SCRANTON, NOVEMBER 8, 1895.

The two great countles of Lacka wanna and Luzerne stood together splendidly in the recent political contest, each rolling up a magnificient majority not only for Judges Willard and Rice, the local candidates for Superior court judges, but for the entire ticket of the Republican party. Standing togother harmoniously the Republicans of these two counties can be a power in state politics. This is what The Tribune urged last summer, and this it will continue to urge in the future. Co-operation between the Republicans of the two counties has secured for each a representative on the Superior court bench. A similar policy in the future will make them a potent factor and secure recognition for both in other respects.

Judge Smith's Success.

There will be general gratification in this part of the state at the election of Hon. P. P. Smith as the Democratic representative on the bench of the Superior court. This will be due in part to local pride and to the geographical advantage of having on that bench three judges familiar with the peculiar conditions which enter into litigation concerning the mining industry, The long experienced lack of such a representation on the higher benches of this commonwealth is now overcome abundantly, and there will hereafter doubtless be small cause for complaint on this score on the part of litigants and attorneys interested in legal questions arising from the production of anthracite coal.

But we suspect that the chief occasion for congratulation is supplied by reason of the fact that Mr. Smith will bring to the court a high personification of his judicial temperament, and a generous insight into the underlying philosophy of the law. His election in preference to any of his five colleagues on the Democratic ticket is very largely an illustration of the doctrine of the

Only one of those colleagues seriously rivalled him with respect to those qualities which by common consent are deemed desirable in a judge, and Judge Yerkes, although perhaps better known to the legal fraternity throughout the commonwealth, is by no means better adapted to the new position.

The people of the commonwealth can truthfully be felicitated upon the coincidence which at one time elevates to the bench of their highest court but one three men possessing the peculiar equipment of three jurists from the anthracite coal district-Rice, the brilliant and experienced trial judge; Willard, the student of men and of affairs; and Smith, the student of basic legal principles. It is not meant as a disparagement of their future colleagues to say that these three men represent, by themselvs, a sufficient aggregate of legal lore and practical business instinct to fortify the Superior court in public confidence and to justify the prediction of a successful termination of that new experiment.

Grover Cleveland's Consolation. It is reported in the Washington dispatches that President Cleveland, far from deriving discouragement from the recent elections, is inclined to view in them a personal vindication. AMERICAN FREE SPEECH.

From the Chicago Times-Herald. Senor De Lome has been making spir-ited protest against toleration by the fed-eral government of meetings in the Unit-ed States to express sympathy with Cuba. Senor De Lome is under the misappre-hension that the people of the United States are the subjects of the federal government of the United States, as the people of Cuba and of Spain are subjects at present of the reigning monarchy. The eral Harmon assuming the same position substantially has doubtless contributed to confirm this misapprehension in the mind of the Spanish minister at Washing-ton.

It is well that the American people
