MARKET AND STOCK REPORT

Wall Street Review

New York, April 20.-Business at the stock exchange was on a larger scale today, and on a well distributed business prices for the leading issues scored material gains. Commission houses and firms with foreign connections re-ceived more orders than for some time, and local bull operators were also dis-posed to extend their lines, especially in the grangers. The steady rise in British consols, private cables report-ing transactions as high as 114, and the advance in United States fours of 1925 to 118%, explain why investors and others are compelled to seek other avenues for the employment of their capital. London, according to good au-thorities, bought fully 10,000 shares of St. Paul, Louisville and Nashville and the low-priced southwesterns, as well as a round amount of mortgages. Lo-cal operators paid more attention to the grangers than of late, and the bears

also covered extensively right through the list. The withdrawal of \$400,000 gold from the sub-treasury had no effect whatever, as the sterling exchange market is inclined to droop. It was understood at a late hour that only \$200,000 of the gold will be forwarded tomorrow. The disposition of the remainder was not positively known, some asserting that it will be forwarded late in the week and others that it ed late in the week and others that it will be turned into a local cly bank. and the velocity of wind, steam and wings are suggested by his progress.

The blcycle is the most important innovation in means of travel since the introduction of the locomotive, and we are in the infancy of its use, construction and means of propulsion.

Healthy-minded people are those who commend and practice its use.

To such we need hardly say, Your blcycle should be the latest and best.
