W. Parker, statistician of the United States geological survey, has completed the compliation of the statistics of coal production in the United States during the calendar year, 1895. The total output from all mines was171.804.-742 long tons, or 192,421,311 short tons, having a total value a he mines of \$197,-572,417. This shows an increase over the production in 1834 of about 12,350,000long tons or nearly 22,066,000 short tons and an increase in value of about \$11.-500,000. The output of anthracite coal in Pennsylvania increased from 46,358,-144 long tons in 1894 to 51,785,122 long tons in 1895, a gain of over 5,400,000 long tons. The value increased only about 5,500,000 from \$78,488,063 to \$82,019,272, showing that anthracite coal was cheaper in 1895 than in 1894. The product of bituminous coal increased from 118,820,405 short tors in 1894 to 134,421,974 short tons in 1895, a gain of over 15,500, 600 tons. The value increased about 88,000,000. There was an increased pro-duction in all but five of the twenty-nine coal producing states. Alabama and Pennsylvania showed phenomenal and Fernsylvania snowed pernomenal gains of more than 25 per cent. Ala-bama increasing from 4.357,178 short tons in 1894 to 5.679,775 tons in 1895, with a valuation of 55,348,795 and Pennsyl-vania from 39,912,463 short tons to 50,-017 446 obset tons would at 807 pennsyl-017,446 short tons, valued at \$25,902,678 The states in which a decreased pro-duct was shown were Georgia, Kansas, North Dakota, West Virginia and Wy-Coming. The principal loser was Kan-sus. The product among the other lend-ing coal states was: Illinois, 17,735,864, yralue, \$14,239,157; Ohlo, 13,376,137, value, \$0,637,553, and West Virginia, 11,424,863, yaba, \$7,557,564

valae, \$7,787,120. ------

AMERICA LEADS THE WORLD. Mulhall gives statistics of the pro-Mulhall gives statistics of the pro-ductive energy-of various countries which show that the aggregate of all the energies in use in the United States in 1829 was equal to 440 foot tons per In 1829 Was equal to 440 foot tons per capita. In 1890 this had increased to 1940 foot tons, and the position of the other countries was as follows: Eng-land, 1470 per capita; Germany, 992; France, 910; Spain, 590; Australia, 560; Italy, 380. A foot ton is calculated as the amount of lifting work that an un-aided man could do in 10 hours.

SHORT NOTES:

The Financial Chronicle estimates the cotton acreage of 20,107,247 this year, as compared with 17,767,663 in 1895. The present estimate of the wheat crop of 1895 is 500,000,000 bushels. The

government estimate in December was

657,000,000 bushels. During the first week in May 71 rail-roads increased 5.68 per cent, in gross earnings. In the second week 83 roads increased 2.86 per cent.

Prussian state railroads have put seats into all their fourth-class cars, in which formerly there was "standing room only." It used to be urged that they were better without seats as they afforded place for tool boxes, market baskets, and the like, which numbers of their patrons carry with them of their patrons carry with them.

of their patrons carry with them. The American Economist says: In 1892, under protection, we sold farm products in the markets of the world that were worth to us \$800,000,000 in round numbers. In 1895, the first com-plete "Tariff Reform" year, we sold farm products worth only \$546,000,000. The capture of the markets of the world, under a free trade administra-tion, cost farmers \$254,000,000. No won-der they want a little more MeKinley protection.
