Maddox Seated by Committee on Contested Elections.

Washington, May 11 .- The senate had Washington, May II.—The senate had another copious dose of San Pedro and Santa Monica today. Three of the members of the committee on commerce who oppose the amendment offered by the chairman of the committee, Mr. Pyre designating Santa Pedro as the place toria door set harder in California figures as follows:

for a deen sea harbor in California. Senators Herry (Den., Ark.), Vest (Dem., Mo.) and Caffrey (Dem., La.) submitted remarks against the amend-ment which Mr. Horry described as a most unjustifiable and inexcusable attempt to overrule public sentiment Penn, Couf Lackawanna and to appropriate money in the inter-est of private greed and private gain. Mr. Vest argued against making an

Mr. Vest argued against making an appropriation for a breakwater either at the one place or the other; as in his judgment there was no necessity of the expenditure and as the condition of the trensury was such that an issue of bonds would be necessary in a few months. Mr. Caffrey based his argu-ment against Santa Monica on the re-ports of the two boards of army engi-neers and was remained in that con-nection of the success of the Eads scheme for decorning the approach to New Orleans in spite of the adverse views of the army engineers. Then the chairman of the committee, Mr. Frye (Rep., Me.) commenced the last, of an-swering all the objections to the comof each region follow: wering all the objections to the com-mittee amendment and in doing so he colorized Mr. C. P. Huntington, who had been mentioned as a political factor in California where a man's chances of a conduction for office turned upon the local of obschool by easy for or moment fact of whether he was for or against Huntington. Mr. Frye's speech was not finished when the bill was hild aside till tonorrow but at that time Mr. Gorman (Dem., Md.) gave notice of an amendment limiting the annual expenditure under the pending and former

river and harbor bills to ten million dollars. HOUSE PROCEEDINGS.

Miscellaneous business was the order anseenancous outsides was the oblight in the house today. The following bills were passed: Extending for two years the period within which the Dennison and Northern Railroad company may build its line through Indian territory; authorizing the Denver, Cripple Creek and Southwestern Railroad company to construct its line through the South Platte and Plum Creek forest reservaion in Colorado; granting right of way over public lands in Colorado and Wyoming, except Yellowstone park, for oil pipe lines; authorizing the Flagstaff and Canon Railroad company to build its line through Grand Canon forest reservation, Arizona; authorizing the building of the bridges over the Red river between Wieconsin and Minne-sota and over the Missouria river at Columbia, Mo.; and authorizing the secretary of the treasury to issue and enforce regulations for the safety of

nger excursions at any regatta o acht ruce on the navigable waters of he United States.

A preliminary conference report upon the Indian appropriation bill was agreed and another conference ordered on the

items still in dispute. The resolutions of elections committee No. 1, declaring John W. Maddox (Democrat) to be entitled to the seat occupied by him as reported from the Seventh district of Georgia, contested

PER CAPITA CONSUMPTION OF WHEAT.-Bradstreet's has made a di-igent inquiry on the much-mooted question, the annual consumption of wheat per capita. There is no doubt that the use of this cereal has increased largely in recent years, and the result of the present investigation increases the estimate of our Agricultural de-partment and that of English authorities. Bradstreet's sums no as follows: If the 196 pounds of flour in the aver-age barrel require 4.46 bushels of wheat in its manufacture, then one pound of flour is the equivalent of 1.3% pounds of wheat, and the 249 pounds of wheat flour which this inquiry seems to indicate to be the average annual consump-tion per capita, are equivalent to 232.25 pounds of wheat, or 5.287 bushels of wheat of sixty pounds each, or 1.224 barrels of flour. For those who choose to consider 4.40 bushels of wheat to the barrels of flour too low, notwith-standing the opinions offered by numer-

ous millers, a like calculation may be worked out by such as prefer to use 4.5 bushels as the convalent of a barrel of flour, or a higher proportion, but the result in either case will be that instead of the average annual consumption per capita being 4.5 bushels of wheat, as Mr. Atkinson has said was "well ascertained," or 4 2-3 bushels of wheat, as the Agricultural department has believed it to be, it is about 5.257 bushels, a little more than one and one-flith barrels of flour per annum.

IRON AND STEEL-With a weak market for pig iron, production, says Dun, much exceeding present consumption, purchases and orders are gen ally held back, so that buying falls much below actual consumption. Whether this will end by decrease of nsumption at prices demanded or by crease of buying is the problem. Doubt whether new combinations will be able to control markets causes post-ponement of many purchases and or-ders, and while their strength is thus dets, and while their strength is thus tested, more mills are obliged to close, including some like the Springfield Iron Works of Illinois, which stop for the first time in their history. Mails have been raised to 2.55 for wire against \$5 cents a year ago, and 2.30 for cut against 75 cents a year ago, and many additional concerns are going into the manufacture. Bar makers are de-
