George G. Mahy, Secretary Young Men's Christian Association, Scranton, Pa. Dear Sir:—Why spend \$500 or \$400 of the hard carned proceeds of the late membership contest on a banquet? As captain of the winning side, I say no. While it would be an occasion of considerable satisfaction to us to be feasted by so loyal a band as the "Reds," and while it would, no doubt, be an evening of great enjoyment to us all, yet. I feel that winning so noble a battle is recompense enough for the "Blues."

I would, therefore, suggest that the proconsideration of the rival bias, met for the purpose of giving the opposing com-panies an opportunity of stating their cases. Instead of merely having to deal with the representative of the compa-nies, the committee found itself besleged by two delegations of property holders, the one headed by W. W. I would, therefore, suggest that the proposed banquet be dispensed with, and the amount of money that it would cost be used in carrying on the great and good work of the association.

The board of directors of the Young Chairman Keller opened the session by having Clerk Hatton read the bids. The Barber Asphalt company proposed to lay the pavement for \$2.58 per square yard; to put in straight curb for 67 cents per lineal foot; to put in curved curb for 92 cents and to reset old curb for 22 cents. Dunn Bros, offered to do the paving for \$2,23 per square yard; to put in curb for 60 cents per lineal foot, and to reset old curb for 15 cents per linea foot. The propositions having been read. W. W. While he in common with the other property holders wanted to get the pavement laid as cheaply as possible, he did not think it advisable to try an experiment which might prove costly in the end there was some question as to the ma ity that the money which the banquet would cost should be saved for the natatorium, the board is willing it should be so. On the other hand, the board recognizes the fact that it is un-der agreement to give a banquet to the winners in the contest, unless there should be a plain expression of opinion to the contrary. Mr. Watson then read a paper, which he stated he had drawn up at the request of the property holders he represented, in which the committee was petitioned to assure itself that the asphalt which Dunn Brothers propose to use is the genuine pitch Lake Trinidad asphalt, required by the specifications; that they be compelled to submit a sample of it for expert examination; that they show where they propose to Gearhart interrupted him here of this week.

the station at Lackawann about 9.30 o'clock lst night found a man with his leg crushed and head badly cut lying on the bank. He was alive, but unconscious, and from all appearances had been struck by an up train, which had passed but a short time before.

The next train that came along was flagged and the injured man was conveyed to this city and taken to the the firm of Dunn Brothers, next took the floor. He said that his firm would give a bond that they would do the work according to the specifications and equally as well as the Barber people could do it, and for 35 cents a square yard less. That was their side of the case.

"He can't do what he says," spoke up Colonel Hitchcock. Our company never made 10 per cent. on any job in this city. These people can't get the veyed to this city and taken to the Lackawanna hospital. He recovered consciousness on the way to this city and told that his name was Louis Lar-

A Rare Musical Treat-The Artists Who A rare treat is before Scranton music lovers who attend the concert to be given at Young Men's Christian Association hall on Monday evening, May 11, by the well-known contraito, Miss Mary Thomas, of London. On this occasion Miss Thomas will be assisted by the following artists: Gwilym Thomas, basso: Theodore Hemberger, violinist; J. Alfred Pennington, accompanist.

Mr. Gearhart then made quite a lengthy speech in favor of accepting Dunn Brothers' contract. He said they were a firm doing a big business and are perfectly reliable. They can get this asphalt by paying for it, and they have the money to buy it. The specifi-cations call for certain things and we have a city engineer and an inspector to see that the specifications are lived up to. By accepting the Dunn Brothers' bid the property holders on the four squares to be paved, will be saved \$2,871.81 for pavement alone, not count-ing the saving on curbing. He concluded by stating that he was

there to represent himself and some of the property holders and not Dunn Brothers, and further affirmed that

Dunn Brothers did not know that he was going to be there.

T. H. Watkins, who spoke for himself and C. D. Simpson and H. P. Simpson, said that they had just spent thousands of dollars on property there, and wanted only the best pave. If the committee is satisfied that Dunn Brothers can fulfill the contract give it to them, but if there is any question of their ability to do so, he would not want the committee to save the 35 cents on his account.

Then the question as to the kind of asphalt that Dunn Bros, proposed to furnish was discussed for some time. Mr. Dunn refused to disclose where he intended to get it, but agreed to submit a sample of it for expert examination. Colonel Hitchcock brought forward samples of their asphalt and left them with the committee.

THEY WILL COMPETE. Mr. Dunn stated that it is their intention to put up a plant here and compete for asphalt contracts as long as there is one to be given out.

THE POWER OF LIGHTNING. One Bolt Known to Have Equalled 50,000

Horse Power. It is no doubt interesting to express the force of a stroke of lightning in horse power. During a recent storm which passed over Klausthal, a bolt struck a wooden column in a dwelling. and in the top of this column were two wire nails, 5-32 inch diameter. The electric fluid melted the two nails in-

stantly. To melt iron in this short time would be impossible in the largest fur-ace now in existence, and it could only be accomplished with the aid of electricity, but a current of 200 amperes and a potential of 20,000 volts would be and a potential of 20,000 voits would necessary.

This electric force for one second represents 5,600 horse power, but as the lightning accomplished the melting in considerably less time, say one-tenth of a second, it follows that the bolt was 50,000 horse power.

ROOF TINNING AND SOLDERING All done away with by the use of HART-MAN'S PATENT PAINT, which consists of ingredients well-known to all. It can be applied to tin, galvanized tin, sheet iron roofs, also to brick dwellings, which will prevent absolutely any crumbling, cracking or breaking of the brick. It will outlast tinning of any kind by many years, and its cost does not exceed one-fifth that of the cost of tinning, is sold by the job or pound. Contracts taken by
