Lost Night's Assembly Was Largely Atrended and a Distinct Success -Dancing Parties at Home of Mrs. Albro and Mr. and Mrs. W. T. Smith.

There does not seem to be any abate-ment of interest in the approaching Enchelors' ball. The officers are very alert and busy in perfecting big and little arrangements and are sanguine little arrangements and are sanguine of making the affair the most distinct success in the history of Bachelordon; certainly everything indicates such a result. Among the hundreds who have received invitations there is a keener anticipation than was apparent at this period last year. The reason is plain. Then everybody thought the organiza-tion had dreamed a social function which it would not be able to tulfill, an-it was not until the day before the bad that the same "everybody" concluded the Eachelors-processed carrying out period last year. The reason is plain. Then everybody thought the organiza-tion had dreamed a social function which it would not be able to fulfill, an-it was not until the day before the ball that the same "everybody" concluded the Eachelors processed carrying out their claborate plans, so society went to the ball and was more than pleased and that settled it-future balls were to be just as successful. An evidence of the possible attendance is the intima-tion already given by local people that.

tion already given by local people that a total of more than fifty persons from out of town will be present. Fifty from abroad means a very large number from Scranton. The desire of the Bachelors to spare neither pains nor expense in having every detail as near perfect as possible was proved by an incident which occurred during the week. It was found that the supports beneath ine portable dance floor-built a year age purposely for the Bachelors-had been damaged and would make the floor slightly uneven. Telegrams were sent to Rochester which secured a presence here of the mechanic who, in the employ of Lempert & Son, the incater ricent-tects, planned and supervised the mak-ing and laying of the floor hast year. This mechanic has been busily engaged with several carpenters and the floor will be just as soringy and just as secure as when first laid.

Today is rest day, a fortunate inter-mission in the round of holiday affairs which begar on Christmas day and will continue until at least next Thursday night. 1441
