The coal tonnage of the Huntingdon and Broad Top for the week ending March 28, 1896, was 55,327 tons, against 48,128 tons for the corresponding week of 1895, an increase of 7,298 tons; for the year to date, 489,952 tons, against 438,283 tons for the corresponding period of 1895, an increase of 51,668 tons.

The agreement, or verbal understanding among the anthracite coal roads is being as strongly held as ever, and there is no sign, says the Philadelphia Times, of any disagreement or change of the original plans of the companies perfected at the meeting in January. The presidents of all the roads pledged their corporations to the strict maintenance of the agreed prices and to the restriction of tonnage production to the agreed percentage of the total output decided upon for each month. It would be dicult for any legislative body to secure evidence that any combination of the coal companies exists, and this is just what the presidents intended when they decided to have no formally signed agreement made which could at any time be introduced as evidence against the members of the combination indi-vidually or collectively. The combination, however, continues to accomplish what it set out to do. Prices are firmly what it set out to do. Prices are firmly held at the official circular figure, or on the basis of \$3.60 to \$3.75 per ton for stove coal, f. o. b. in New York harbor. In addition to the maintenance of prices the pool has agreed to make the output of anthracite in April about 3,000,000 tons, which, it is believed, the market will absorb without difficulty, though the demand is still much slower than the roads expected a month ago. The March output will probably turn out to have been about 2,900,000 tons. It is be-lieved in the trade that the conditions which are likely to rule in the next six weeks will warrant an advance in stove coal at the end of that period to about \$3.90 per ton, New York terms. The demand for the steam sizes continued fair last week, owing to the hardening tendency of prices in the bituminous coa market. H H H

llouse Approves Resolutions Directing the Secretary of War to Prepare Plans for Deepening of Channel Into Portland, Maine.

Washington, March 31.—The Peffer resolution for an investigation into all the facts and circumstances of recent bond issues was not reached in the senbond issues was not reached in the sen-ate today, as had been expected, Mr. George (Dem., Miss.) having occupied nearly the entire session in an argu-ment against the claim of Mr. Dupont to the vacant seat in the senate from the state of Delaware. Mr. Peffer gave notice, however, that he would at the close of Mr. George's speech tomorrow ask the senate to proceed with the consideration of his resolution.

About half an hour was given to the consideration of the postoffice appropriation bill which appropriates the arge amount of 93,000,000 dollars, of large amount of \$3,000,000 dollars, of which nearly 13,000,000 dollars go to defray the expense of the free delivery system. A discussion was started on an amendment reported from the appropriation committee, allowing \$80,000 a year in addition to the present compensation of \$50,000 to the Oceanic steamship company for mall transportation from San Francisco to New Zealand and New South Wales. The question was not decided when the senate at 5 p. m. adjourned until tomorrow. HOUSE PROCEEDINGS.

The monotony of routine considera-tion of the sundry civil appropriation bill in committee of the whole house today was enlivened by several references to some political financial events of to some political financial events of recent date. Mr. Williams (Rep., Pa.) called attention to the reports that representatives of the Manufacturers' club of Philadelphia, in conference with certain persons in Washington had committed the club to the free colnage of silver in connection with a protective tariff as a satisfactory platform for the Republican party. He sent to the clerk's desk and had read the resolutions adopted last night by the club, as refuting the reports.

as refuting the reports.

Mr. Hartman (Rep., Mont.) said tha published reports were incorrect; that the silver men were not responsible for the conference, and that it had been held at the request of the club mem-

Mr. Allen (Rep., Utah) confirmed the statement that no bargain or agree-ment had been reached at the confer-ence. Then Mr. Pickler (Rep., S. D.) had read the financial platform adopted by the Republican convention of that state last Wednesday, to disprove the stories that the Republicans there had changed their attitude towards silver.

SUNDRY CIVIL BILL. In the course of the consideration of the sundry civil bill, attempts were made to amend it to increase the appropriation for the salary of the super intendent of the coast and geodetic survey from \$5,000 to \$6,000, the amount fixed by law; to strike out the appro-priation of \$50,000 for detection and pun-ishing violations of the internal revenue laws, and to strike out the appro-priation of \$19,500 for food, fuel and clothing for the Indians on the Pribyoff Islands, Alaska—all of which failed. The house passed senate joint resolutions directing the secretary of war to prepare plans and estimates for deepning the channel into Portland, Maine, harbor to thirty feet; to secure a twenty-five foot ship channel, 400 feet wide in Providence river and Narra-gansett bay from Sassafras Point to the ocean, and 'to expend \$20,000 for walls to the canal locks at the Cas

cades, Columbia river, Oregon. At 5 o'clock the house adjourned until

will bring us many surprises! Beware of Aries, "the Ram!" The regular storm periods and the reactionary storm periods as marked on our Storm and Sign calendar may not all arrive on time this month, as they have during the past six months. If the electri-cal currents continue to run from the northeast to the southwest for ten days twenty-six days, April may give us the greatest snow storm of the season.

PROFESSOR COLES FOR APRIL

From Storms and Signs.

The disturbing planets for April are Vulcan, Mercury, Venus and Earth. Earth being in sign Libra, the Balance: copposed by sign Arles, the Ram, forewarns us of the formation of an organization and strange combination, it hat may bring about many sudden and unexpected changes. For instance: While Libra, the Balance: While Libra, the Balance will be endeavoring to balance the unequally divided electrical currents during the Vulcan, Mercury and Earth storm periods that will occur between the 1st, and 2d; 4th and 7th, and 9th and 14th; Arles, the Ram, may take a notion to "butt" all her efforts over and unbalance the electrical currents again. If so, then look out for tornadoes, hall, sleet, snow, train, floods, high winds, thunder showers and red lightning. Also, strange phenomena, war threats, earthquakes, falling stars, rumors of war, awful catastrophes, horrible outrages and fearful deeds. And an epidemic of sudden deaths; railroad accidents, labor strikes, political disputes, etc. Another strange electrical phenomenon will occur somewhere in the northern part of New Jersey or in the southern part of the Jerseyites. The planets are in position this month to generate new ey made for this particular location, then position this month to generate new ey made for this particular location, then whall have in our possession some very important information to impart to the Jerseyites. The planets are in position this month to generate new ey disease microbes and parasites; look out for epidemics of new dis Wall Street Review. New York, March 31.-Business at the
