ONE BILL PASSES SENATE Legislative Appropriation Measure

Voted Upon.

SUBJECT OF MUCH DEBATE

Various Motions to Alter the Text Are Voted Down-The House Refuses to Consider Sunday Civil Appropriation Bill.

Washington, Mach 27.—The legislative appropriation bill passed the senate today, after occupying the attention of that body every day during the present week. It appropriates, in round numbers, \$25,500,000. There was much debate upon it, first on Senator Sherman's motion to strike out all the Sherman's motion to strike out all the sections relating to the compensation of United States district attorneys, clerks and marshals (putting them on a salary system instead of the present system of fees), another on Senator Hill's motion to strike out a proviso changing the time of meeting of the legislative assembly of New Mexico. Mr. Sherman's motion was defeated— Mr. Sherman's motion was defeated-yeas, 18; nays, 30; so that the bill re-mains (in that respect) as it passed the house. Mr. Hill's motion devel-oped a political controversy, and no-tice was given by Mr. Gorman (Dem., Md.) that the discussion could not be cut off, but would assume pretty large dimensions. With the object of avoiding this threatened political debate, Mr. Cullom (Rep., Ill.), who was in charge of the bill, moved to lay Mr. Hill's motion on the table; but Mr. Cullom's motion was disagreed to yeas, 21; navs, 29.

The Democratic senators were aided by the votes of the Populists and of two Republicans, Senators Frye and Wolcott. Thereupon Mr. Cullom with-drew all opposition to Mr. Hill's motion and it was agreed to. That prac-tically ended the consideration of the bill and it was passed without a di-The senate then at 4.30 adjourned un-

HOUSE PROCEEDINGS.

Quite unexpectedly the house of representatives today by a vote of 142 to 77 refused to consider the sundry civil appropriation bill, reported yesterday, adopting the motion of Mr. Hepburn (Rep., Iowa) to take up bills on the private calendar for the first time this session. The adoption of this motion exhausted an hour, and another hour was spent in discussing a motion by Mr. Pickler (Rep., S. D.) that only pension and private relief bills re-ported from the committee on military affairs be considered. This was finally agreed to. Only three bills were considered and they were reported to the house with a recommendation that they be passed. Before a vote could be taken on them Mr. Hepburn (Rep., Ill.) moved that when the house adjourn tonight it be until Monday next, and despite the strenuous opposition of Mr. Cannon (Rep., Ill.) chairman of the committee on appropriations, the motion was agreed to 103 to 25.

house then, at 9 o'clock, was declared in recess until 8 o'clock, the evening session to be devoted to the consideration of private pension bills.

INDUSTRIAL.

The aunnual report of the mineral industry for 1894 of Great Britain industry for 1894 of Great Britain shows that 739.097 are employed, of whom 589,689 worked below ground. The value of coal produced was £62,-730,179, and the next product in value was building stone, £7,695,716. The amount of gold produced was 4,235 troy ounces. Tin, iron and coal were troy ounces. Tin, the chief products.

companies have a legal right to do their business in a way for the best in-terests of the owners and the proper-The officials of the companie are not criminals, and if they would stop evasion and act like business would men in an earnest way they would discover the fact to their own satisfaction. They have the right to restrict tonnage and to make and enforce rules and regulations among them-selves, to adopt prices and to do any similar acts which are within reason. prudently the jail doors would not always be yawning and there would be some stability in the trade which might be advantageous in the long run both to the producer and consumer.

Interesting experiments in the use of powdered fuel by the Wagener system are now being conducted in London, says an exchange. Small sacks of powdered coal, weighing about a hundred weight, are put in a conical hopper. The powdered coal gradual-ly falls out of the sacks as required into the hopper, nad then into a sieve about five and one-half inches in diameter, with small openings in it. The powdered coal would not go through the sleve with certainty without continual tapping, and this is done in the following way: Immediately beneath the hopper, and level with the boiler-house floor, is an air pipe about twenty inches in diameter, through which nearly all the air for combustion en-ters. As it enters it is made to pass through the blades of an air wheel or turbine, and this passage of the air causes the latter to revolve like a smoke jack. On the axle of this wheel there is a little knocker which taps the sleve about 150 or 200 times per minute, causing powdered coal to descend vertically. The powdered coal and air for proper combustion in this way get mixed thoroughly together and pass on into the boiler flue, each particle of coal being surrounded by air. There is no grate and there are no fire doors, and the stoking simply con-sists of putting a sack of powdered

coal from time to time into the top of the hopper and seeing that the right amount of air is going in for combustion. If there is not sufficient air for proper combustion entering through the main opening, as seen by a little smoke, there are two other smaller pipes where additional air can be admitted, each kind of coal requiring a somewhat different amount of air. The only object of the air wheel revolving, from fifty to eighty revolutions per minute, is to shake the sieve and cause the powdered fuel to go into and cause the powdered fuel to go into the furnace in the quantity desired. When more steam and coal are required a greater knock is given to the sieve and more powdered coal is burn-ed; when less is required a less shake is necessary. A screw adjustment for knocking is provided to regulate the knocking is provided to regulate the amount of coal entering, which is done by turning with two fingers a half-inch thumb screw. The only duty of the attendant is to put the sacks of coal into the hopper, and he ascends a short ladder to do this. He also has to regulate the amount of air for combustion and then there is no smoke. He can, therefore, attend to several boilers. An analysis of gases of combustion proves that the combustion is excellent, and the amount of carbon dioxide is much higher than with ordinary furnaces.

AVOCA.

The Langeliffe choir of this place attended the concert given by the Pres-byterian church choir at Laffin on Thursday evening.

Miss Anna Clark, of Pittston, is spending a few days with friends in

Mrs. Newlin and family, of Main street, and Mr. and Mrs. Kleffer, of Dupont, attended the funeral of a rela-

One of the most fashionable gatherings of the season assembled at the home of Mr. and Mrs. Solomon Deeble last evening the occasion being a social for the benefit of the Primitive Methods of the P Methodist church. A pleasing enter-talnment was rendered by many of the talented people of the town. Mrs. Dee-ble made an admirable hostess. She was ably assisted by her daughters and other assistants. Refreshments were served and a neat sum was real-

Heidelburg colliery, No. 2, of the Le-high Valley Coal company, is flooded to the depth of Your feet caused by the recent heavy rains. The water will be drawn out as soon as possible.

Wormer were in town on Friday.
The borough council meets this Saturday evening.

urday evening.

The funeral services of the late Miss Daisy Jackson were conducted from the Baptist church Thursday afternoon and was largely attended. The services were conducted by Rev. John Davis assisted by Rev. John Murphy, of Vestal. Interment took place in Pro-Vestal. Interment took place in Rose

The Nickel Plate Road controls the dining stations on its line and they receive unstinted praise.

Wall Street Review.

New York, March 27.—Speculation at the Stock Exchange continues quiet, the transaction today amounting to only 137.-765 shares, At the opening the market for stocks was weak and lower, London having turned up as a seller. It is estimated that the foreigners panted with nearly 10,000 shares of St. Paul, Louisville and Nashville and other issues with an international market. The change of front on the part of the foreigners was due to the Exyptian and Transvaal complications. Local operators were also disposed to sell mederately on rumors that there would be exports of gold next week. It is understood that a Broad street commission firm which was quite a factor last fall in the foreign exchange market had received an order to forward \$1,500,000 gold next week. This could not be confirmed and it was thought that if the treasury department should make another call on the dopositary banks for a part of the money held by them on bond account or if the premium for gold bars was again edwanced shipments of the medal would be prevented. The early decline ranged from ½ to 1 per cent., Sugar, the Grangers, Louisville and Nasavane, Chicago Gas, Leather Preferred, Manhattan and Facific Mall scoring the greatest losses. In the afternoon trading Tobacco was the feature and rose from \$3\frac{1}{2}\$ to \$7\frac{1}{2}\$ on vague rumors that the company will resume the payment of dividends next week and that the difficulties with the outside concerns had been adjusted. Baltimore and Ohio also met with better support and rose to 15\frac{1}{2}\$. Speculation closed irm. Net changes were merely fractional except for Louisville and Nasaville, which declined \(\frac{1}{2}\$ and Baltimore and Ohio and "otacco, which gained 1\frac{1}{2}\$ and and "otacco, which gained 1\frac{1}{2}\$ and and "otacco, which gained 1\frac{1}{2}\$ and continue except for Louisville and Nasaville, which declined \(\frac{1}{2}\$ and Baltimore and Ohio and "otacco, which gained 1\frac{1}{2}\$ are pectively. RAILROAD NOTES.

dispatch from Indianapolis says officials of railroads centering to have learned that secret organi-of the American Railway union there have learned that secret organi-zers of the American Railway union have been taking many of their em-ployes into the organization. There are eight organizers at work in differ-ent parts of the country. They do not call meetings, but visit railroad men at their homes and make them members.

The new locomotive being built at the Maryland Steel company's works at Sparrow Point for the Balanced Locomotive Engineer company, of New York, which, it is claimed, will be the world's executed for extractly as a seed world's record for strength and speed, is nearly completed, and in a few weeks will be run on the Sparrow Point railroad for a short time, and then taken to the west for a test of speed.

The General Electric Light company, of Chicago, has, by a recent deal, secured what is probably the longest electric railroad in the world. The property secured is the street car line in Kalamazoo, Mich., and as the purchasers own the plants at Hattle Creek and ers own the plants at Battle Creek and Lansing, Mich., and intend to connect the three towns, it will make a straight-away line of seventy-five miles. An additional spur three miles long will be buitt.

Passengers on the regular "Nellie Bly" express train from Atlantic City for New York, over the Pennsylvania railroad, had an unlooked-for experi-ence Thursday morning. They rode across the new Delaware river bridge across the new Delaware river bridge on the first train carrying regular passengers to glide upon the rails of that great structure. When the express reached Camden on regular schedule time, and changed engines at the Haddon avenue "Y," it started off all right on its way to New York. It had not gone far, however, when word was telegraphed down the road that several empty coal cars were piled in a wreck at White Hill, just this side of Bordentown. Orders were then issued to Conton. town. Orders were then issued to Con-ductor Reed to cross to Pennsylvania on the new bridge. The train soon swung clear of the switches at Delair, crawled over the bridge and sped on to its destination. The crew of the train were jubilant over the honor.

If the Baby Is Cutting Teeth. Mrs. Winslow's Soothing Syrup has been used for over Fifty Years by Millichs of Mothers for their Children while Teething, with Perfect Success. It Soothes the Child, Softens the Gums. Allays all Pain; Cures Wind Colic and is the best remedy for Diarrhoea. Sold by Druggists in every part of the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind. Twenty-five cents a bottle.

The Nickel Plate Road is the shortes line between Buffalo and Chicago.
