Considering the Advisability of Removing the Preparatory Grade from No. 14 to the New High School Building.

A step in the arrangement of our public schools system, which will effect No. 14 school, is being talked of in official circles. It is proposed that at the beginning of the next school term the preparatory grade of No. 14 be transferred to the new high school. transferred to the new high school building. The preparatory course is, in fact, a beginning of final graduation from our public schools, and for this and other reasons it is judged best to have the grade in the main building, as is the case with the central city pre-paratory grade. If the project is carried out grammar "A" will be the high-est grade at No. 14, and the removal of the preparatory grade will make room for the pupils that are now taught in for the pupils that are now taught in the Tabernacle church annex, owing to a superabundance of pupils and a lack of room in the regular building.

The action will lesson the prestige of No. 14 in the educational world, and the building will only be considered as No. 18, No. 32, etc., are at the present time. There will be no central sec-tional point, but the educational rills will all run into the common centre of the city's system, the high school. Pro-fessor James Hughes will probably be transferred with his pupils to the main building. The foremost idea in the projected movement is to have the entire course in one building. Three years will thus be required in the graduating course. This would make no ma-terial change in the present extension of the course, as one year would be cut off in the other school.

No decision has been made as yet,

but it is probable that the step will be taken. It is not known whether the other preparatory grades in the North End and South Side will be disturbed.

few Traction Scheme of the New York and Harlem Road-A Claim That the Trolley Will Soon Be Supplanted.

After a lapse of six years the managers of the New York and Harlem railroad have determined to resume within ninety days the running of storage battery cars on their city lines. Arrange-ments have been made with the Stor-age Battery company to equip cars for

immediate service.

Six years ago a number of storage battery cars were run on Fourth and Madison avenues, in this city, but owing to a patent litigation between rival companies the use of the cars was suddenly and unexpectedly entoined. A pri-vate individual should be protected against the publication of any por-traiture of himself, but where an in-dividual becomes a public character the case is different. A statesman, au-thor, artist, or inventor who asks for and desires public recognition may be said to have surrendered this right and desires public recognition may be said to have surrendered this right to the public. When anyone obtains a picture or photograph of such a person, and there is no breach of contract or violation of confidence in the method by which it was obtained, he has a right to reproduce it, whether in a newspaper, magazine or book. It would be extending this right of protection too far to say that the general public can be prohibited from knowing the personal appearance of any great public characters. Such characters may be said of their own volition to have dedicated to the public the right of any fair portraiture of themselves.
