From the Washington Post. The number of books published in the United States is not so reliable an index of general business conditions as the amount of pig iron produced, but it is, nevertheless, a fairly good pointer. For example, In 1895 there were 4,281 new books brought out, and enough new editions of old books to bring the total output up to 5,134. That was the year of the panic, but the depression was not very scriously felt till the year was far advanced, and many books were in the printers' hands whose publication had been decided upon under better financial aspects. The year 1894 opened under gloomy con-ditions. The shelves of publishing houses and book stores were loaded with unsold wares. The stocks on hand were literally sylvania; and, as Mr. Cameron supports that policy, he regards himself as bound by every consideration of public honor and safety to oppose his re-election All this is manly, explicit and unequi ocal and it will meet the approval of
