It is not much to ask of each Repuband try, if possible, to get his Repub-Hean neighbor out, also. But upon the response to this modest request a good deal may depend. Republicans must not fall to remember that the next general campaign will have for its object the election of a president and a

We believe that the temper of the people has not changed since last Novemuncertainty on this point, every citizen who is dissatisfied with Demogratic depression, deficits and diplomatic dishonor should take care to give emphatic expression to his belief Nov. 5. With the additional incentive coming from reputable state and county Republican candidacies, there ought to be no question of the verdict of Lackawanna county on that date. Let every Repubfican remember his duty.

In the absence of artifical excitement, the local campaign seems quiet; but the indications are that by the time the friends of Judge Willard, Dr. Longstreet and Mr. Bartl get through voting, next month, they will make it exceedingly lively for the Democratic opposition.

Put Some Ginger Into It.

Senator Davis, of Minnesota, is not alone in his belief that the United States ought either to stand firm for the maintenance of its rights in Venezuela or else formally and by proclamation abandon the Monroe doctrine as a scarecrow which will no longer frighten. His point that England "has given in the Dominion of Canada a hostage of peace to the United States far outvaluing the most that she could hope to obtain or inflict by war" is well

The principle that "the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subject for future colonization by any European powers," laid down by President Monroe in his famous message, either applies to England or it does not. If it does not, then it their period of employment. cannot logically apply to any other European power, and is worth absolutely nothing. If it does apply to England, it certainly includes within its inferential prohibition as well the fliching of American territory by artful and indirect means as its open seizure by force of arms. The principle cannot it must soon collapse through sheer

tack of logic. It is undoubtedly true that the powers of Europe "do not recognize the Monroe doctrine." We know that from the clever way in which they have at various times sought to circumvent it. But it is time they were made to recognize it in a most explicit manner, and we hope that the next president true Republican grit. reaffirm that formula of American sovereignty with the distinct addition that from this time onward, the European power which shall occupy, for any purpose whatsoever, so much as one square foot of American soil not now voluntarfly within its jurisdiction must be pre-

It is fortunate that Colquitt got back to Washington just as Grover left. We shudder to contemplate the consequences had the capital of this glorious government been simultaneously deprived of the presence of both these worthies.

Pertinent Tariff Figures.

The market reports of the leading newspapers contain at times material of great political significance. For example, the Philadelphia Press, in a recent issue, makes in its commercial columns a comparison of some of the principal imports for eight months this year showing the influx of foreign goods:

Hides and grasses manf, of 19,617,838 13,236,649 Hides and skins 21,276,138 11,729,821 Iron and steel 15,925,924 12,829,449 Silk mfr's 22,348,234 16,116,139 Wool hair 24,811,467 4,975,333 Wool mfr's 40,657,644 11,634,658

In dong this he made the triffing error of aying the foreign gold syndicate more han \$10,000,000 for returning him \$15,-00,000 of the \$45,000,000 gold taken out of the country. The leading exports all show a falling off except leather,

dis and tobacco. The London Daily Financial News says: "Practically every penny that was subscribed here toward the recent American loan has been got back through the expansion in the exports of woolens and worsteds; but the lican in the county that he promise to United States has not confined her go to the polls himself, next month, increased purchases to those articles." In September the imports of all merchandle into this country increased per cent, while the exports were the same as last year. For the year the mports have increased 20 per cent, and exports have decreased for the year 3.2 per cent. At the port of New York alone last week the imports increased nearly \$3,000,000. For two weeks the increase at that port has been nearly The prevalent idea that because the \$5,000,000 and for the year nearly \$70,ticket this year is small, the result of | 000,000. Sherman and Garfield.

The discussion which has arisen conerning the alleged disloyalty of General Garfield in the national convention of 1880 to Senator John Sherman, whom he was pledged to support, has ber, but in order that there may be no exhibited nothing quite so consplcuously as the fact that there are a large umber of big. little and intermediate collificians in the country who are aching to rush into print. Now that each as had his say, the matter stands just where it previously stood, and opinion divides as formerly on lives of individual predilection or prejudice.

> From any standpoint, one is bound to notice three facts; that Sherman was displeased at Garfield's success, oming as it did: that Garfield, if he betrayed Sherman, did it unconsciously and in a moment of weakness, but not as the culmination of a long-plotted design; and, lastly, that Garfield was a man of feeble will power and uncertain moral strength. It has been our own belief that General Garfield's reputation was saved by the unexpected tragedy of his death. Weak to a degree in certain personal characteristics, it needed simply time and opportunity for that lack of reserve force to exhibit itself in his public actions. Death, almost charitably as it now seems, intervened before the occasion of critical test presented itself, and elevated a bit of decidedly human clay to apotheosis and immortality.

> But it is doubtles well that it should be as it is, and nothing will be gained by seeking to undo it.

The assertion is made in a New York dispatch that Senator Quay favors an early convention and a long presidential campaign. Suppose he does. That need not prevent the business interests of the country from calling for late conventions and a short campaign. It is to be expected that the active politicians will object to the shortening of

Go Slowly.

An effort is to be made in the next legislature, it is said, to confer upon electric railroads the right of eminent domain, thus overcoming the recent decision of the Supreme court to the effect that no road can be built on a yield a single point, else the whole of public highway without the written consent of the owners of abutting property. It is plausibly argued that there are many populous rural communities which would soon be knit together by mutually profitable lines of electrical rallway if there were a law protecting the capital necessary in their construction, and enabling the builders of such rallways to get the better of obstinate or unreasonable property-owners in

But while this argument is valid to a certain degree, the fact should be borne in mind that the extension of the right of eminent domain is an exercise of sovereign power which should not be lightly practiced. When a majority of the owners of abutting property pared to retain it by defeating the unitedly protest against the construc-

negotiations for rights of way.

whole United States army, navy and tion on or near their land of a local railway line, it admits of very little doubt that their wishes should be respected. To seize and condemn the land of a majority, leaving to careless viewers the determination of damages, is an act of usurpation twice as obnoxious when falsely excused upon the deceitful plea of the public interest as when plainly achieved by the franker processes of the freebooter or the bandit; and it is a prospect which the rural citizens of Pennsylvania will be slow

Legislation on this subject, to be ceptable, will need to be conservative.

The fact that this or that individual Republican politician, in the disappointment of baffled selfishness, declines to support his party's ticket, affords no reason why the masses of the party should permit their loyalty to be with last year which is interesting as affected. Such instances, fortunately, are few throughout the state. They

AN IMPORTANT ELECTION.

From the Philadelphia Press.
It would be a mistake for the Republicans of Pennsylvania to assume that nothing is involved in the coming election in the state but the choice of a state treasurer and seven judges of the Superior court. These are very important officials, the proper choice of whom requires intelligence and good judgment on the part of the citizen, but it should not be forgotten that the influence of the election generally will be an important one. generally will be an important one.

The overwhelming Republican majorities of last year were regarded by all as exceptional; and they were. There is no more reason now than there was then to suppose the Democratic party will have any material success in electing candidates this year, but they have an interest of little less importance to them. They will watch the drift of the voting this year to get some indication that they may be able to make a hopeful campaign next year when a president and one branch of congress will be chosen. On such Republican majorities as were given all over the country last year they would be compelled to give up the next presidential contest before entering upon it. They are hoping for very material reductions in the Republican majorities, and they will make the utmost use of any significant drop, or of anything that shall be more than a fair lapse for an off year.

As the leading Republican state in the The overwhelming Republican majorities

As the leading Republican state in the union Pennsylvania will be watched the closest for the least evidence of weakness in the Republican line. Democratic effort is not put forth in this state with any expectation of Democratic success, but to make the vote of that party large enough to reduce the Republican majority. If a nearly complete Democratic vote is polled the Republican majority will be reduced, and may be reduced dangerously, unless Republicans are equally alert and active in making their vote equally full. The opposition is not forgetting that this is the eve of the presidential election, and it will be a grave mistake should the Republican number forget that fact.

There is another feature equally worth considering. Last year the Republicans elected twenty-eight of the thirty representatives in congress from this state. To do this many former Democratic counties were revolutionized. Every one of them ought to stay revolutionized. It may be said that on general account, and while the state is certain to be Republican, it makes little difference what a parficular county may do, but it is really of the utmost consequence to the whole country. If the people are to make sure of protecting themselves from the incapacity and sectional malice dispayed by the last protecting themselves from the incapacity and sectional malice displayed by the last congress—if they do not want a repetition of that failure—it will be necessary for the Republicans to hold every congressional

POLITICAL GOSSIP.

A Philadelphia dispatch to the Chicago Times-Herald says: "Governor Hastings and his chief political backers, David Martin, C. L. Magree and ex-State Chairman R. F. Gilkeson, and Mayor Warwick have, it is asserted on good authority, decided to boom Robert T. Lincoln, of Illinois, for president. A meeting of these anti-quay chieftains was held in Mr. Martin's office in the city hall, at which other politicians of less note were also present. This anti-Quay combine has had the support of ex-Postmaster General John Wanzmaker and Charles Emory Smith, ex-minister to Russia. They have all been strong Harrison men. However, the success of Quay and Platt convinced this combine that Harrison is out of the race for good. It is believed here that Quay is for Thomas B. Reed and will give him all the votes he can control in this state, and the Hastings' combine will not support anything that Quay does. They think Lincoln would be a strong man. This state had in the last convention sixty-four delegatos and will have about that combar next year. Of these the Hastings This state had in the last convention six-ty-four delegates and will have about that number next year. Of these the Hastings combine think they will control at least thirty. In return for their support, it is said, they will want Governor Hastings to go on the licket with Lincoln for vice-president." The truthfulness of this dis-patch is questioned by those in this city who have had the confidence of the gover-nor.

On the third term question in its general application and in particular as applied to the present chief executive. Colonel Ingersoil says: "I have no prejudice against a third term for the right man. I do not think Cleveland ought to have a third term. I think his first and second about as much as we can stand. I do not blame Cleveland for accepting votes. If the people want him I see no reason why he should not have as many terms as the people desire he should have. This is a great country, and it can stand a great deal of grief."

In his Pittsburg newspaper C. L. Magee pronounces the stories that any of the Republican candidates for Superior court judge is to be knifed by members of different factions the "stillest of fabrications," and adds: "Each candidate will doubtless receive more votes than his colleagues in his own particular home, but their aggregate vote in the state will vary but little and all will be elected by large majorities. All good Republicans will therefore vote their straight ticket and leave the knifing and cutting business to their friends, the enemy."

By a little sacrifice of time each Republican in the state can help materially to enliven the stay-at-home element and get it to go to the polls and vote. Next month's majority should be so large that the Democratic prosperity-wreckers at Washington will be unable to close their eyes to its significance.
