[Under this heading short letters of in-terest will be published when accompa-nied, for publication, by the writer's name. The Tribune will not be held re-sponsible for opinions here expressed.] THAT FISHSTORY. Editor of The Tribune.

Dear Sir:—That hysterical females are capable of various repugnant acts, such as pricking the fingers, sucking and swallowing the blood, swallowing excreta, etc., so as to be able to vomit substances that would arouse grave doubt and fears in the minds of their medical attendant and friends, is a fact generally well known to the medical profession. Some peculiar combination of d'abolical and hysterical impulse must have actuated Mrs. Davies. of Brick avenue, when she placed a fish seven inches long on a plate, vomited on it and then gave it to her unsuspecting and sympathetic husband to take to Dr. Donne, who, it seems, was quite as innocent as the husband.
