

WE'VE NEVER PUSHED

Boys' shirt waists to the front.

And Yet We Sell Them

Freely—in fact, our stock runs up into thousands of dozens, and there is not a good make or a prominent style of boys' waist on the market that we do not carry.

LITTLE LORD FAUTLEROV

Leads all others as a common sense, dressy-looking waist. We have it in Whites, Printed materials, etc.

"MOTHER'S FRIEND"

Is the old reliable standby, and for practical thrift and true economy, there's nothing on the market today to surpass it.

We have it in all sizes, qualities and materials, and prices for a good, fast color Cambric begin at

20c.

THE WAIST STORY

Is not half told yet, but why prolong it further?

If we can get you to understand that we carry two or three ordinary stocks of shirt waists for boys, and sell them at a big percentage lower than all competitors, we have accomplished all we desire.

Common prudence and good sound sense on your part will do the rest.

MR. POSTER GIVES AN OPINION

His Views of the Eastern Situation as Recorded by a United Press Reporter—Japan's Treaty Reasonable—Russia's Interference.

Washington, July 8.—In conversation with a reporter for the United Press this afternoon, John W. Foster was asked for his opinion of the prospects of permanent peace between China and Japan as the result of the treaty of Shimonoseki. He replied: "There is good reason to expect permanent peace between the two empires. The terms demanded by Japan under the circumstances, be regarded as reasonable, especially in view of the retrocession of the Liao Tung peninsula. The treaty has been observed and carried out by China with scrupulous good faith. Her conduct in this respect has created a very favorable impression in Japan.

"If a rupture occurs it is more likely to be brought about by the intermeddling of the European powers. 'What is thought of the attitude of these powers toward the parties to the recent contest?'"

"The intervention of Russia on account of the terms of peace was not unexpected, and it is not unnatural, in view of her predominant interest in the Orient, especially on the north Pacific coast of Asia. That France would surprise in the east, but that Germany should unite with them in a display of force against Russia was entirely unexpected, and is not yet understood.

The British are bitter in their criticism of their government for its abatement in the matter. The alliance that it failed to join with the other powers in re-negotiating the terms of peace, has lost for their country much prestige and has left Russia a free hand in its influence and control of Peking. Of all the countries diplomatically concerned in the contest the United States has come out of it with better grace than any other."

THE NEW MEN HAGGLE

Laborers Hired to Take the Places of Strikers Object to Low Wages.

Sharon, Pa., July 8.—Two weeks ago the laborers at the Sharon Iron works went on a strike for a twenty per cent. increase in wages. Various propositions for a settlement have been offered and rejected. The management of the works has determined to put new men in the strikers' places, and yesterday a car containing twenty colored men was shipped to the plant.

Simultaneously with their arrival the new men began to haggle as to wages, etc., and as a result the works were not started this morning. The arrival of the negroes together with rumors of a purely distasteful, but only desire being to render such service as would bring about an honorable and lasting peace. The conduct of the state department in its very delicate relations with the strikers has been marked by good judgment and by few mistakes, and the good offices of our ministers and consuls in China and Japan, where they represented the interests of both governments have been widely appreciated by both nations."

COAL AGENTS' MEETING

It is Expected That Definite Policy Will Be Arranged Today.

New York, July 8.—Tomorrow's adjourned meeting of the anthracite coal agents was anticipated with more than usual interest in Wall street today as it was held in some quarters that the action of the agents might quite probably be tantamount to a settlement by the higher powers of the re-organization at an early date. The trouble in the trade hangs like a damper over the stock market, and well-informed people predict that the efforts to remove it have reached an advanced stage. The agents are expected to arrange a definite policy tomorrow. It was said that Mr. Morgan has been able to give considerable time to the question involved, and that a settle-
