to Moving the Traction Company's Road and Another Conference Will Be lield To-day.

There yet remains a hitch in the conemplated conveyance of the Traction ompany's strip of land on Robinso street.

In exchange for the privilege of oc upying the center of the street the Traction company agreed to deed over to the city the private strip of land on which their tracks are now located. The conditions which they prescribed were not acceptable and after several conferences were modified.

Everything was moving smoothly and t was expected every day that the transfer would be consummated but when the Traction company failed to 417 carry out their agreement the West Side board of trade which is engineer-ing the matter decided to send a com-

nittee to investigate. Last evening, Hon. John R. Farr. Hon. D. M. Jones, Dr. J. J. Carroll, City Engineer Joseph P. Phillips, T. H. Jones, C. E. Daniels, A. M. Morse and Com-mon Councilman Joseph Oliver, comprising a committee, called at the office of Horace E. Hand, attorney for the Traction company to hold a conference on the matter. There were present representing the company, besides Mr. Hand, Vice President C. M. Clarke and General Manager Frank Silliman, Jr. The committee took advantage of the

opportunity offered to state their grievances, foremost among which is the service on the West Side lines, and as a consequence the greater part of the interview was devoted to matters other than that which brought them there.

Another meeting will be held to dis cliss the transfer at 11:30 o'clock this morning, in the parlors of the West Side bank. It is understood that the Traction company will insist upon being granted a double track right of way, which the people of the West Side are not agreeable to. To-day's meeting it is expected will result in some definite action being taken.

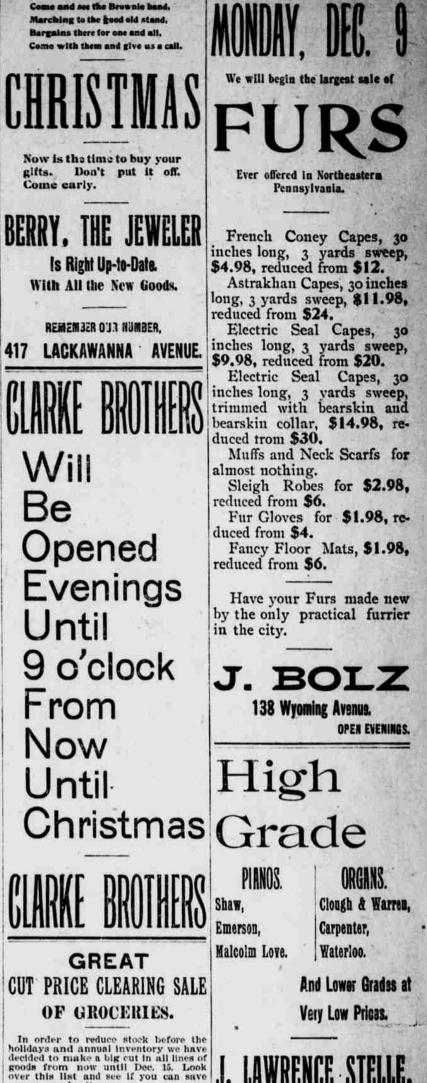

ORDER IS MODIFIED.

Passengers Can Smoke on the Front Platforms of Electric Cars A flood of objections and requests coming from a dissatisfied smoking public, which followed the order of the Scranton Traction company forbidding tobacco smoking on the platforms of its cars has led to an abridgement of the order. Yesterday the car conductors

were instructed to direct all smokers to the front platform. By allowing smoking on the rear platform passengers getting on the cars were liable to brush against lighted cigars and the lady patrons especially were liable to suffer damage to clothing. By allowing no smoking on the cars the smokers were indignant, but by referring the tobaccoltes to the front

platform the company has struck a golden mean. Very few smokers will stand on the front of a moving street car during the blasts of winter. They have the privilege, but it is doubtful if the weed is alluring enough to cause them to endure the chill.

Of course, you've heard of Turn-quest, the diamond merchant.
