THE TRIBUNE Is for Sale Daily at the D., L. and W.

SCRANTON, APRIL 20, 1895.

In consequence, of the addition of a Wilkes-Barre department, a slight change is necessary in The Tribune's make-up. The best page of sporting news in Northeastern Pennsylvania. will hereafter be found on the seventh instead of the second page; the mar-Ret reports, industrial news and suburban correspondence, on the eighth page; and the news of Luzerne county and contiguous territory on page second.

The Theft of Corinto.

If England's olaim against Nicaragua had been approved by a commission of arbitration, and if it had then been resisted by Nicaragua until further patience had become unreasonable, the landing of English troops at Corinto and the seizure by those troops of the principal Nicaraguan custom house for the purpose of forcing a collection of the sum at issue, while an unusual course of procedure, could have Pittsburg who have also equipped their excited little opposition in this country. Most persons would have dismissed the as is well explained in yesterday's Sunsubject from mind with the casual re- day News, which says: flection that Great Britain must be exceedingly hard up, to go to so much trouble merely to collect an item of some \$75,000 or \$80,000.

But what are the facts? In one of the periodical Central American revolutions, one Hatch, the British consul, was expelled and two or three other Englishmen subjected to annovance. For this offence, the Nicaraguan government is told by England that it must immediately pay over the sum which England demands, or else that sum will be collected by force. The plaintiff in this action is also, at once, the judge, the jury and the lord high executioner. Need as in a basket by the elastic yield-ing of the iron strips. These fenders are adjustable. It is true that the trolley cars ternational arbitration are indignantly rejected by England; and the little Nicaraguan government, with hardly a penny to its credit, is informed that unless within three days it shall deliver the money on board the chief Britishwarship lying off Corinto, troops will be landed and Nicaraguan property forcibly levied upon until the debt is satisfied. This is the act of the strongest power in the world, with possibly one exception, a power which assumes to lead the nations in civilization and Christianity, against a country only about thrice as big as and not more populous than Luzerne county-a country whose educated, white population is not that of Carbondale. The tactics pursued by England throughout the whole episode have been such as to cast discredit upon the theory that England's main purpose was to collect a paitry bill of damages, amounting to less than the prince of Saturday's Tribune deserves to be Wales' cigar bill for a decade. Equally prominently considered. Under no curuntenable is the supposition that the rency system could this nation expect purpose of Great Britain was to set an to be healthily prosperous while the balexample of its power and promptitude. Both these characteristics are known of all men. There exists only one explanation of this outrageous action which supplies an adequate motive, and that is the theory that England wants to obtain permanent possession of Nicaraguan territory, from which posltion of strategic advantage she can effectually block any future effort of the United States to obtain control of a transisthmian oceanic waterway near the route of the unfinished Nicaraguan canal. To accomplish this purpose England will not scruple to violate verbal pledges made at London to our Minister Bayard, any more than she has scrupled to act the international highwayman, the freebooter and the thug. Meanwhile, what of Secretary Gresham and the Monroe doctrine? Apparently both are in a trance.

This, in connection with the efforts now under way in several intes cast of the Mississippi to get free person caught is removed, the cradle matically returns to its normal postliver conventions, is proof positive, they ay, of the great chasm that is yawning . While the car to which it is at-sed was rounding a curve near Fulton a the Democratic party.

erry yesterday, a man who was trying It is claimed that the Republicans proo look at the mechanism from the inner surve of the track was struck by the bufpose to avoid precipitating any such se-vero issue in their own party, and are going to begin early to take the firm fer, tipped off his feet, and, before he could utter an exclamation, found himself round that bimetallism is a possibility ad not a hopeless case, as represented by sudled by the fender. His tall hat even vas not injured. emocrats, Recent utterances of prom

inent Republicans, Senator Allison and ex-President Harrison in particular, are Mr. Beetem ought to find little difficulty in communicating with the presinted as straws indicating the trend of inion in the Republican party. In this nuection references are being made to ent manager of this Brooklyn line as to the cost and merits of this type of te developmnets before the international fender. Or, he might write to the manonetary conference, and the statements the prominent financiers of the world agers of the various trolley lines in at the gathering are being recalled and invested with peculiar interest at this cars with equally satisfactory fenders, me. One statement which was made at that conference is distinctly remembered by many politicians, who have seen what they claim is a fulfillment of a phophecy

made. M. de Rothschild, one of the dele-gates of Great Britain, and recognized as They are simple in construction, easily djusted and while the writer was in that ity last week one of them was the means representing the sentiment of that gov-ernment at the conference, made this statement: "If this conference were to f preventing the body of a man from be-ng crushed into a shapeless mass. The break up without arriving at any definite result there would be a depreciation in the value of that commodity (silver) which it would be frightful to contemplate, and out nen was lifted to his feet unharmed. If o had fallen in a similar manner before of which a monetary panic would ensue, the far-spreading effects of which it would be impossible to foretell." That phophecy was made in November, 1892. The conferone of our trolley cars he would have suf-ered a horrible death. These contriv-ances are simple and inexpensive. They ence did adjourn without arriving at any definite result, and the following summer consist of three stout pieces of iron form-ing the three sides of a square which doany the commencement of that great nd from the front of the car almost to inancial and industrial depression which the track. Inside these supports is a net-work of light strap iron which yields to everyone recalls.

vork of light strap from when anything or any reason strikes the fender instead of be-ng shoved aside and thus mangled he is metallic sentiment of England-that is, among the industrial classes-as in this country, bordering in a degree stent of the spread of bimetallism among Pittsburg are very much longer and e people of the United States. The point rger in every way than those in our city made, however, that the mass of the similar contrivances could be ma cople, the element that it is claimed will ventually determine the fiscal policy of o fit these cars and thereby save many e nation, are showing a decided lean-There is very little doubt among ung toward bimetallism and clamoring for trial of it anyhow, and that if an interprejudiced students of the fender probational conference can be held within the lem that fenders which fend are now to ext year or two the opposition put forth he had upon easy terms. If Scrantonians by the British delegates at the last meetg will have at least been modified to shall bring sufficient pressure to bear uch an extent as not to present an inupon councils to induce them to nass operable bar to an agreement. This is said to be the belief of a great many Re-publicans in this country, who are at least the pending Seamans ordinance, there need be no fear that the Scranton Tracwilling to wait a year or two longer, if necessary, in order to give it a trial, trial, tion company will fall to find suitable rather than to rush either to the extreme fenders for their cars. f gold monometallism, which they de-lars to be un-American, or to silver Whatever opinion the majority of reonometallism. At all events, they say it is too early to give up absolutely, and to say that it must be "gold monometallism flective Americans may entertain with reference to the financial problem, they " nothing," or to take ground that bimet-lism is a chimera and unlimited national are evidently pretty thoroughly agreed ee coinage the only alternative of gold that it will take a Republican adminisconometallism. It is argued that the purtration to solve It. dill draw into Republican runks the con-Need of American Independence.

One point made by Mr. Chittenden in

GOLDSMITH'S CB. a contracted gold basis, with silver used only in subsidiary coinage. And American knows to his sorrow that a set as well.

TOLD BY THE STARS. Daily Horoscope Drawn by Ajacchus, The Tribune Astrologer. cast: 1.47 a. m. for Monday, April 29, 1895. Astrolahe

If Scranton's spring trade has been to any degree unsatisfactory, it may readily be explained by noting the paucity of the live spring advertising.

An Enemy of American Industries, "There is," says the Chicago Times-Herald, "one method, and one only, by which silver can be made to play a beneficial part in the pecuniary organization of trade. That one method lies in an international governmental agreement to be maintained with the fidelity which is demanded in the obdebtor. What he does know is generalservance of all other treaties between ly inaccurate. To be at the mercy of governments. The president and the most intellectual of the Democratic leaders in the next congress will undoubtedly work with the Republicans of the same conviction for the furthering of an effectual international agree-

ment, the prospects of which have alearly improved in western Europe

ervative people of all classes, Democrats neluded, who would regard this position s the safest and as most likely to con ribute to national prosperity.

Can John Bull Take a Hint ? Letter in Washington Post. It will be remembered that ever since we

egan our career as a nation, no inter-erence in our affairs, worth mentioning, ance of trade is heavily against it. So as come from any power except Eng-and! That government has always, durlong as more gold flows out of the coun try than comes into the country; so ng our entire history, nagged and bullled long as the country's expenses are is, Only once has the great republic urned on her old enemy; and then and larger than its income, there will be untere Andrew Jackson established a dem rest and trouble. So long as it is the cratic precedent which has been accepted fashion to borrow money from foreign by all parties in this country. Strange to say, that precedent was established down on the Gaif of Maxico, on whose shores lenders; so long as the government sells its bonds to London capitalists instead modern incident demands a reiteration of that same principle of stalwart Amer of to the American middle classes, there will be panies and distress at fre-British representatives, on the former ocabundant currency of diamonds.
