Congressmen—At Large, GALUSHA A. GROW, of Susquehanna. SAMUEL A. DAVENPORT, of Erie. Election Day, Nov. 3.

By what right does the chief of the fire department violate the ordinance against fast driving?

The West is in the Saddle.

Says a St. Louis correspondent: "The way in which New York, hitherto always such a dominant factor in the conventions of both parties, has dropped out of sight is almost pitiful, as it stands as a monument to one man's selfishness and incompetency."

Some instructive information has been embodied in the report which the ways and means committee recently made on the menace to American manufacturers by the threatened invasion of the cheap products of Oriental labor.

While the present occupation of Platt is largely the result of Platt's own foreshadowing, yet the dawning of the Empire state's political importance is not wholly Platt's handiwork.

One of the consequences of this growth of the west into political importance will be that the influence of jobbers and traders at national conventions will in future diminish.

The Tribune's campaign for a separate ward for women in the central police station has at last borne fruit.

Another Big Exposition.

One of the last acts of congress before adjournment was to pass the bill authorizing the holding of a Trans-Mississippi and International exposition at Omaha in 1898.

and territories have already given assurance that they will be represented by suitable exhibits, the purpose being to make a showing of the resources and progress of the great empire lying between the Father of Waters and the Pacific coast.

There is also the additional reason that all such expositions are excellent stimulants to honorable progress in the development of our varied commerce and equally excellent means of cementing inter-sectional friendships and promoting that unity of civic purposes which is necessary to the welfare of this diversified republic.

It seems to be the belief at St. Louis that Hon. Garrett Hobart, of New Jersey, is the destined winner for vice-president.

Looking Toward the Orient. Some instructive information has been embodied in the report which the ways and means committee recently made on the menace to American manufacturers by the threatened invasion of the cheap products of Oriental labor.

Taking Japan as the Oriental country from whose industries competition is most to be feared, the report points out that while wages in Japan are almost incredibly low, ranging among factory operatives from 5 to 20 cents a day, the hours of work average twelve a day and the quality of the work performed is fair if not good.

The committee reports that it knows no remedy for this probable coming competition except the imposition of duties on competing imports equivalent to the difference of cost and distribution.

dict that before the season is over the croakers will be singing a different tune.

Referring to the reported comments of Mr. Cleveland on Major McKinley's candidacy, the Pittsburgh Commercial-Gazette interprets them as really complimentary.

Having completed his interesting letters of Alaskan travel, Mr. J. E. Richmond will take a rest for a few weeks before beginning in the Saturday Tribune his series of letters on "From the Pacific to the Atlantic Through the Queen's Dominions."

If Mr. Cleveland is disgusted with public life he has no one but himself to blame for the disappointments which public life has brought to him.

Suppose Cameron should be nominated at Chicago?

AMERICA AHEAD.

W. E. Curtis in Chicago Record. In a recent number of Current Literature an English writer asserts that "the greatest corporation on earth is the London and Northwestern Railway company of England, with its capital of \$50,000,000, a revenue of \$5,000,000 an hour, 3,000 engines and 30,000 employees and regular that cost \$200,000 a month."

The Northwestern boasts of 60,000 employees, but the Pennsylvania company has over 100,000, who with their families, make up a total of about 500,000 persons dependent for their living upon the Pennsylvania road.
