HYDROPHOBIA FEARED.

Boy Birten in the Face by a Mad Dog The Animal Escaped.

Stephen, a 10-year-old son of Mrs. Rappati, of Neilson alley, was bitten in the face by a mad dog Thursday and the residents in that vicinity are much exercised over the affair. The dog was owned by the boy's uncle. Antonio Costello. For two or three days the animal acted queerly. Instead of being docile and playful, as usual, it was irritable and quarreisome, fighting with other dogs and snapping at persons who came near. But Thursday morning it growled hercely at the door and the window sash and at last jumped through the glass The Animal Escaped. and at last lumped through the glass and escaped Outside it attacked and bit every dog it saw; it foamed at the mouth, its eyes rolled wildly and when approached by its owner, attacked him victously. It also tried to bite Mrs. Rappati's arm, but its teeth only caught

np and bit him in the face.

It finally dawned upon the people that
the dog was made and Policeman Fallon was requested to shoot it. The offi-cer sent two bullets into its body and it fell, but soon rose to its feet again and escaped, leaving a trail of blood. Last evening Mrs. Rapporti brought her boy to Dr. Higgins to have the wound in the face cauterized, and he gave the opinion after minute inquiries about the behavior of the dog and its appearance, that it was suffering from hydrophobia. He advised Mrs. Rappati to take her son to the Pasteur Institute, New York city, where Dr. Paul Gibier inoculates such patients with an immunizing virus, the discovery of the great French scientist, Louis Pateur. graphy which everybody is discussing. This great invention, as most people are aware, enables photographers to take pictures of objects completely hid-den from the sight. In a recent experiment, for instance, a portrait of a man was secured, although he was separat-ed from the photographer by a threeinch partition. In another case, a picture was obtained of all the bones muscles, blood vessels and internal or gans in a man's body.

In speaking of this wonderful dis

In speaking of this wonderful discovery a well-known New York physician recently said: "If thousands of ing nature, and should attract more become who are mall-ine. people who are walking the streets to day and attending to business could only see a photograph of their internal organs, they would be filled with aimra and dread. They would see their liver and kidneys clogged with impurities and their blood filled with deadly secre tions which poison the whole system They would see these delicate organs slowly but surely giving way under this corroding poisoning influence. Oh

what an effect such a picture would have."

The doctor is perfectly right, but at the same time there are thousands of people who need no photograph to tell them that there is something wrong.

They complain of tired feel-ings, nervousness, headaches, backaches, stomach troubles, constipation and dull, heavy sensations. They feel miserable, but do not know why they unifer. It is only the skilled physician who knows that these symptoms are all caused by the liver and kidneys being out of order. When these great organs of the body fall to act properly the health specifity breaks down.
It was a knowledge of this important fact that led to one of the greatest discoveries of modern times. For long years, the brightest men in the medical profession sought for a remedy which would cure all these derangements of the liver and kidneys, and at last they succeeded in finding it. This great remedy, which has proved a blessing to thousands, is Warner's Safe Cure, ; remedy that today, is known and hon-ored all over the world. This great Safe Cure is not an ex-neriment. It has been in use for over twenty years and has been the means of saving millions of lives. It is the only remedy prescribed by the world's leading physicians. No other remedy compares with it for building up the system and imparting new life to every part of the body.
