turned from Dedham.

CHAPTER III .- SUSPICION IS NOT | tion nor before the grand jury was I al-PROOF.

When Mrs. Adams told me that she had picked up Henry's whip-ribbon Wednesday morning I said nothing, but thought that Henry must have driver over Tuesday evening after all, and even come up into the yard, although the house was shut up and I in bed, to get a little nearer to me. I felt conscience-stricken because I could not help a thrill of happiness, when my father lay dead in the house.

My father was buried as privately and quietly as we could bring it about. But it was a terrible ordeal. Meantime word came from Vermont that Rufus

I Was Arrested.

Bennett had been arrested on his farm He was perfectly willing to come back with the officers, and, indeed, had not the slightest trouble in proving that he was at his home in Vermont when the murder took place. He proved by several witnesses that he was out of the state long before my father and I sat on the step together that evening, and that he proceeded directly to his home as fast as the train and stage-coach could earry him.

The screwdriver with which the deed was supposed to have been committed was found by the neighbor from whom it had been borrowed in his wife's bureau drawer. It had been returned and she had used it to put up a picturehook in her chamber. Bennett was far as any one could see-not a bureau discharged and returned to Vermont.

Then Mrs. Adams told of her finding the vellow ribbon from Henry Ellis' whip, and he was arrested, since he was his vest pocket had not been opened. held to have a motive for putting my There was a small roll of bank notes father out of the world. Father's oppo- in it, and some change; father never sition to our marriage was well known, carried much money. I suppose if faand Henry was suspected also of having had an eye to his money. It was I should not have been suspected at all. found, indeed, that my father had more money than I had known myself.

Henry owned to having driven into my home, free, indeed, but with this awful burden of suspicion upon my our yard that night, and to having shoulders. That brings me up to the missed the ribbon from his whip on his return; but one of the hostlers in the present day. I . returned yesterday livery stable in Digby, where he kept his horse and buggy, came forward and testified to finding the yellow ribbon in the carriage-room that Tuesday again, for I have forbidden him to do night before Henry returned from his drive. There were two yellow ribbons I am innocent. To all the world we are in evidence, therefore, and the one produced by the hostler seemed to fit Henry's whipstock the more exactly.

Moreover, nearly the exact minute of the murder was claimed to be proved by the post mortem examination; and by the testimony of the stablemen as to the hour of Henry's return and the speed of his horse he was further cleared of suspicion; for if the opinion of the medical experts was correct, Henry must have returned to the livery stable too soon to have committed the He was discharged, at any rate, al-

though suspicion still clung to him. Many people believe now in his guilt who do not believe in mine; and some believe we were accomplices. After Henry's discharge I was arrest-

ed. There was no one else left to acouse. I was the only person left with a motive. Unlike the others, who were discharged after preliminary examination, I was held to the grand jury and taken to Dedham, where I spent four weeks in jail awaiting the meeting of Neither at the preliminary examina

On Lake Erie's Shores-The Captain's Wife Tells the Story-It Will Interest Many People-

[From the Buffalo Evening News.]

If you were to call at 27 Front avenue, you would find a pleasant elderly lady, Mrs. Captain Henesy by name. Her kindly smile and joyous manner are to no small extent due to the escape she has had. Her own words can better describe her rescue, and one can easily understand her present happy condition when they realise what she has gone through. She says: "About five months ago I had an attack of sickness which lasted for a week attack of sickness which lasted for a week and since that time I have been subject and since that time I have been subject at intervals to similar attacks, some of which were longer in duration. It is hard for me to describe how I suffered. The pain would commence in my head, after which it would seem to pass down my body and settle in my back, my sides ached, my back ached, and I had a feeling of great distress in the bowels. The increased pain which seemed to come from lying down, would be almost unbearable, my fade and stomach would bloat up and I could hardly stand on my feet, dissiness could hardly stand on my feet, dizziness made & almost impossible; this feeling was always with me even after the violence of the attack passed over. The last attack I had was the worst, and was so bad I would not have been able to tell this story but for Doan's Kidney Pills. As soon as I commenced their use I found-immediate relief. The pain in my back and aldes left me and the disziness went with it; the bloating in my face and body disappeared and all distress in my bowels was gone. I have great faith in Doan's Kidney Pills; in a short time they did a great deal more for me than all the plasters and medicines which I had resorted to in seeking relief and cure. I hope always to be able to procure them."

green silk dress. They searched the house for all manner of things, at the time of my arrest, but the dress was not there-it was in Phoebe Dole's dye-

Happenings of Interest to the Staple Trades and Particularly to the Trade in Iron, Steel and Anthracite Coal.

The American Tinplate company, Elwood, Ind., recently started up six additional mills, making in all sixteen that are active. The plant is now four times as large as when it started in 1892, and employs 1,000 men.

There is a material increase in the demand for car equipment. This is the cause of an advance in bar iron of \$2 per ton in the west, and 1-10 of a cent per pound in the east. Railroad shops all over the country are resuming full time.-Philadelphia Times.

The work of rebuilding the Susque-hanna Rolling mill, et Columbia, Pa., which was recently destroyed by fire, has been commenced. The new structure will be entirely of iron, and will be much larger than the burned mill. The Janson Iron company has commenced the work of enlarging its rolling mill plant at Columbia.

The Reading Iron company an-nounces that it has assumed charge of the rolling mills of the Montour Iron and Steel company located at Danville, and that they will be placed in full operation by Aug. 12. About 400 men will be employed at the start. Grooved skelp, merchant bar, light rails, etc. are turned out. Theodore F. Patterson has been appointed superintendent of the Danville plant.

Within the last ten years labor-sav ing machinery has done away with a great many laborers. Statistics from the European Continent show that the number of carpenters has been reduced 15 per cent.; button-hole makers, 50 per cent.; shirt makers, 33 per cent.; bakers and confectioners, 20 per cent. cabinet makers, 35 per cent.; typesetters, 41 per cent.; type founders, 50 per cent.; silk band weavers, 40 per cent. and wood cutters, 42 per cent. within that time.

Engineering News noted recently a striking example of the accuracy of American tools and workmanship in the case of the 12-inch guns going from Watervliet arsenal to the proving grounds at Sandy Hook. Each of these guns is 40 feet long and weighs 115,000 pounds, yet the difference in weight between the seven guns is said to be only five pounds. These guns are nickel length instead of the usual 35 calibres instead of a jacket a series of hoops are shrunk on the inner tube for nearly the whole length of the gun, and over this is shrunk a single jacket, covering about two-thirds of the length, and then another layer of long hoops. When the intricacy of this assembling process is considered in connection with work done on lathes capable of handling guns 40 feet long, the close agree ment in weight is almost phenomenal.

The shot-making trade has a legend which recites that back in the days when guns were shot off by lighted matches and were swiveled to supports because they were too big and clumsy to be lifted to the shoulder, and when all shot was moulded as bullets are today, some workmen were fastening an iron grating to the wall of a castle. They had cut out the hole in the stone and, after placing the iron in the hole poured some lead in to hold the iron in place, just as they do today. Some of the lead escaped and ran over the edge of the wall into the most below. Soon afterward the attention of the soldiers was attracted to the lead in the clear water, and, dipping it out, they found that the metal in falling from the height had become globules. After that those soldiers made their bullets by sprinkling melted lead over the castle wall into the waters of the moat .-

N Society women often-feel the effect of too much gayety-balls, theatres, and teas in rapid succession find

spirits take flight. It is time to accept the help offered in Doctor Pierce's Favorite Prescription. It's a medicine which was discovered and used by a prominent physician for many years in all cases of "female complaint" and the nervous disorders which arise from it. The "Prescription" is a powerful uterine tonic and nervine, especially adapted to woman's delicate wants for it regulates and promotes all the natural functions, builds up, invigorates and cures.

Many women suffer from nervous prostration, or exhaustion, owing to congestion or to disorder of the special functions. The

Many women suffer from nervous pros-tration, or exhaustion, owing to congestion or to disorder of the special functions. The waste products should be quickly got rid of, the local source of irritation relieved and the system invigorated with the "Pre-scription." Do not take the so-called celery compounds, and nervines which only put the nerves to sleep, but get a lasting cure with Dr. Pierce's Favorite Prescription.

"FEMALE WEAKNESS."

STOCKS AND BONDS.

New York, Aug. 5.—Only 137,019 shares of stocks were traded in at the Stock ex-change today. The trading was narrow and professional throughout. Chicago Gas was the only stock that showed any life, but the advance from 574 to 59 was attributed to covering of shorts put out after the defeat of the frontage bill by the Illinois leguslature. Sugar was the next most active stock. Transactions were made at 114a1154a1134a1144. The Grangers, trunk lines and anthracite coalers were quiet and without special change. Erie sold down to 8½ on the announcement that the forthcoming reorganization plan will provide for a heavy assessment on the stock. Speculation closed quiet in tone. Net changes in the railway list show declines of ½ to ½ per cent. Chicago Gas gained 1½ per cent. and Consolidated Gas 114 per cent.

1½ per cent. The range of today's prices for the ac-tive stocks of the New York stock market are given below. The quotations are furnished The Tribune by G. du B. Dim-mick, manager for William Linn, Allen & Co., stock brokers, 412 Spruce street,

ROOF THINING AND SOLDERING All done away with by the use of HART-MAN'S PATENT PAINT, which consists of ingredients well-known to all. It can be applied to tin, galvanized tin, sheet iron roofs, also to brick dwellings, which will prevent absolutely any crumbling, cracking or breaking of the brick. It will outlast tinning of any kind by many years, and it's cost does not exceed one-fifth that of the cost of tinning. Is sold by the job or pound. Contracts taken by ANTONIO HARTMANN, ET Birch BL.

THEFTH BLOOD POISON
