ment, especially when a confession is wanted from a criminal, is to place him where a drop of water will fall upon one certain soot in his shaven crown for hours, or days, if necessary. The torture this inflicts is proved by an ex-

perience of Sandow, the strong man. When he was in Vienna a few years When he was in Vienna a few years ago a school teacher bet him that he would not be able to let a half-litre of water drop upon his hand until the measure was exhausted. A half-litre is only a fittle more than a cant. Sandow launhed at the very idea of his not being able to do this. So a half-litre measure was procured, and a hole drilled in the bottom just sufficient to let the water escape drop by drop.

Then the experiment began, Sandow daughed and chatted gally at first. The laughed and chatted gally at first. The schoolmaster kept count upon the num-ber of drops. At about the two hundredth Sandow grew a little more serious. Soon an expression of pain crossed his face. With the entrance into the third hundred his hand began to swell and grow red. EUROPE'S STOCK OF GOLD.

Since 1890 It Has Increased More

Than \$600,000,000. Since 1890 the gold in European banks according to the Economiste Europeen has increased by \$623,200,000. Of this the Imperial bank of Russia has gained \$185,800,000, the Bank of France \$167,-400,000, the Bank of England \$111,000,-000, the Austro-Hungarian bank \$79,-860,000, and the Imperial bank of Germany \$59,800,000. The gold comes from the American monetary circulation and from the production of the gold mines. At the end of 1895 the Bank of France and the Imperial bank of Russia between them held \$776,600,000 in gold, a little more than half the stock of gold in all the European banks and this does not include the gold in the Russian treasury, which is estimated at \$510,-400,000. The gold in Germany, Austro-Hungary, and Italy amounts
