THE COAL TRADE.-The president

The growth of the rattle of the ratof one of the anthracite companies said yesterday, says the Phi a'elphia Times, that the coal trade has drifted more or less into a position where there is practlesnake, which is very numerous hereabouts, has been studied by a local scientist, who finds that the rattle is less into a position where there is prac-tically a duel between the buyers and the sales agents. Buyers of coal are trying to starve the sales agents into cutting prices a little, and as a result very little coal is being sold. The sales agents, however, are firm on the point and insist on the full circular. There is no sign of weakness on their part, and as stocks of coal in second hands are known to be small, the result will be that buyers will have to come to time and pay the full circular. The gentleman quoted says that it must be distinctly understood that there is no trust or combination. The only thing frequently shed; and, after being shed (his snakes were kept in a very warm room) in three or four months two rattles were present, their appearance having nothing to do with the casting of the skin. The approximate figures of vibrations were, for the tail, 75; of the rattle, 100 a second. trust or combination. The only thing is that the railroads are agreed on the

The Influence of Gemini.

The Sun enters the sign of Gemini to-day and will remain in the same until June 21. Gemini is included in the intellectual signs of Zadiac, and children born under its influence belong to the realm of edu-cation, arts and mechanics. They are Its influence belong to the realm of edu-cation, arts and mechanics. They are usually very active and want to do some-thing all the time, they are lovers of knowledge and frequently succeed as lec-turers. Children of Gemini lack continui-ty. Unless their life is modified by strong planetary influences they are apt to be in-constant.

Of the children of Gemini the ancient Of the children of Gemini the ancient astrologers speak as follows: "Gemini be-ing naturally fair doth also cause a fair child, and one that will be merry, witty, liberal and wise, but a boaster, a great traveler and strayer about countries, car-ing little about his own business, whereby he will be neither rich, neither oppressed with poverty, but of mean estate; and of such fidelity that he will be appointed to some office under government. He will be full of understanding, suble, gentle to be spoken to and will be liked by most everybody, as they which have Venus well placed in their nativity. Also fair of face. The Lawyer's Retainer.

The Lawyer's Retainer. A criminal lawyer in Chicago, who is noted for his faculty in acquiting any prisoner in whose defense he may be em-ployed, without much regard to the char-acter of the evidence, is in great demand, particularly among those who feel that their cases may be precarious. He received a letter the other day from a prisoner in the county jail. It related that the writ-er had been arrested for horse-stealing and was indicted at the last session of the grand jury. It declared that the writer had little hope of acquittal unless good taient could be enlisted in his behalf, and he begged the lawyer addressed to take the case. Then came the pathetic part of the letter.
