MCKINLEY OR CULLOM Bitter Strife Promised in the Illinois State Convention.

BAD POLITICS IN THE BATTLE

Friends of the Ohio Candidate Will Attempt to Organize the Convention and Change the Order of Business—They May Fail.

Washington, April 27.—A special to the West Springfield, Ill., says Major William McKinley expects to be nominated for president in this town next Wednesday. Senator Shelby M. Cullom says he will not be nominated himself. There is this difference in their plan of campaigning: McKinley wants to have the delegates-at-large instructed for him, so that if this is done the opposition will melt away by the time the St. Louis convention meets.

Washington, April 27.—A special to the West Springfield, Ill., says Major William McKinley expects to be nominated for president in this town next Wednesday. Senator Shelby M. Cullom says he will not be nominated himself. There is this difference in their plan of campaigning: McKinley wants to have the delegates-at-large instructed for him, so that if this is done the opposition will melt away by the time the St. Louis convention meets.

MAJORITY FOR OHIO MAN.

The convention will be made up of 1,335 delegates. Major McKinley's managers claim that more than 800 of the delegates are either instructed or pledged in favor of instructing the delegates-at-large for him. If this were true, there would be no doubt over the outcome, and they would not be instructed in favor of instructing the delegates-at-large for him. If this were true, there would be no doubt over the outcome, and they would not be instructed in favor of instructing the delegates-at-large for him.

MCKINLEY'S FOOLISH FRIENDS.

Major McKinley's managers have mapped out a scheme which will force a good many supporters of McKinley in antagonism to the preliminary skirmishing. They propose to capture the organization of the convention for the alleged purpose of securing fair play and preventing machine methods from stifling the voice of the people.

THE ATTEMPTED ORGANIZATION TAKEN BY JOHN R. TANNER.

The attempted organization is taken by John R. Tanner as an open attack on himself. He is justified in this position, because some of the McKinley leaders desire to be opposing McKinley and to have a chance to make a name for themselves. This is in a measure true. Tanner is with the Chicago organization and the party leaders of the state in opposing instructions on general principles. Then they are considering political friendship makes him favor Cullom. And if Cullom can't be nominated, he is for Allison. Again, if it should come down to a choice between Reed and McKinley he would be likely to turn to Reed.

TANNER WILL ORGANIZE IT.

Under these circumstances it is not difficult to guess that the organization of the convention will be a Tanner and not a McKinley one. A large number of delegates in the state have tried to moderate the zeal of the radicals who are at the head of the movement. They would be willing to rest everything on a square vote of instructions, but their advice has been thus far disregarded.

PROSPERITY OF MEXICO Effects of a Silver Standard of Currency.

AN INDEPENDENT COUNTRY

By the Demonstration of Silver Mexican People Have Been Induced to Do Their Own Manufacturing—Money and Industries Kept at Home.

Washington, April 27.—Representative Newland of Nevada, endeavoring to have the ways and means committee inquire what effect the difference of exchange between gold and silver standard countries has upon the agricultural and manufacturing industries of the United States and report by bill or otherwise.

MCKINLEY ON CURRENCY.

Important Letter from Senator Sherman to the Brooklyn Young Republican Club (Brooklyn, N. Y., April 27.—At a meeting of the Brooklyn Young Republican club this evening a letter from Senator John Sherman, of Ohio, was read, in which he expressed his no doubt as to the opinions of Major McKinley on the money question.

ENCOURAGE MANUFACTURING.

The present condition of the silver market is leading the capital stock to do their own manufacturing. As an instance of this, I may cite Chihuahua as an example. An iron foundry and machine shop was established there some time ago with \$50,000 capital for the purpose of manufacturing the mining and other machinery for which there is a large and growing demand in that vicinity and which was formerly supplied by the United States.

ENTERPRISES ESTABLISHED.

Numerous other enterprises have been established and are in contemplation. All that is required is a remunerative employment to Mexican artisans and laborers, and what is equally important, serving to keep Mexican money in the country.
