POISON IN THE BLOOD

Which Is the Direct Cause of Rheumatism, and in Fact of Most Physical Troubles.

"These are trying times." The speaker was a middle aged man and father of quite a large family.

"And do you know what I think the greatest weakness in the body is? I will tell you. I believe it is due to uric acid which is in the blood, keeping it fermented all the time. I know that it causes rheumatism and I believe most colds."

"You naturally ask how does this uric acid get into the blood. The answer is very simple. The kidneys do not do their duty and throw it from the system as they should and therefore it remains in the blood and I believe that if uric acid were removed from the blood, most rheumatism and colds would disappear."

"The gentleman was right, and he might have added that Bright's disease of the kidneys is also brought about by this same cause. It is not about by this same cause. It is not about by this same cause. It is not about by this same cause."

"It should be borne in mind, however, that where there are such serious troubles as those above mentioned, a strictly reliable preparation can be used with the best of success. It will pay you to bear these things in mind."

IT'S A FLYER and the velocity of wind, steam and wings are suggested by his progress. The bicycle is the most important innovation in means of travel since the introduction of the locomotive, and we are in the infancy of its use, construction and means of propulsion.

Healthy-minded people are those who command and practice its use. To such we need hardly say: Your bicycle should be the latest and best. Call and examine ours before buying.
