stock broke from 73% to 71%, and near the close, on efforts to cover short contracts there was a rally to 735_8 , at which the final transactions were affected. The early break was the result of reports from the west that the company's revenues were being materially reduced through the operations of its competitors. It was also stated that the company had or would issue \$2.-000,000 new preferred stock. Cotton Oil preferred broke from 62 to 57, and later recovered to 60. The early break was the result of rumors that the company had not carned its interest and dividend requirement for the year. This This was semi-officially denied and the securities of the company closed comparatively steady. General Electric was exceptionally strong and rose from 32% to 34%a4%, on rumors that the company had made several im-portant contracts.
