DEATH LIST GROWS

Bodies of Cyclone Victims Are Found Crushed Beyond Recognition.

THE MILITIA IS CALLED OUT

Presence of Troops Necessary to Protect Property from Thieves and Vandals—Heartrending Scenes. Hundreds of Homeless Residents Sleep in the Open Air.

St. Louis, Mo., May 29.—Memorial Day of '96 will hereafter be an anniversary of saddened memories to the people of the Mound City. "Old Glories" innumerable, all of old, float in the breeze tomorrow, but instead of a proud position at the head of the poles, they will be lowered to the sign of mourning and sorrow at half mast. Beneath their procession after procession will wind its way around the principal thoroughfares and over Grand avenue to the last resting places of the departed at beautiful Calvary and Belmont.

There were a number of funerals today, but relatives of the great majority of the victims preferred to take advantage of the fact that the morrow is Decoration Day and a half holiday and therefore arranged accordingly for the interments.

At a regular meeting of the municipal assembly tonight Mayor Walbridge submitted a special message relating to the relief of the storm sufferers. This proposition was favorably received, but the exigencies of legislation will delay conclusive action for several days.

Mayor Walbridge took occasion in his message to point out that St. Louis was the only city in the country which had weathered safely the recent financial gale, and it should not be said that any disturbance, physical or financial, could make St. Louis a mendacious asking alms. This independence of feeling seems universal here. It does not appear to be bragadocio, but serene confidence in the ability and disposition of St. Louisians to care for the storm victims.

STATEMENT OF THE FATALITIES.—From detailed reports received by the United Press from official sources up to 2:30 p. m. the following tabulated statement is prepared: Dead in St. Louis, 174; unknown dead in St. Louis, 8; fatally injured in St. Louis, 18; missing in St. Louis, 40; identified dead in East St. Louis, 142; unknown dead in East St. Louis, 3; fatally injured in East St. Louis, 19. Total fatalities, 388. Injured in St. Louis (estimated) 1,000. Injured in East St. Louis (estimated) 200.

The hurricane struck only a portion of the buildings, the principal loss being from fire. The most serious damage at the Turner Iron works were exaggerated. All buildings and machinery are intact, and the works will be operated Monday.

The list of dead which have been hitherto printed, have been of necessity, been full of errors. Men were reported dead who were missing and have since turned up; false identifications were made, many confused by misinformation and misspelling, so that there have been already printed the names of more than have really been found. There are still many persons missing and some are undoubtedly still in the ruins. The work of discovery is now progressing somewhat more slowly owing to the complete exhaustion of the workers, and the necessity for repairs in their own shattered homes.

There are unquestionably many persons who have been killed whose disappearance has not been noted.

LARGE HOTELS UNINJURED.—None of the large hotels were injured and the section of the city that felt the violence of the storm includes but a handful of houses that have been placed in the list of contingent extra accommodations for visitors. More than nine-tenths of the houses so listed and covering a radius from half a mile to two miles west of the Auditorium are in a district entirely outside the path of the storm.

Up to noon today Coroner Walt had held eighty inquests. In each case a verdict setting forth the fact that the deceased had come to his or her death by injuries received as the result of a tornado, was returned. About the same number of inquests have been held in East St. Louis, the verdicts being in similar terms.

Workers are busily engaged in clearing away the wreckage of the St. Louis Refrigerator and Wooden Gutter company, in which it is believed over twenty-five bodies lay beneath the ruins. The mass of debris is so great, however, that it is not believed the basements of the building, in which the bodies are, will be reached inside of twelve hours.

MISS MINNIE CONRAD, 22 years of age, daughter of Lieutenant Conrad, of Jefferson Barracks, is believed to be among the killed. She left home Wednesday afternoon and has not been seen or heard from since.

MARVELOUS ESCAPE.—While workers were digging in the ruins of one of the tenements at Seventh and Rutger street, where so much havoc was caused, an infant voice cried out: "Please don't be so rough." An opening was quickly made in the debris above the spot from whence the voice issued, and through its depth a 10-year-old boy, leading three girls about the same age appeared. All were uninjured, although they were weak from hunger, and confinement for nearly forty hours. A shout of joy went up from the crowd, and before the police could ascertain any names, the little ones had been carried away. Somebody asked the little boy as he was disappearing how he came to be so lucky, and he piped in childish accents: "We just fell in a soft place."

of St. Louis millionaires, is reported sunk, with watchman, engineer and cook. The alarming rumor prevails that a priest and several nuns are still under the ruins of St. Henry's Roman Catholic church, corner of California avenue and Caroline street. The damage to St. Louis theaters by wind and rain is estimated in the aggregate at \$18,000. The loss is mainly caused by buildings being unroofed and scenery destroyed by water.

DEATH OF A GHOUL.—There is one particular unidentified body in the morgue that tomorrow will be interred in the potter's field, simply because it is too badly mangled to be of service to the anatomical class of the colleges. The injuries that resulted in the victim's death are not attributable to the tornado, but were rather a sequence of horror. A couple of hours after the power house of the South Side electric line had been leveled, a trampish looking individual put in an appearance and volunteered to assist in the search. During the night four bodies were taken from the debris and laid aside by side. Then, according to a local citizen who told the story at the morgue today, the volunteer, availing himself of what he thought was a favorable opportunity, proceeded to rifle the clothing of the dead. He was caught in the act by one of the searchers and who, without warning, felled him with a brick. Then with cries of "lynch the thief," the entire party of searchers fell upon him, with kicks and blows from boards and scantlings, and when they paused for breath the ghoul was dead. A pledge of secrecy was quickly passed around, the ambulance was called for and the body conveyed to the morgue under the supposition that it was that of a victim of the power house wreck.

A RELIEF FUND.—St. Louis, Mo., May 29.—A hastily convened meeting of a few leading citizens was held yesterday in the Merchants' Exchange and a fund of \$15,000 raised for the relief of the storm sufferers. This was increased to \$20,000 today. That was before the full extent of the calamity was known. Today when the awful panorama of death and destruction was fully unfolded the relief fund was doubled within two hours and is constantly growing. A relief committee has assumed the task of receiving and distributing contributions to the fund. Notwithstanding no appeal for outside assistance, the relief committee is deluged with substantial gifts of money from every quarter, all of them accompanied with expressions of sympathy and words of good cheer. A relief committee, with kindly words of appreciation, and the statement that St. Louis is amply competent to take care of all her destitute and deserving.

St. Louis desires it well understood that until all her own resources are exhausted, no appeal to the outside world will be made.

Many hundreds of the homeless are already receiving assistance from the committee.

PROPERTY LOSSES.—Forgetting every personal interest that clashes with work of mercy, the people of this city were anxiously ministered to the suffering of the luckless ones. Since the dreadful twenty minutes of disaster yesterday evening, no thought has been given to property losses. The worst is now known, however, and the work of computing material losses has begun. As the world knows, the great number of sufferers are small property owners. These individual losses are small, but they aggregate the larger part of the whole. Below Amble and Jarrettown, where houses that over 3,000 houses have been damaged or wholly destroyed. They were mainly residences of the middle class, small shops, and mechanics. The damage to church property was particularly severe.

The estimates of good architects and reputable real estate dealers, place the loss at about \$22,000,000.

(Continued on Page 7.)

DESTRUCTION AT AMBLER.—Damage from the cyclone is Greater Than Was First Supposed. Amble, Pa., May 29.—The destruction wrought by the cyclone yesterday afternoon at Amble, Pa., is greater than was first supposed. A tour made over the stricken district today reveals a picture of desolation never before witnessed in this vicinity. Below Amble and Jarrettown, where the storm was the most severe, no less than seventy-five barns, houses and other buildings are either partly or completely destroyed. The loss will amount to over \$100,000. Alexander Knight says the loss to his property will be more than \$25,000.

Coroner Kurtz gave permission to bury the bodies of Albert Moffatt and Winfield Emalle, who were killed at Jarrettown. He did not deem an inquest necessary.

John Betz, who was injured in the wreck at the hotel stables, is not expected to recover. The work of clearing away the debris is going on rapidly today, giving employ to hundreds of men. The loss will fall heavily on the property owners as many of the buildings were not insured against storm. Mr. Knight had a warehouse on his buildings and his loss is complete.

FIGHT POSTPONED.—Maher and Slavin Held in Court Until a Late Hour. Long Island City, May 29.—The twenty round go between Maher and Slavin, which was to have been brought off before the breakers of Long Island City, tonight, was postponed until Friday night next, owing to the action taken by Police Justice Ingram.

The principals, together with the manager of the club and Maher's manager, were held for examination before the justice from 8 o'clock until after 10 p. m., while the court officers were looking for the complainant, whose affidavit the defendants had been arrested in a charge of being about to engage in a prize fight. The complainant kept out of the reach of the officers, who were sent to find him.

PREPARING FOR CAMP.—State Department Officials Examine the Grounds. Harrisburg, Pa., May 29.—Superintendent Creighton, Assistant Engineer Heale and Assistant Trainmasters Moore and McClintock went up to Lewisport today for the purpose of noting what improvements are needed at the proposed camp site of the National Guard.

The grounds are naturally well adapted for the purpose required, but sidings for the storage of the camp equipment and stores will have to be constructed and water for drinking purposes piped from a spring a few miles distant.

"Scally Bill" Kicked Out.—Woburn, Mass., May 29.—Joe Wolcott, Boston, and "Scally Bill" Quinn, of Pennsylvania, fought at this place tonight. Wolcott won in the twentieth round, completely knocking Quinn out.

SILVERITES WILL NOT BE EXCLUDED

Harrity Defines His Position in a Letter to Mr. Money. WILL TREAT DELEGATES ALIKE Has No Intention of Excluding from the Roll Call Any Delegate Who Has Announced His Intention of Boasting a Gold Standard Ticket.

Washington, May 29.—Senator-elect Money (Dem., Miss.), who is one of the delegates-at-large from his state to the Chicago convention, recently wrote a letter to Mr. Harrity, of Pennsylvania, chairman of the Democratic executive committee, calling his attention to the widely published reports that he (Harrity) was credited with having announced that an attempt would be made to exclude from the convention free-silver delegates who might be suspected of an intention to bolt in case the convention declared for gold. Mr. Money, who is an ardent free-silver man, as a delegate asked Mr. Harrity to make a frank reply to him as to the truth of these reports. He received a response today in which Mr. Harrity says: "It is not true that I have declared any intention by the Democratic national committee to exclude from the roll-call of the convention any delegate who has expressed a purpose to bolt if the convention does not favor in its platform the free and unlimited coinage of silver. I have no such intention, and I do not intend to make any statement to that effect, either privately or publicly. I did not undertake to speak for the committee nor any of its members."

"What I did say was that in my personal judgment no man ought to enter or be admitted in any political convention or caucus who is not prepared to abide by the will of the majority and acquiesce in this direction; and I further stated that in my opinion this ought to apply with equal force to those who oppose as to those who favor free coinage."

WILL SUPPORT THE MAJORITY.—"I, too, am a delegate to the Chicago convention and should a majority of that body make a platform and nominate candidates not in accord with my own views, I will abide by the result and give loyal and cordial support to the candidate. If I did not intend to do so, I should consider it my duty not to attend the convention. Political conventions are called for the purpose of harmonizing or compromising such differences as may exist, and of ascertaining the will of the majority as to candidates, policies or candidates. To hold that those who entertain fixed views are to be permitted to be so tedious of the convention as to insist on their own and then to withdraw in case of failure, is a long step towards contending that a minority should govern. It is a sound Democratic doctrine that the will of the majority should govern. It is usually so recognized in all states where political conventions take place. It is a principle which should be maintained in all political conventions that once the majority of the delegates to a convention has promptly made it unanimous."

"Let me add that my attention has been called to a statement that appeared in some newspapers, not only in this city, but in other states, that the Democratic state conventions have already declared for free coinage, to the effect that I had announced that I would not support the majority of the convention every contesting delegate who will not pledge himself in advance to abide by the action of the committee in making up the platform for the convention. There is no foundation whatever for that statement. It is a pure invention, and was doubtless concocted by some party interested and if some distinguished Democrat be correctly reported, the author of the story has been successful in his purpose."

HAUNTED BY A VOICE.—Joseph Knecht Driven to Suicide by an Unearthly Scream That Rang in His Head for Thirty-five Years. Wilkes-Barre, May 29.—An old soldier named Joseph Knecht, living at Noxon, 28 years of age, died of his own death by taking poison a few days ago. The story is that he purchased ten cents worth of arsenic and remarked that he was going to kill himself, but nobody believed it. Yesterday he was found in a barn dead.

In connection with the circumstances of Knecht's death, it is said that when he was a soldier in the war for the Union, a rebel shot one of Knecht's comrades. This occurred near the rebel's home, and Knecht vowed revenge. Going to the house with the loaded gun he slew the rebel in the presence of his wife and family. The woman so feared when she saw her husband killed, and her voice had such an unearthly sound that Knecht said it always haunted him, and he was going to kill himself in order to get away from the result of his cruelty.

THEIR FIRST REUNION.—Third Pennsylvania Volunteers Organize a Regimental Association. Hollidaysburg, Pa., May 29.—The Third regiment, Pennsylvania volunteers, composed of Allegheny, Blair and Cambria counties, held their first reunion at Lakemont park today. A regimental association was organized with the following officers: President, Major O. M. Irvine, of Duncansville; vice-presidents, John McParlane and John Nutty; secretary, C. D. Bowers, of Hollidaysburg; treasurer, Captain Robert Johnson, of Uniontown. This regiment claims the same honor and distinction as are accorded First Regiments, because they went to the front after the first call as quickly as transportation could be furnished them. A committee was appointed to secure a just recognition of this honor.

SOCIETY GIRL PLAYS BURGLAR.—With Her Little Sister She Steals Property Valued at \$3,000. New York, May 29.—Urti Tuesday in west side society there was no young lady that was more popular than pretty Georgia Brock. Her father, Henry Brock, is president of a commercial agency and a man of considerable wealth.

Tuesday Georgia, who is 21 years old, and her 11-year-old sister, Florence, were arrested on a charge of burglary. Both admitted their guilt and they held it bonds of \$1,000 each. They have committed several burglaries and are estimated to have stolen not less than \$2,500 worth of goods.

PROSPECTS BRIGHT.

Hesitation on Account of Political Uncertainty Only Bar to Lively Trade. Railroad Earnings Increase.

New York, May 29.—R. G. Dun & Co. will say tomorrow in their weekly Review of Trade: Failures for the week have been 239 for the United States, against 215 last year, and 29 in Canada against 24 last year.

Continued exports of gold are recognized as natural results of the borrowing and importing early in the year, but caused no serious apprehension. There is a general conviction that destructive schemes will not succeed, although at present political uncertainties cause part of the business that might be done to be postponed until the future is more clear. When conventions are over, the field for doubt will be much narrowed. It seems probable men will then begin to act on what they consider certainties. Others will find their worst fears idle, and will settle down to business. Business is a question of human nature, and he reads it best who remembers that all sorts of people have a share, by their hopes and fears, their purchases on credit, in making trade. It seems probable at present that a majority, after the conventions have acted, will be in a more hopeful humor than they are.

Markets for products are weak rather than stagnant. The business done is small, but largely governed by the belief in large crops and in sufficient demand. Wheat has fallen 1 cent, cotton has fallen an eighth in spite of continued reports that famine is near. Decrease in manufacture of 30 per cent at the north perhaps more at the south.

Show the real nature of estimates based on continued manufacture at maximum rate. Receipts still indicate a crop of seven million bales, but it seems probable much greater than consumption in any year.

Boot and shoe shipments 6 per cent larger than last year, then the largest on record. Indicates that in some branches makers are catching up with their orders, and many are discharging cutters. Yet many others have orders for months ahead and sales are slow. Large for the season, and manufacturers quite generally insist upon a slight advance in prices, which buyers do not yet pay. The iron and steel markets are weak, with lower prices, because the demand for finished product is entirely inadequate, though prices of these are higher. Pig iron has fallen over five per cent since April 1, but the average of finished products has advanced 3 per cent. Plates weakened and there is no improvement in sheets or rods, but beam makers have raised the price \$2 per ton. An average right advance in the average of all prices for the week. It is possible that rebuilding after the disaster at St. Louis may be a week, with lower prices, because the demand for finished product is entirely inadequate, though prices of these are higher. Pig iron has fallen over five per cent since April 1, but the average of finished products has advanced 3 per cent. Plates weakened and there is no improvement in sheets or rods, but beam makers have raised the price \$2 per ton. An average right advance in the average of all prices for the week.
