdom, however, begotten of ignorance and inability or disinclinahave been established seven schools of tion to accurately investigate false and anatomy and scientific horseshoeing, in erroneous news, it has been trumpeted in which are delivered lectures on the every state in the Union to such an extent that the greater proportion of the people of America are under the imdemonstrated by prominent professors pression today that this great food product is tied up in the vicious grasp of a monopoly. It is absurd and unjust to couple the names of reputable business houses with conditions for which they

are in no way responsible. It would be an absolute impossibility for any combination of men, no matter what the extent of their capital was to corner the beef or cattle market, and the money has not been minted that can do it. The farmer cannot be expected to breed cattle if it does not pay him to do so, and he will breed them in spite of everything if it does pay him. Whichever he elects to do will result in either extreme too much or too little, but any extreme will quickly be governed by supply and demand, and the markets will be according.

#### AN ALLIANCE FIEND.

John Yongling Beats His Little Daughte and Shoots a Man Who Interferes. Alliance, Ohio., April 12.—The town of Minerva, ten miles south of here, is greatly excited today on account of the attempted murder of a prominent citizen. John Yengling, son of G. F. Yengling, president of the Minerva Baking company, quarrelled with his wife last evening and attempted to shoot her She escaped from the house, when Yeng ling began to beat his little daughter. Thomas E. Booth, one of the best known citizens of the town, was attracted by the screams of the child. He attempted to rescue the little girl, when Yengling, with a curse, fired two shots

One bullet ente going through the tongue. As the scene of the shooting was on the public ling was subdued and placed in jail, products in this country. The re-The jail is being strongly guarded, as Mr. Booth's condition this morning is critical and the feeling against Yengling is intense.

#### OUR FOREIGN COUSINS.

The French government has granted \$30,000 for further excavations the French School of Athens at Delphi. Portugal will dispatch a fresh military xpedition to Delagoa Bay in April, when season will be more favorable for

military operations. A royal decree has been published at Athens appointing a commission under the presidency of the crown prince to organize the Olympian games in 1896. Gendarmes have succeeded in surprising

and arresting without bloodshed a notori-ous brigand band of twenty persons that had long terrorized the district of Girgen-Glasgow is said to be satisfied with its

experiment of running the street car lines. Although some of the fares are as low as one cent, the pecuniary result has been satisfactory. The British and Foreign Anti-Slavers money of Japan, the standard of the society has received an intimation that country is the gold yen, the fixed value the contract for supplying 1,000,000 Chinese coolies for servile labor in Brazil, against which the society had entered a strong

protest, had been withdrawn. The election of Prince Bismarck to the honorary citizenship of the larger towns n Baden was not affected without erable opposition, especially at Mannhelm, where sixty-six town councilors voted for and thirty-eight against the mo

In consequence of representations made by the British ambasador, the porte has sent instructions to the Governor of Beyrout to cancel the new regulation prohib-iting travelers going into the interior without a special permit from Constanti-

Anti-ear croppers in England are rejoic ranks. In answer to an inquiry by the vice president of the Bulldog club, the Prince of Wales has written a strong letter in condemnation of this barbarous

nutilation of dogs.

During a debate in the legislative council at Calcutta lately Sir George White, comander-in-chief, said that practically 50 per cent. of the entire strength of the British army were in hospital service in the year 1893 suffering from certain forms of disease, and he believed the record of

1894 would be found to be worse The Russian minister of finance has taken measures for promoting cotton pro state bank for the purpose. The bank will advance to growers sums sufficient to serve as working capital, and will also grant loans. Cotton spinners and weavers will be supplied by the bank with mean for purchasing cotton.

Lager beer is ousting English ale and stout from the markets of the world. Five years ago British brewers exported 599,00 barrels, but since then an unusual de-crease has been recorded, and the last fig-ures stood at 412,351 barrels. On the other hand German and Austrian brewers gaining in prosperity annually and are increasing their exports enormously every year. The last report shows that German exports have reached 66,000,000 gallons per

# Health Hints and

Suggestions That May Save You Many a Doctor's Bill.

WISDOM FOR THE HOUSEHOLD

These Hints Don't Cost Much, Are Not Copyrighted, and if They Don't Do You Any Good, They'll Not

Do You Any Harm. The agricultural department Washington is nearing the close of a long and very interesting series of insquare, a growd soon arrived and Yeng- vestigations in the adulteration of food searches have been encyclopedic in their scope, and are intended to embrace all varieties of food staples. They date back to 1887, and when completed will form a volume of ten chapters Eight of these have already been issued in the form of department bulletins, and the ninth is now being prepared for the press and may be expected in the course of a few weeks. In speaking to a reporter recently on the subject of adulterants in general, Professor Wiley, who has the investigation in hand, said: "The most of the adulterants used are entirely harmless, but at the same time entirely valueless for food purposes. In other cases, such as the substitution of cotton seed oil for olive oil, they are right for food purposes, but an imposition in point of price; for we have gotten any number of samples of 'olive oil' at \$4 a gallon that was in reality an excellent quality of cotton seed oil, that was worth between 20 and 40 cents. Similarly we have found coffee selling at 40 cents a pound containing 25 per cent, of artificial coffee beans. These artificial beans are not myths, as some people suppose. If you like, I can show you The sample was in the a sample. shape of brown roasted beans that on close examination could aven hardly be told from the genuine article. Mixed with two parts of real beans, it would be almost impossible to detect them. "Those are made of scorched flour and molasses," said Professor Wiley, "and they are worth about 4 cents a pound. Or, rather. they cost about that. For coffee making they are worth absolutely nothing except to make the weak coffee muddy. The only way to get good coffee is to buy the good green beans and roast them as they are needed. Coffee roastcoated with a thin soluble varnish that A dealer can have no earthly object in

ed and kept loses the greater part of its volatile aroma, except in the case of some patent roasted coffees that are ing. In one week's time there will be keeps in the volatile substance. Coffee that is bought ready ground and roasted is almost invariably worthless. grinding his coffee before he sells it exgrinding his coffee before he sells it ex-cept to aid in adulteration. We have the Elsner-Mendelson company, of New gotten many samples of roasted and York, to erect a plant in the United State ground coffee that did not have a particle of coffee in them and were made of hann Hoff's Malt Extract, in 1892, the sale scorched rye and chicory. Now, a cerscorched rye and chicory. Now, a cer-tain amount of chicory in coffee is not on the American market. objectionable. The French prefer a small amount, as it mixes well with the equipped of its kind, and has a capacity to milk. I like a little chicory myself, for turn out nearly 10,000,000 bottles annually. the heavy, oily quality it gives the coffee, but one does not want to pay 40 cents for coffee that is made up half cents for coffee that is made up half plant is of the newest and best, and the of chicory at 5 cents a pound. The ar- material used, of the choicest. ticles of food most commonly adulterated are spices. Everything from cay enne pepper to cloves is matched in color by what they call 'fillers,' made of the ground shells of various nuts. When this finely ground material is mixed with the spice, no one in the world without a microscope could tell the difference. There is a regular business of manufacturing these fillers and we have a set of them to match

Take common starch and grind it with a knife until it is reduced to the smoothest powder, put it in a clean tin box, so as to have it continually Bros.

used in large quantities."

at hand for use. After washing your hands, rinse them thoroughly in clean water, wipe them, and while they are Rules of Hygiene yet damp rub a pinch of the starch whole surface. The effect is magical The rough smarting skin is cooled, soothed and healed.

> Charcoal is one of the most remarkable articles in common use, and pos sesses many qualities not generally understood by the laity. As an absorbent of bad odors it has no equal. Placed around articles of food it prevents decay and preserves them for a time in all their freshness. In fine powder it is one of the most perfect dressings for malignant wounds and those where proud flesh is present. As a cure for headache it is invaluable, a teasp ful in half a glass of water often affording immediate relief. The power of charcoal to absorb gases is not general ly appreciated. It will take up and old thirty volumes of ammonia, forty of nitrous oxide, sixty-five of sulphurous acid, and eighty-five of hydrochloric acid. Some of these gases may be withdrawn and used at will. storage value of charcoal, while it is just becoming known to practical workers, has already opened many avenues of future usefulness.

HEALTH FOR THE MILLION: Washing the hair repeatedly with vinegar or alcohol will destroy nits. For the relief of the catarrh in the head

here is nothing so helpful as a cleansing

antiseptic wash. Wash the face daily in sour milk or buttermilk-this is one of the simplest and best treatments for sunburn. Quinine sulphate, 20 grains to a pint of whisky, is a mild hair tonic. Rub on the

scalp with a small sponge every night. All hair dyes are harmful because of he lead they contain, and there is no remedy for premature grey hair except a Ringing noises in the head are as ofter

lue to anaemia as anything else. Take tablespoonful of pepto-mangan in half glass of cold milk three times a day fo one month. An excellent remedy for catarrh of the stomach and bowels is phosphate of sodi um. Take it for several months, once

daily a teaspoonful in teacupful of boil ing water (sip while hot) half an hou-before breakfast. Massage of the scalp will promote its nutrition and if the scalp be well nout ished the hair will not be so apt to fall out. The hair will be injured by too fre quent shampooing; once every week is often enough. Borax and water may b

used to cleanse the scalp. There is no drug to give one a memory Teach yourself to remember-begin at night and write down on paper everything you did since you arose from your bed in the morning. What you ate, where you went, to whom you spoke, etc.; omit noth marked improvement

Turtle shell hair pins at Davidow Bros

Home Industry. Since the firm of Johann Hoff, of Ber for the manufacture of the celebrated Lo of the article has increased enormously

The plant erected is one of the best This only proves that anything under-

taken in the United States is always on

arger and more elaborate scale than in the old country, even with an article which originated abroad nearly fifty years ago. "How to Cure All Skin Diseases." Simply apply "Swayno's Ointment." No internal medicine required. Cures tet-ter, eczema, 8tch, all eruptions on the face, hands, nose etc., leaving the skin clear white and healthy. Its great healing and

curative powers are possessed by no other remedy. Ask your druggist for Swayne's Ointment. any variety of ground spice. They are For plumbing and electric bells tele-phone 2242 to W. G. Doud & Co., 509 Lacks.
