Characteristics of the Mas.

Although he was in fairly good health until less than a year ago, his system was undergoing the first stages of wearing out, due to a long and active life. In his boyhood he was noted for a steady and well directed disposition to pass every minute of his life doing something of profit. His character was antagonistically opposed to indolence. His mind was quick and he had a magnificent perception. He saw things quickly, saw what course to pursue, and had a moral nature that acted in keeping with his perception. He knew the right and it was useless to make an effort to get him to diverge from his purpose of carrying it out. He was bitterly opposed to ostentation and could not be prevailed upon to have his likeness printed in any of the histories or books of reference of this valley.

In his younger days he was an active and enthusiastic fireman. He represented the Seventeetham. The society's agent, Mrs. W. B. Dug-gan, filed her report with the secretary. They Stole the Tools. They Stole the Tools.

The thieves, it appears, first broke into the blacksmith shop, and securing what tools they needed, pried open the front door of the postoffice and proceeded to blow open the safe. Two holes were drilled, one at the combination and another near the hinge. Glant powder was poured into the holes and exploded. Several persons living near by, particularly Mrs. R. W. Luce and exploded. Several persons living near by, particularly Mrs. R. W. Luce and son, who live next door, claim that they heard the explosion, but none of them attempted to locute it. GATHERED HERE AND THERE. Something of the indomitable will

Something of the indomitable will power and marvelous vitality of Rt. Rev. Bishop O'Hara, who is in his eightleth year, can be learned from what he accomplished in one day last week. He arose at 5 o'clock in the morning, said his office, which took an hour; at 6.30 celebrated mass, and after the mass confirmed a class of thirty children at Wilkes-Barre, giving them instructions before and after imparting the sacrament. He had breakfast at 8 and then took the train for Ridgeat 8 and then took the train for Ridge-berry, a distance of 162 miles. Father Hussie's church is five miles from the railway station, and he was driven to it over a rough road. Immediately af-ter arriving he had dinner, and then dedicated the church; after that cere-mony he confirmed a large class of children, gave them instruction, and got in his carriage, was driven a few miles to visit a priest, and from there five miles back to the railway station, re-turning to Scranton by train.

The tearing out of the front of the old Faurot house on Washington avenue reminds us that in the side yard there is a beautiful specimen of the Japanese Ginko tree. It is a very rare tree here, and its deaves and form are unique and attractive. It is some seven inches in diameter and thoroughly thrifty. Can we not invoke the genius of Arthur Frothingham for moving large trees and by cash from the county commissioners or by private subty commissioners or by private sub-scription remove it to the public square, where it would be an object of orna-ment and interest?
