

CARBONDALE.

CARBONDALE BEATEN.

But They Outplayed Most of the Scranton Team.

Although the Alumni Foot Ball team did not win from Scranton Business college Saturday afternoon, they put up such an excellent game that they do not feel downhearted at the result. They had prepared to play the Business college, but there were very few men on the visiting team who belonged to that institution. Indeed, the best players, and those who did the star work, were composed of outsiders. Among these were Zang, Walsh, McCoullrick, and others of the Scranton Bicycle club team, so it was as much a game against them as against the Business college.

The day was an ideal one for the sport, and a large crowd took advantage of the weather and went to the game. The attendance was probably the largest of the season.

Scranton kicked off and the runner was downed in an instant. Then slowly, but surely, the Carbondale boys pushed their heavy opponents down the field. The gains were not long, but they were constant and it looked as if we should soon score. But, after pushing it half way down the field, Scranton received the ball on their borrowed players came in. Their interference was good, and making a long sweep around the ends, they made the ball but a few minutes, when time was called.

The next half Scranton seemed to have worn off her dullness and started to the game with a dash. Time and again they circled the ends for big gains. This was the only way they could, as the center was like a stone wall.

When on their 5-yard line, Carbondale received the ball and at once began to push it out of the dangerous position. However, they had the ball only a few minutes, when time was called.

All the Carbondale men played a good game, Brennan, Crane and Forbes were especially excellent. The tackling of Crane at full back was clean and hard, and he deserves much credit for his work. The game, which otherwise would have been most exciting and interesting, was somewhat spoiled by the constant wrangling on both sides.

Next Saturday the Alumni team goes to Scranton, while the High School team will contest against the Wilkes-Barre high school. This will be a good game and should bring out a crowd.

MR. RETTEW TO RUN.

Will Try for the Nomination for Mayor of Carbondale.

The latest reports in political circles is to the effect that ex-Mayor Rettew will again try for the nomination for mayor. A Tribune reporter who interviewed Mr. Rettew at his home on John street, confirmed the report.

Mr. Rettew, although as yet a little reticent upon the subject, acknowledged the rumor as fact. He said it was the desire of many of his friends that he should again enter the field and upon consideration he had decided to do so.

This is something that is not generally known, although rumored about the city. The many friends of Mr. Rettew will be delighted to hear it, and he will be gladly welcomed back in the political arena.

Mr. Rettew has always proved himself a trustworthy and efficient official, and always did his work honestly. If he should again be our mayor citizens will congratulate themselves upon the selection.

WORK AT THE SILVER MINE.

Prospectors at South Cassan Are of the Opinion That It is a Bonanza.

Mr. Grimes, the mining expert, who is conducting the prospecting operations on the Delaney farm, in South Cassan, was in town Saturday. Mr. Grimes came to Carbondale for a pump, which he is expecting. Operations at the shaft were suspended during the past week on account of water, and the pump is expected to relieve this condition, and allow the work to be pushed.

Mr. Grimes, who is one of the most successful prospectors in the country, says that he never saw better indications. How far he may have to sink the shaft is hard to determine, but he thinks he may get to go down 50 feet. Some of the local parties interested recently telegraphed to Tucson, Arizona, for instructions from the wealthy mine owner who is the financial backing of the operators in South Cassan, and who has employed Mr. Grimes in many such enterprises. "Tell Grimes to go ahead," was the reply. The shaft will go down until the quantity of precious metal is settled.

RESULT BY THE DOCTORS.

Very Little of the Original Left of a Minnesota Man.

From the Minneapolis Tribune.

An old character is now in Winona, Minn., in the person of George Burns, who has good reason for his eccentricity. He has papers which show that he was head engineer on the steamer City of Savannah, which was wrecked off the coast of Massachusetts, on Jan. 18, 1884, while en route from Boston to Florida. He was revolving the levers when the steamer struck the rocks, and he was thrown into the machinery, receiving injuries which crippled him for life. There were 118 lives lost in the accident, and Burns is one of the twenty-seven survivors.

For a long time he lay on a cot in the death row of Bellevue hospital, New York. Dr. Hayes Agnew attended his case and removed five ribs from his left side, and trephined his skull, using six ounces of silver sheeting for this purpose. He was compelled to wear a plaster of paris jacket for four years after the accident. A portion of the lower end of his spine and both elbow joints are gone. He is supported on the back of his leg, and his heart is on the extreme right side of his body. He is now 64 years of age, and walks very well. He is a member of the Grand Army of the Republic and served during the war on the gunboat Essex, which was stationed at Cuba during the early days of the rebellion.

MICHIGAN'S HOLY DEER.

Supposed Hic Is Found to Be a Bleached Human Skull.

Atlanta, Mich., Nov. 17.—A story is told in these parts about a big buck deer with a white halo around his head. A hunter from Clyde, O., was near enough to see a white ball on the buck's head between the antlers, but he had heard the story about the divinely protected deer and did not shoot him.

Many refused to believe the story, thinking it a bit of superstition, until last week, when a hunter on his way from McKinley to this place, brought in a pair of monster antlers. Impaled between them by several prongs was the skull of a full grown human being. The ghastly empty eye sockets were fastened so tightly as to resist all effort to remove them. The skull was nearly white from exposure. It looked as if it had been ten years exposed to the weather.
