teenth sewer district, were kept busy all day yesterday listening to appeals from the protesting property holders. The council chamber, where the board held its sessions, was the scene of many lively discussions between assessors and the assessed.

The viewers claim that their assessment was in every way fair and impartial, and say that time will prove the correctness of their views. They did their duty fairly, but peculiar contendes of affairs that exists in the district makes it impossible for anyone to compile a report that will be satisfactory to everyone.

Those Who Left Hickory Street Congregation Have Organized.

WILL BUILD ANOTHER CHURCH

At Present Roy. August Lange and His

Followers Are Worshipping in St. Paul's Church on Prospect Avenue. Incorporators of New Church. An application was made to the court

An application was made to the court yesterday for a charter for the "Free Evangelical church of Peace." of the South Side, the church organized by members of the congregation of the Hickory Street Presbyterian church, who severed their connection with the latter when Rev. August Lange re-

signed the pastorate.
The troubles and contentions which led to the resignation of Pastor Lange were set forth in detail in The Tribune of Aug. 1. There were about 450 mem-bers in the congregation of the Hickory street church when Rev. August Lange was in charge, and about fifty of these left the church at the time he did, and told him they wanted him to

One of the leading spirits of the new congregation is John Lentes, a warm personal friend of Rev. Mr. Lange. For some time prior to the recent dissension he was church organist and superintendent of the Sunday school. When Rev. Mr. Lange resigned Mr. Lentes did likewise and sacrificed the salary of \$250 a year paid him as organise.

Temporary Meeting Place Those who went with Rev. Mr. Lange secured a temporary meeting place in St. Paul's Evangelical church on Prosect avenue. The congregation of that church used the edifice in the morning and in the evening kindly placed it at the disposal of Rev. August Lange and

his followers.

The latter have determined to have a church of their own, and as a first step church of their own, and as a first step towards securing one have asked the court to charter them that they may have the power to hold property, contract debts and perform the several acts that are necessary to establish and maintain a church.

The petition filed with Prothonotary Pryor yesterday by Attorneys O'Brien & Kelley asking for the incorporation of the society sets forth that it is an as-

of the society sets forth that it is an association for the worship of Almighty God according to the evangelical creed as found in the Holy Scripture. It is to exist perpetually.

MR. HODGSON IS CORRECT.

Editor of The Tribune: Sir: I agree with T. A. Y. Hodgson, in his opinion in regard to Sci parties finding coal in Hamilton town-ship, Monroe county, and that the sup-posed coal find is nothing but the massive slate formation called the Marcel-lus. The Marcellus has a continuous outcrop through Pike, Monroe, Carbon and Schuylkill counties, and also out-crops in many other localities throughout the state, and lies thousands of feet beneath the true coal measures, and is overlaid in regular order by formations called Hamilton, Portage, Che-mung, Catskill, Pocono, Mauch Chunk, Red Shale and Pottsville conglomerate, which holds all the true coal formations n the slate.

Much money has been wasted in pros-Much money has been wasted in pros-pecting the Marcellus in the vain hope of finding coal, also the Utica slate, which lies much deeper, and which in New York state is the surface rock of

the Mohawk Valley.

My reading in The Tribune that business men of Scranton expected to find coal near Stroudsburg, and that an expert thought the prospects looked favorable, surprised me very much. I was also surprised to think that compera-tively so few people understand the geological formations of this state. Much money would often be saved by parties desiring to prospect for coal by first consulting with a competent man that fully understands the many geological formations of the state, their ompositions and relations to each ther. The approximate estimate of the cost of constructing the approaches to the Linden street bridge is, according to City Engineer Phillips, about \$22,000, while the amount available for the work is less than \$21,000.

while the amount available for the work is less than \$21,000.

The engineer's corps are going over the plans again in the hope of paring down the approximate estimate and Councilman Nealis, who is taking the most active interest in the completion of the approaches, is figuring hard to raise the available money to an amount that will tally with the estimate. Even though there is a slight discrepancy it will not prevent the work from being carried on, as the bidders' figures will undoubtedly be much lower than the engineer's estimate, as the latter is always placed at a figure higher than the cost is expected to be.

It is intended to pave the new thoroughfore all the way from Mifflin avenue to the Swetland street bridge. Asphalt will be used on the bridge and stone block on the approaches. The paving of the approaches is, however, only a possibility, as the property holders along the route have not all signified their willingness to share the expense.

The Robinsons readily agreed to pay their share and the Jersey Central will undoubtedly contribute, as the road will be used by them to a great extent.

Excursion to Ocean Grove for the Camp Meeting.

Asbury Park and Ocean Grove, recognized as the most famous of all the great New Jersey seashore resorts, have manifold attractions for all persons that appreciate a sojourn by the ocean. The world at large contributes people that are patrons of these resorts and among them are many that are distinguished in the various walks of life. The hotel, cottages, views of ocean, the breakers, bathing and style that pervades Asbury Park each recurring summer is something startling and must be seen by personal observation in order to be appreciated fully. August curring summer is something startling and must be seen by personal observation in order to be appreciated fully. August is the month here. The hotels and cottages are filled, the fine driveways are gay with fashlonable equipages and the muste of manifold bands and orchestrasthrows its resonant echo over the entire scene. At right the flicker of electric lights seems to be almost in competition with the stars, for it must be remembered that Asbury Park is a city of advancement and has all the modern improvements born of enterprise. The private life in cottages is in strange comparison with the fashlonable round of hotel gayety that attracts wide-awake people to the grand hotels. Asbury Park with all the bustle that keeps visitors on the qui-vive, has no disorder, for the stringent local laws keep all would-be offenders within bounds and nothing but a good time marks the wane of summer days. Bathing is one of Asbury's greatest attractions, and the costumes seen here in the breakers are as original as they are costly and varied. The board walk, the greatest along shore promenade north of Atlantic City, has the appearance of upper Broadway, New York, on Saturday aftermoon, with its surging crowd moving in opposite directions, and Ocean Grove, with its colony of white tents, the abodes of campers-out, is a preity sight to behold. The annual camp meeting begins here Aug. 20 and will continue ten days. The Central Railroad of New Jersey will give residents along the Lehigh and Busquehanna division from Scranton to Mauch Chunk an opportunity to visit these places by a very low rate excursion that will be run Saturday next. Aug. 24. Tokets will permit holders to remake over until Monday, Aug. 26, and return by any regular tra/n.
