ELECTRIC LOCOMOTIVE.

New Type Has Just Been Completed at the Baldwin Locomotive Works at Philadelphia.

Philadelphia, April 25.—An electric locomotive of a new type has just been completed at the Baldwin Locomotive works for the North American company, which operates the property of the Oregon and Transcontinental company and extensive street railway and electric lighting interests in Milwaukee. This locomotive was designed by Sprague, Duncan & Hutchinson, of New York, and it is intended for special experimental work in handling heavy freight and for switching purposes.

The locomotive resembles somewhat the ordinary consolidation type used for heavy freight yard work. There are four pairs of drivers coupled together by connecting rods. The drivers are 35 inches in diameter.

The motors, four in number, and alternating in position, are of the "continental" iron clad type, the field magnets consisting of two steel castings, having two field coils placed at the ends of the motors.

The controlling apparatus in the cab is so arranged that the engineer sits at the right side, looking forward, no matter which way he is running.

The total weight of the engine is about 124,000 pounds, equally distributed upon the drivers.

There is much excitement in the neighborhood over the robbery.

IN DEFENSE OF DURANT

His Attorneys Seek to Drag Dr. Gibson Into the Case.

THE TELL TALE HANDWRITING

Expert Monteth Discovers a Clue That Strengthens Durant's Cause—Theories Advanced as to Dr. Gibson's Part in the Affair.

San Francisco, April 25.—Dr. Gibson was again called to the stand on the resumption of the Durant examination this morning. He was asked for a specimen of his handwritings, but declined to give it. After some talk with counsel for the defense, however, the witness finally wrote his name on a piece of paper, and, at the request of the counsel he also wrote the name of George King, a professor who had been living there three years. He was in the newspaper in which the rings of Blanche Lamont were enclosed. It was evident from this that the defense were trying to connect Dr. Gibson with the Lamont tragedy.

BELLOW OF BEEF MAGNETS.

They Claim That Consumption Has Fallen Off Forty Per Cent. Since Secretary Morton Became Interested.

Chicago, April 25.—Referring to the agricultural department, that the rise in price of live stock had been less than one hundred pounds over the last year price, and that dressed beef was now five to ten cents higher in New York city, G. F. Swift, of Swift and company, in an interview today, said:

"I sold over a million and a quarter pounds of dressed beef in New York city last week at 8 1/2 cents per pound, and this same quality of beef brought 7 cents during the spring months of last year. It is claimed that the retail butchers are asking 25 to 30 cents a pound for this beef, but the secretary fails to mention that this price is for choice porterhouse, while other portions of the beefs sell as low as six cents. This talk by Secretary Morton has caused beef consumption to fall off nearly 40 per cent. throughout the country, and is one of the reasons why the retail butchers are asking high prices for beef. People are now buying mutton and pork instead of beef."

TOBACCO FACTORY FIRE.

Many Girls Leap from High Windows and Are Severely Injured.

Montreal, April 25.—Shortly after 6 o'clock this evening flames were discovered in the factory of the largest of the kind in Canada, and covering several acres of ground on Ontario street. The place was crowded with employees, many of them girls who were finishing their day's work and preparing to leave for their homes.

He suddenly left town a week ago today, about the time that Auditor Howe, of Reading, arrived to examine his books. A shortage of the foregoing sum was found and a warrant issued for his arrest. That not being forthcoming, Detective Lyons was sent here by the Fidelity and Deposit company, of Baltimore, Bickel's sureties. Bickel was found to have remained in the city, hiding in a friend's home.

READING READY TO FIGHT.

Will Stand by the Demand for 21 Per Cent. of Output.

Philadelphia, April 25.—In an interview today one of the receivers of the Reading Railroad company affirmed again the Reading's unalterable determination to have 21 per cent. of the anthracite coal output. This gentleman said that Reading did not propose to be coerced into the matter, and that the receivers had carefully considered the situation, and were of the unanimous opinion that Reading was not only entitled to 21 per cent., but even more of the output. He further added, significantly, that if the other companies agreed to give Reading the 21 per cent., well and good, but if they did
