Providence Defeated in a Ten-Inning Game at Rochester.

OUR HUMILIATING DEPEAT

Toronto Virtually Wigod the Earth Up with Us on Saturday-Condition of Affairs in the Race for the National League Ponuant.

Defeat follows defeat for Scranton with a regularity that is becoming mo-notonous. It is now out of the question for us to better our position in the

league race this season.
Rain saved St. Louis from a defeat a Baltimore Saturday, but the Orioles will meet them today, weather permit-ting, and undoubtedly take two games.

Scranton suffered a humiliating de feat on Saturday from the tail-enders, but like the proverbial corporation it is soulless and conscienceless, and therefore feels no disgrace. Wilkes-Barre did not play on Saturday at Syracuse on account of rain, and but four of the Eastern league teams played yesterday. Today being a holiday, two games will be played by all of the teams.

SOME BASE BALL RECORDS.

Standing of Clubs and Individuals in National League Race. A study of base ball records according to percentages will reveal as many surprises as a comparative review of statistics on the tariff, population, commerce or any other matter of business. Here are some figures and comparisons: Philadeiphia leads the league in batting as a club, percentage, .317. Baltimore is second with a very close mark of .316, then follows Cincinnati, New York, Chicago, Cleveland, Pitts-burg, Boston, Brooklyn, St. Louis, Washington and Louisville. s: Philadelphia leads t

A glance at the fielding averages of teams shows considerable variation from the order given in the above list of batting averages. Baltimore is first in fielding, Brooklyn second, with Bos-ton, Cleveland, Philadelphia, Cincinnati, Pittsburg, St. Louis, New York, Chi-cago, Washington and Louisville fol-lowing in the order given. Louisville has the unenviable distinction of being last in batting, fielding and club stand-

A combination of batting and fielding averages will probably indicate the po-sitions of the clubs in the league race. A comparative table of the records of all players who have participated in twenty games or more shows the following individuals to be leaders in their positions: Catchers, Robinson, Baltimore; first base, O. Tebeau, Cleveland; second base, McPhee, Cincinnati; third base, Collins, Louisville; shortstops, Jennings, Baltimore; left fielder, Kelly, Baltimore; center fielder, Wright, Louisville; right fielder, Donavan, Pittsburg; pitchers, Hoffer, Bal-timore. Of the leaders of the nine positions. Baltimore has four of them. D. sitions, Baltimore has four of them. D. Clark, of Louisville, has a batting percentage of 418 in twenty-seven games played. Lange, of Chicago, ninety-three games, percentage, 411, and Burkett, of Cleveland, 103 games, percentage, 408. Although Clark has the record, Burkett is really first in batting.

It is interesting to note that our own Jennings is first among the shortstops, tenth in batting and withal is playing with the prospective pennant winners. DIAMOND DUST.

Jimmy Ryan is beginning to hit the ball in fine style after a long relapse.

The postponed 2.27 class, four heats of which were trotted on Friday, was the only contest remaining unfinished, and most of the speciators who had seen Lake Eric outact Captain White and outlast Belle Truxton on the previous day believed that the race was a pretty sure thing for the son of Cadmus Hambletonian. Captain White had shown more speed than any other horse in the party, trotthan any other horse in the party, trotting a long mile around the entire field in the second heat and finishing in 2.15. The cyclist who has "bucked" against a stiff wind can easily understand how a big yacht can be propelled at the rate of twelve miles an hour by the breezes of the sea. Experienced tourists do not forget to calculate the wind in planning their trips. Riding in the teeth of a stiff blow is not only slow, but disagreeable work, and it is often wiser to take a train than to attempt it. Then the return trip is a delight, for the wind adds appreciably to the speed. The strength of even a moderate breeze can best be felt going down hill against it. Sometimes coasting is impossible under these circumstances, while with a favoring wind hill-climbing becomes much easier.

THE PAPER TRADE'S GROWTH.

Remarkable Increase Caused by the Use of Wood Pulp.

From the Paper Maker.

None of the greater industries of the country have shown a more remarkable growththan that of paper making. In 1884 the total daily capacity of all the paper mills of the country was 6,559,380 pounds, while in 1895 it is placed at the enormous figure of 14,102,580 pounds. The largest factor in causing this tremendous growth was the development of processes for making chemical fibre and wood puip, enabling the substitution of these matterials for rags, with a consequent large reduction in the cost of making paper.

paper.

It is estimated that if the use of wood pulp shall continue to increase at the rate of growth maintained in the last fifteen years, five years hence the consumption of spruce wood for this purpose will equal the present cut of spruce logs for lumber in all New England and New Tork. The growth of paper making is one of the most significant facts in the industrial progress of the times.

[The West Side interests of The Tribun have been placed in the hands of Emer-son Owen, to whom all news announce ments and complaints may be addressed.]

A horse owned by Dr. Sturgess be came terrified yesterday afternoon while standing on the left of North Main avenue, near the McKeever settlement. The animal dashed down the narrow alley, leading to the main road, and in its wake left one wheel of the buggy, that came in contact with a fence. In the vehicle was Dr. Sturgess' hired man, but he failed to control the naddened horse, and was compelled to jump.

He escaped injury. The runaway collided with a telegraph pole on Main avenue and the horse fell. It was then captured. The buggy was completely demolished. A crowd of girls narrowly escaped the flight of the runaway.
